

# COMPANY PROFILE

*Duncan Meerding Design is a small-scale Australian owned furniture and lighting practice based in Hobart, Tasmania.*

With less than 5% sight remaining, Duncan's designs reflect the alternate sensory world in which he presides. Our furniture and lighting focuses on the beauty of form and the tactile nature of the materials from which they are shaped, embracing the natural characteristics of the timber.

Sustainability and a focus on the environment are present in every step of our process. The majority of timber is sourced either from waste materials or else from faster growing robust timber varieties. Marrying traditional, hand-made techniques with modern manufacturing technologies, small-scale production ensures that each object is built to last. All items are designed and produced in Tasmania, keeping in mind sustainability and social responsibility through out the whole process.

**General information:** All items are for dry indoor use only unless otherwise specified. We recommend using no greater than 15 watt compact fluorescent energy saving bulbs in our Edison style fittings.

## SPIRAL 180 PENDANT LIGHT

Made from Hoop Pine plywood

**Includes:** 1.5 metre cord, brushed aluminium ceiling rose and Edison (E27) style light fixture ready for wiring by a licensed electrician
