

Easy Auditor

Product Datasheet

Easy Auditor is a software module that allows you to easily audit for compliance, security or day to day operations. The only real-time auditor solution for Scale out NAS. “No lag” auditing!!!

Superna Eyeglass©

Easy Auditor

The Easy Auditor module simplifies and lowers the cost of auditing and protecting file system data. It introduces real-time auditing features to enable proactive protection of data with automated responses to security events leveraging SnapshotIQ snapshots and user data access lockout. In addition to real-time auditing, traditional reporting and search of audit data using simple search, scheduled queries and pre-built reports.

Key Features

1. Real-time auditing features Per user mass file delete detection, alerting, and file system protection with snapshots
2. Data Loss Prevention detection,

alerting, and prevention of bulk data copy of sensitive data

3. Wiretap

- a. Real-time user access decoded by file action
- b. Monitor the file system activity by user or by path
- c. Monitor application workflows, performance issues, security events based on the sequence of file actions

4. “Where did my folder go?”

- a. Accelerates locating and data recovery from “lost” data caused by users drag and drop of NAS folders
- b. Tracks directory renames by user ID to identify lost data current location and previous location

5. Provides scheduled and on-demand file audit reports Stale data access

- a. Excessive user share

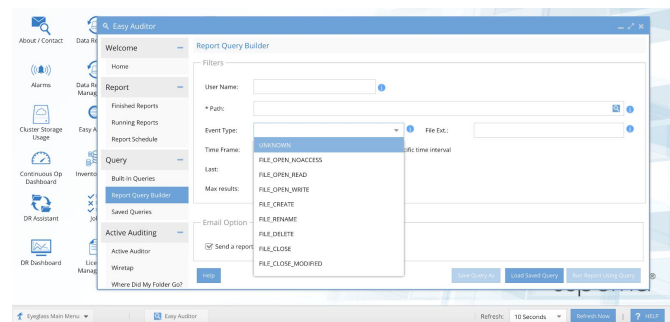

Easy Auditor

Product Datasheet

Easy Auditor is a software module that allows you to easily audit for compliance, security or day to day operations. The only real-time auditor solution for Scale out NAS. “No lag” auditing!!!

- permissions
 - b. Top user access (create, delete)
- 6. Scalability features for Scale Out NAS Reduced auditing costs with the ability to store billions of audit events stored with inline compression
- 7. Supports Isilon storage for cost effective long term retention of all audit events without loss of audit granularity leveraging Isilon HDFS protocol
- 8. Protection of audit data using Isilon SyncIQ, SnapshotIQ, Smartlock and Superna Eyeglass DR capabilities
