Use a 1/4" seam allowance throughout.

Step: 1

Trim the selvage off of all fabrics. Cut each fabric piece into (8) 5-1/4" strips following the first diagram below. For the baby size quilt, cut each fat quarter into (4) 5-1/4" strips following the second diagram below.

Throw, Twin, Double,
Queen and King

Cutting Diagram:
Baby

Step: 2

Randomly sew all of the strips together, short end to short end, into one very long strip. Be careful to sew all directional fabric so they are going the same direction.

Step: 3

Refer to the chart below and cut the long strip from Step 2 into the length and quantity listed for the size of quilt you are making. For example, if you are making a throw size quilt, cut the long strip into 14 strips that are each 58" long.

Quilt Size	Cut Strip Length	Number of Strips in Quilt
Baby	50"	8
Throw	58"	14
Twin	83"	12
Double	90"	15
Queen	96"	17
King	98"	21

Step: 4

Sew the long edges of the strips from Step 3 together to form the quilt. Choose the pieces randomly and try not to overthink the layout! Baste, quilt and bind as desired.
