

**The SimSim Case**

SimSim?  
A Simulated Simulation!  
And...  
It's in a Case!

The SimSim Case is here  
to help you gain  
a better understanding of  
Human Factors in the  
Operating Theatre

It helps you explore:  
Pre-Case Briefings  
Team Constructs  
Communication Pathways...

Task Segregation  
Task Succession  
Traffic Flows,  
Egress and Access

Leadership  
Fluxing Leadership  
Redundance  
Team Restoration  
Debriefing

Things don't just happen  
by accident....  
except accidents!

For example, there's  
...Who DOES what...  
The Airway Team  
The Line Insertion Team  
The Critical Bleeding Team

Then there's  
...Who GOES for what...  
Difficult Intubation Trolley  
Defib  
ABG's

It's pretty cool  
when a complex case  
comes together....

...because a great team  
has worked well together  
from a well constructed  
game plan...

That's Human Factors:  
Getting 'what we know'  
delivered into action  
in the best way possible.  
The End.
