

ATECH FLASH TECHNOLOGY

KIOSK READER EX-S3C

USB 3.1 Gen 1

3.5" Serviceable Reader

Quick, Reliable

Photo Kiosks are getting more and more popular due to the high growth of digital photography. As a result of this, kiosks in high commercial or industrial usages require their components to be serviced more frequently due to the increase in wear and tear. Ease of serviceability is the key to decreasing down time for the kiosk owner.

Atech Flash Technology (AFT), one of the fastest growing digital card reader manufacturers has addressed this issue and is offering a Serviceable digital media reader. The EX-S3C has all the functions of a multi-card reader, but its main strength is its serviceability. It comes with a key specially designed to eject and remove the serviceable part of the reader. Replacing or updating the EX-S3C reader unit only takes a few minutes versus an hour or more using conventional card readers.

To keep things simple, the EX-S3C is based on the traditional 3.5 drive bay size so you can add this to your existing USB 3.0 enabled PC system or Kiosk System. Utilizing the USB 3.1 Gen 1 interface, it is the best solution for performance, reliability and value. This will also ensure compatibility or upgradeability for existing kiosk or computer systems.

EX-S3C has many great features that utilize today's latest technologies

- Retractable front cartridge for easy service
- 4 card slots to support all popular media cards
- Front USB-A port for USB flash drives
- Front USB-C port for USB flash drives
- Fits into standard 3.5" drive bay
- Pin-Protected CompactFlash socket design
- On-board Read/Write Firmware Switch
- Color Silkscreen for easy ID of media card slots
- Supports the latest high capacity cards like SDXC and UDMA
