

Welsh Masters Athletics Association

Notes for the website of the General Committee Meeting held on 26 September 2018 at Cardiff

Track & Field meetings

There were very detailed discussions on progress for the draft 2019 programme. It was still expected to have an Indoor Championship, an Outdoor Championship, and four league meetings (Swansea, Cardiff, Newport, Cardiff) plus a meeting at Wrexham. The Secretary was given final action points for reservations, etc.

Draft dates had to be with Welsh Athletics to formalise the programme with those of all the other clubs shortly to ensure there were no clashes and there were sufficient officials available for the events. Welsh Athletics holds a meeting in November for this purpose, at which WMAA would be represented by Mel James.

Cross Country and Road events

The British and Irish Masters Cross Country International Meeting arrangements were still going well (17 November in Singleton Park, Swansea). Committee members volunteered for various tasks on and before the day. Assistance was also coming from the University and Swansea Harriers. Closing dates and the Welsh selection process are on the BMAF website – there are only a few days to go!

BMAF

Malaga had been very successful for the British team, and in particular the Welsh athletes had been particularly strong. (All the details are elsewhere on this website – with particular thanks to Chris Pruski and Roger Garland for their work on this editorial and photographs.)

The BMAF Outdoor Championships were scheduled to take place 17-18 August 2019 at Birmingham.

Power of 10

Chris Pruski had identified that Power of 10 had not identified the Welsh Masters Championships separately on its website, and that positions in events were those for the location and not the two Masters Clubs, Midland and Welsh. He was going to continue to work with Power of 10 to separate the information and try to get the results corrected.

All athletes were asked to check their details on the BMAF website, and that their Welsh Masters club membership was recorded. In this way Welsh Masters' athletes would be properly accredited with their success.
