## TECHNICAL INFORMATION

### OPERATING VIEW MODE

In view mode the indicator displays the values of the quantities defined on the display list; it may view 1, 2 or 3 data for screen.

### S401 OLED DISPLAY

The S401 is the new standard for indication with OLED display. Why use an expensive HMI when the S401 will perform many of the same functions for a lower cost.

The S401 has a very bright display of 70 cd/m2 with a very high 128 x 64 pixel definition. The display also has a space saving design with dimensions of 96x48mm. It displays up to 30 measurements (float, integer, Boolean) and programming is possible via software or front key menu. Another advantage is reduced cabling with two RS485 MODBUS interfaces.
