This Guide is published by Círculos de Amigas, a breast health program for the Latino community in Southwestern Pennsylvania, sponsored by the YWCA Greater Pittsburgh and Magee Womancare International. Círculos de Amigas is funded by Susan G. Komen for the Cure Pittsburgh Affiliate.

Thank you to all of our volunteer Promotoras and partners who made this guide and Círculos de Amigas a success!

## Círculos de Amigas

Círculos de Amigas is a bilingual breast health program for the Southwestern Pennsylvania Latino Community. This program, a collaboration between the YWCA Greater Pittsburgh and Magee Womancare International, includes the following:

**Promotoras** - Promotoras, or community health volunteers, provide breast health education in the community and support women in taking care of their breast health.

**Bilingual Breast Helpline** - The Círculos de Amigas Breast Helpline assists insured and uninsured women navigate the breast health system, obtain free or low-cost mammograms and clinical breast exams, and provides support throughout the screening, diagnostic and treatment periods.

**Breast Helpline:** 412-365-1915

**Group Mammogram Appointments** - Group mammogram appointments are a time where women can get a mammogram at the same time as a friend or family member, with the help of an interpreter. These appointments take place multiple times throughout the year at Magee Womens Hospital.

**Breast Health Fairs** – Large breast health fairs are a chance for women to come together and learn more about breast health, while celebrating their health and fellowship.

For more information, contact the YWCA Greater Pittsburgh:  
412-365-1915

## Community Health Centers

**Community Health Centers** offer health services for children, adults, and seniors. Each of these health centers offer a Sliding Fee Scale for anybody without insurance. A Sliding Fee Scale clinic provides discounts on medical appointments, testing and medication based on your family income. If a health center does not have a Spanish-speaking doctor, you have the right to request an interpreter.
