*... because work is hard enough  
without hard floors ...*

**ComfortFLOW**

**ComfortFLOW**

# ComfortFLOW

We understand the problems you have ... complaints of sore legs ... sore backs ... hard floors ... slipping and tripping. You know that crippling feeling of numbness, pain, tiredness ... lack of motivation ... loss of productivity.

We've observed over the years that people will do anything to relieve the strain on their back and legs ... like standing on bits of old carpet or mats piled one on top of another ... bits of wood or even flattened cardboard boxes. At the best these are temporary solutions ... at the worst they are unsafe and hazardous, especially in your workplace where safety is essential.

*Do you know you have a responsibility by law to ensure "no harm is caused by hazardous stress and fatigue?"*

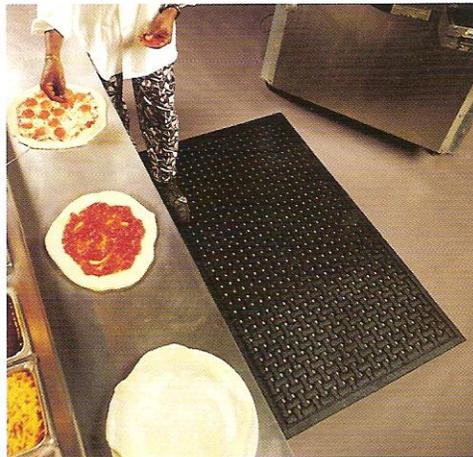

So it's good to know that you can fit out your entire business with mats that are both safe and specifically designed to relieve stress and fatigue for less than the cost of one single accident or claim on you for compensation.

### Unsafe substitutes will cost you money ...

Our customers have learned that the right mat in the right place will relieve fatigue and enhance safety. We can help you find the right mat for your business - and you will find morale and productivity will improve too!

### It's important then to choose the right mat ...

ComfortFLOW is your choice when you need a safe anti-fatigue mat that is oil and grease resistant. Nitrile rubber ... which is resistant to oil and grease ... is moulded into a unique anti-slip pattern for maximum traction. These qualities combine to give you an exceptionally light weight mat that is easy for you to move for cleaning and maintenance. ComfortFLOW can be used in wet and dry areas for anti-fatigue ... to give relief from sore legs and backs ... to improve worker comfort and morale. When ComfortFLOW is used in oily and greasy environments, regular cleaning with a mild detergent and water is necessary to maintain the anti-slip qualities and prolong mat life.

### ComfortFLOW specifications
