

Healthy solutions for the **healthcare industry**

We **take care** of the **products** that **take care** of **people**

The reliable delivery of healthcare products can be lifesaving. At DB Schenker we take this responsibility seriously. We have developed industry specific solutions to ensure that your sensitive healthcare freight is delivered safely, securely, within compliance and on time – worldwide.

DB Schenker Logistics and DB Schenker Rail generated total revenues of approximately 20.3 billion euros with around 96,000 employees at 2,000 locations in more than 140 countries all over the world in the fiscal year 2014. Both business units combine the transport and logistics activities of Deutsche Bahn AG.

Where healthcare quality is your top concern, outstanding logistical service is ours. Having to deal with special healthcare products, you require specialized solutions from your logistic provider. DB Schenker Logistics is the right partner to provide the link between you and your customers to meet the special requirements of healthcare logistics.

contract logistics*

We make the wheels roll –
all **around the globe**

Companies in the healthcare sector are confronted with a constantly changing environment. With our innovative and integrated solutions we can react flexibly to all requirements from pharmaceutical and biotech companies as well as medical device manufacturers.

Damaged products or medicines not maintained within required temperature ranges can quickly cause life-threatening situations, so we know reliability is crucial in transporting healthcare products. The DB Schenker supply chain solution ensures that time and temperature sensitive products reach their destination safely and securely.

We safeguard the integrity of your product with special handling and monitoring, including complete traceability of shipments, closed cold chain solutions for biological drugs and compliance with all legal regulations. We also establish quality management systems and apply industry standards such as GDP or USP 1079.

The DB Schenker global network integrates ocean, air and land transport as well as contract logistics. So we can react immediately to any change in your distribution needs and market channels to offer you customized and cost-effective end-to-end solutions for your supply chain. We can ensure your product launches are globally successful.

Your lifeline

to integrated supply chain logistics

The Vertical Market Healthcare is about:

- Pharmaceuticals
- Diagnostics
- Biopharmaceuticals
- Medical Devices
- Raw Materials
- Health Supplements
- Biotechnologies

The Vertical Market Healthcare deals with special demands:

- Regulatory Requirements: Licensing, Audits

Keeping **your supply chain** in good health

We treat your products as if they are our own.

More than ever, medical devices are highly sophisticated and are being transported and stored by our experts with the highest safety and accuracy.

Within our regional distribution centers we manage the execution of your supply chain, offering operational, administrative support and services such as the Production Vender Management Inventory.

Production VMI is our just-in-time concept with competencies that include material management, inventory ownership, end-to-end visibility and a global 24/7 customer service center.

We understand the special treatment required for medical devices and the importance of quality services (GDP/GMP, TAPA certificates) and our expert teams all contribute to keeping your medical devices in perfect condition throughout the supply chain.

The importance of having the required products in stock and delivering them securely can never be underestimated.

We aim to fully satisfy customer requirements, so our warehouses are tailored to your needs and we offer various value adding services, including: relabeling, batch sampling and even last mile distribution to pharmacies or hospitals in some key markets.

Our core capabilities include:

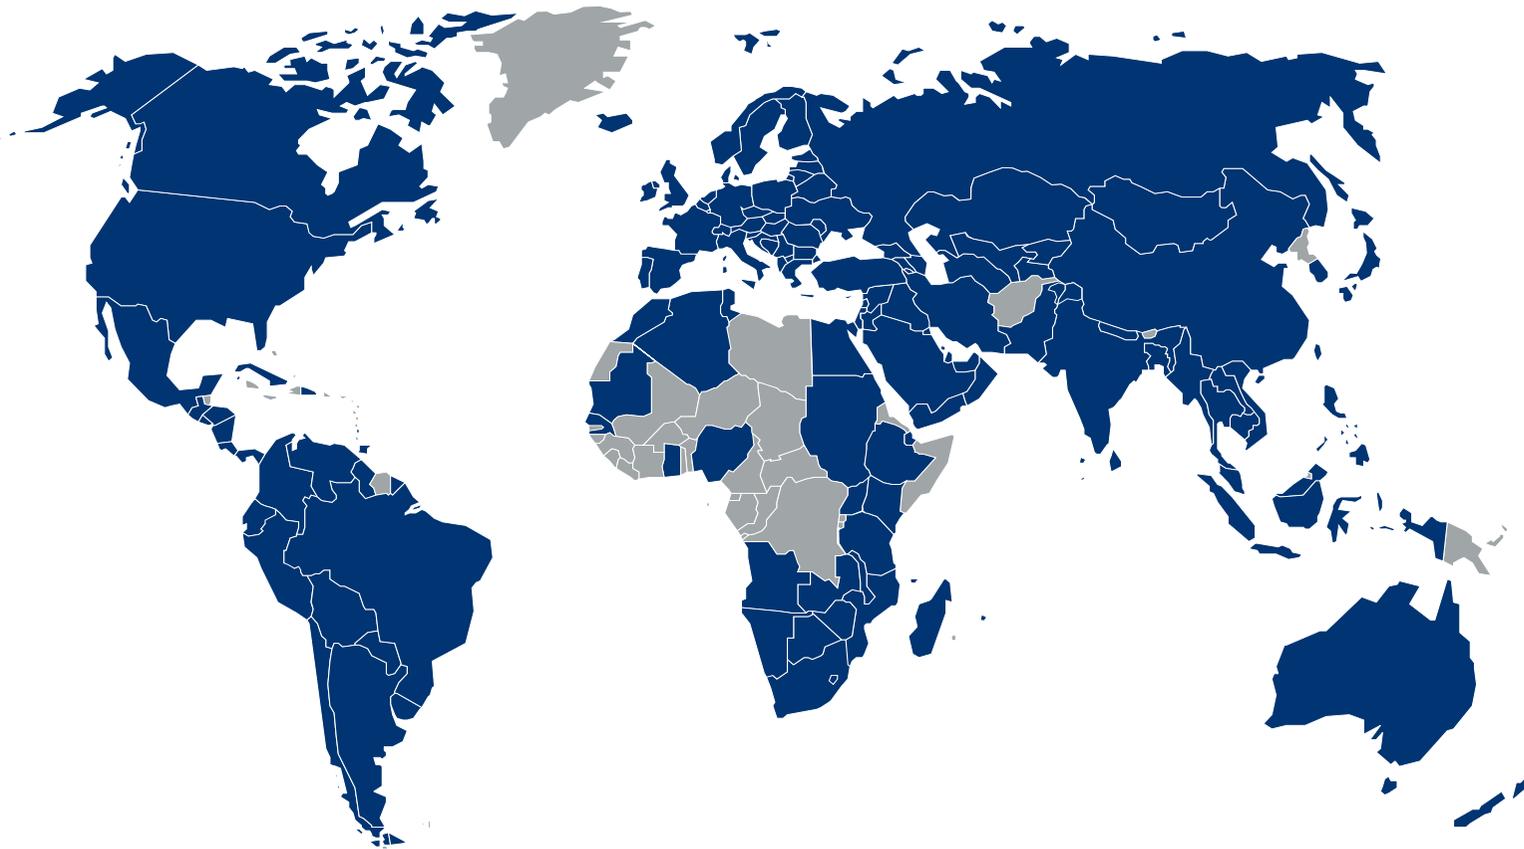

- Quality Certificates (QEHS/ISO, TAPA, C-TPAT)
- Cold Chain Solutions (i.e. Chilled Room, GPS Equipped Ocean Containers)
- Security solutions (CCTV, Security Guards, Alarm System & Access Control)
- Key Healthcare Certificates (GDP,GMP)
- Approved Healthcare Warehouse Facilities
- End-to-End Traceability

For us healthcare logistics is not just about moving boxes. At DB Schenker we always keep in mind that eventually every product that we handle could end up in a human body.
