Amcor St Regis Bates chooses OFS

MELBOURNE, VICTORIA, 3 December 2012 - Operations Feedback (OFS) a leading provider of real time productivity improvement software products, announced today that it has been selected by Amcor St Regis Bates for the provision of the core OFS suite across all production lines in its Australian facilities.

OFS Operator software and Analytics suite will be configured to provide valuable, real time information on both the Bottomer and Tubing production processes that form part of paper sack production.

“We selected OFS because their product was a perfect fit for our business, and we believe that it will be fundamental in helping us achieve sustained productivity improvement across our sites here in Australia”, said Mr. Michael Rochford, Group Operations Manager. “Eliminating manual processes, giving us real time access to production information that we can actually understand, and integration with our other systems was a must and in OFS we have found the solution.”

“We are delighted to commence a working relationship with Amcor St Regis Bates. Throughout the process thus far we have seen a business that is striving to improve and understands the importance of innovation and technology in a manufacturing environment”, said Mr. James Magee, National Sales Manager for OFS. “We have a long history of success stories in the packaging industry, where our software has continuously been applied for many years to driving real step-changes in efficiency, and we are certain this trend will continue with Amcor St Regis Bates”.

About Amcor St Regis Bates:

Amcor St Regis Bates is a division of Amcor, the world’s largest packaging company and supplies multi-wall sacks to major organisations across Australia and New Zealand supporting a broad range of dry powder and granular markets. The breadth of the St Regis Bates product range means allows for tailored packaging solution for products ranging from 1kg to 3,000 kg.

About OFS (Operations Feedback):

OFS is an Australian company specialising in productivity and efficiency improvement (OEE) software for the manufacturing industry. Over 2,500 operators are using OFS technologies in several industries: printing, packaging, labelling, cereals, confectionary, beverage, chemical, blow moulding, pharmaceutical and more. Customers of OFS include Heinz, Labelmakers, Visy, Brickwood Holdings, Murray Goulburn, Sanitarium, Amcor, HB Fuller, Food Plastics, Kraft/Cadbury, PACT Group and Golden Circle.
