

MR BOB CHATTERJEE
MBBS MRCS
MSC (DISTINCTION)
FRCS (TR&ORTH)
Consultant Spinal Surgeon

Specialising in both the latest 'keyhole' techniques in spinal surgery and pioneering non-fusion surgery for low back disorders.

Mr Chatterjee is a firm believer that his patients should not only understand their backs but also be aware of all their treatment options. Keen to explore non-surgical options where appropriate, he works with outstanding physiotherapists, osteopaths, chiropractors, naturopaths and pain management specialists in a team-based approach to find the right solutions. A spinal adviser to NHS, he is also a tutor for minimally invasive spinal surgery.
