Noratel and Plitron are leading manufacturers of high-quality customized transformers and wound components.

**OUR PHILOSOPHY**
To provide the highest levels of service, product availability, superior engineering and most importantly overall reliability.

**El Laminated Magnetics**
**Transformers/Inductors/Chokes/Reactors and Impedance Bonds**

**Transformers Single and 3 Phase**
Dry type transformers from 5kVA to 2000kVA, with voltage class from 600V to 15kV.

Low Voltage up to 1kV and high voltage up to 12kV

**Water Cooled Solutions**
Direct and Indirect cooled transformers and chokes

**High Frequency Power Magnetics**
Ferrite, Amorphous and other cores in various topologies

**Inductors, Reactors & Chokes**
Iron Core, Air Core, Toroidal

**Impedance Bonds**
Tuned/Untuned, Audio Frequency, WEE/ZEE, Mini

---

**Automation**  **Mobility**  **Medical**  **Motor Drives**  **Renewable: Wind & Sun Energy**

All Facilities are ISO 9001 Certified.
Toroidal Power Products Both Single Phase and three phase

- 25VA to 35kVA 50/60Hz up to 600V
- 25VA to 250kVA 400Hz up to 600V
- Current transformers designed and built to IEEE C57.13 standard
- Created and developed, low in rush, low stray field, low noise and narrow band technologies

- North American production is focused on products for transportation and “Made in America” compliance, special designs, and quick turn-around (local manufacturing in Carson, California, USA & Toronto, Canada)
- Global Manufacturing and Supply from our own facilities from China, India, Sri Lanka and Poland
- Over 90 years of experience designing and manufacturing transformers, inductors and other magnetic components
- More than 2000 employees
- 80% custom designed products
