To Whom It May Concern:

I would like to recommend Mark Sequin and his "Active Shooter Training." Last week we had Mark in our church to teach his hour-long seminar on safety. The presentation was first class in every way. The content was dealing with the frightening scenario of having a shooter enter your workplace, but the material was neither gory nor sensational. Instead, it was an hour packed full of good information that left our people feeling more secure.

Mark was personal and professional in his delivery and he included well-received bits of humor as he connected with our audience. Our people left up beat and encouraged. I have had many positive comments about how much they loved the program and how they found it helpful.

I highly recommend Mark to your organization if you are seeking to increase the peace of mind and safety of your workers or church and synagogue.

Yours truly,

Kim Beckham
