

SNUG 2019 Meeting Programme

Time Thursday	Person	Talk Title
9.00-9.30	Marc Stockwell	Quantification of Whisky Congeners by NMR Spectroscopy
9.30-10.00	Alan Smith	Probing the complexity of water disinfection by-products by ¹⁹ F-NMR
10.00-10.30	Ken Cameron	Fragment screening: New ¹⁹ F NMR capability at the Beatson
10.30-11.00	Coffee break	
11.00-11.30	Mark Nakasone	Lysine-48 linked polyubiquitin, solution NMR approaches for targeting a dynamic interface with small molecules
11.30-12.00	Annemette Kjeldsen	Dynamic studies and characterisation of small fluorescent proteins: Insights into LOV by NMR
12.00-12.30	Dusan Uhrin	SNUG business
Time Friday	Person	Talk Title
9.00-9.30	Claire Dickson	Slice-selective SHARPER for Reaction Monitoring
9.30-10.00	Elaine Adair	The semi-automated assignment of carbohydrate NMR spectra
10.00-10.30	Iain Lawson	Benchtop NMR: Applications for Students and Distillers
10.30-11.00	Coffee break	
11.00-11.30	Sihui Su	Molecular characterization of organosulfur compounds in cloud water from Hong Kong using FT-ICR MS
11.30-12.00	Gianluca Trifirò	Molecular characterization of raised an blanket bogs under restoration
12.00-12.30	Richard York	Characterising the Molecular Composition of Damaged and Restored Peatlands by Molecular Tagging and NMR Spectroscopy.
