Sir/Mam

PROCESS TO QUALIFICATIONS QUALIFICATIONS	TO EXPIRE/DEACTIVATE REPLACED BY	HISTORICALLY REGISTERED	REGISTERED OCCUPATIONAL
---	---	------------------------------------	------------------------------------

The above-mentioned subject refers.

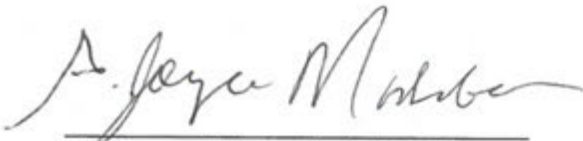

The Quality Council for Trades and Occupations (QCTO) on its Occupational Qualifications Sub-Framework (OQSF) of the National Qualifications Framework (NQF) has developed and registered almost 143 Occupational Qualifications with South African Qualifications Authority (SAQA).

The registered Occupational Qualifications replace Historically Registered Qualifications on the OQSF which the QCTO refers to as Unit Standard Based Qualifications, NATED Report 190/1 Part Qualifications and Provider Based Qualifications. Historically Registered Qualifications that will be replaced by registered Occupational Qualifications will be deactivated on the 30.06.2018. A list of registered Occupational Qualifications, with Historically Registered Qualifications that will be replaced, is attached as **Annexure A**.

It has to be noted that Historically Registered Qualifications that get deactivated on the 30.06.2018 will still have enrolment of learners up to the 30.06.2019 (Last date of learner enrolment) as well as have learner achievement up to 30.06.2022. The process plan to deactivate Historically Registered Qualifications is attached as **Annexure B**.

The QCTO further invites you to submit any objection that you possibly may have in the implementation of this process. Kindly submit your objection to TM Lata or LL Mabunda email addresses Lata.T@qcto.org.za or MabundaLL@qcto.org.za respectively or post/hand deliver to 256 Glyn Street, Hatfield in Pretoria before the 30 March 2017.

Regards

G. Joyce Mashabela (CEO)

Date: 20 Feb 2017

CC: SAQA CEO

GUIDELINESS AND MANAGEMENT PLAN TO EXPIRE HISTORICALLY REGISTERED QUALIFICATIONS THAT ARE REPLACED BY OCCUPATIONAL QUALIFICATIONS

ANNEXURE B

1. Introduction and Purpose

The Quality Council for Trades and Occupations (QCTO) was established to develop Occupational Qualifications that will be nationally utilised and address a number of challenges in the education and training sectors. The QCTO has so far developed more than 100 Occupational Qualifications and registered these on the Occupational Qualifications Sub-Framework (OQSF) of the National Qualifications Framework (NQF). During the development of the Occupational Qualifications, Historically Registered Qualifications that relate to that specific Occupational Qualification were identified and used as part of developing the Occupational Qualifications. This process included Learning Programmes, Skills Programmes and Unit Standards that were linked to a Qualification or Qualifications.

The purpose of the guidelines is to share a plan to expire all Historically Registered Qualifications that were identified during the development of Occupational Qualifications. This will also ensure that Occupational Qualifications receive prominence and Historically Registered Qualifications are steadily deactivated.

2. Legal Framework

The Skills Development Act (SDA) and the NQF Act mandate the QCTO to develop qualifications or part qualifications that are necessary for the sector and recommend qualifications or part qualifications to the South African Qualifications Authority (SAQA) for registration. These acts also state that the Quality Councils ensure that the NQF is simplified.

It is within the above mentioned legal framework that the QCTO is deactivating Historically Registered Qualifications that have been replaced by Occupational Qualifications. If this is not done the duplication of qualifications that are populated in the OQSF will be exacerbated and a risk of not using the Occupational Qualifications will be high.

3. Discussion

The model used to develop Occupational Qualifications takes cognisance of Historically Registered Qualifications as when developing an Occupational Qualification all Historically Registered Qualifications relating to the Occupational Qualification are used.

A process had to be established that will ensure that the deactivation process is managed in a controllable way as the introduction of the new qualifications is brought in.

4. Management Plan

The QCTO has developed a plan to deactivate Historically Registered Qualifications and the plan will be communicated to all stakeholders as well as through print media.

The Management Plan is as follows:

Activity	Objective	Responsibility	Due Date
Draft and Forward a letter to Stakeholders on deactivation of Historically Registered Qualifications.	To inform Stakeholders about deactivation of Historically Registered Qualifications.	QCTO	March 2017
Await feedback from Stakeholders	To allow Stakeholders to respond to the deactivation of Historically Registered Qualifications.	Stakeholders	April 2017
Place on Gazette and Print Media the Historically Registered Qualifications that will be deregistered	To ensure that the information on deactivation is disseminated to the Stakeholders.	QCTO	May 2017
Process queries received during the publishing of the Gazette	To ensure that Stakeholders that forwarded queries are contacted and their queries resolved.	QCTO	June – July 2017
Deactivate Historically Registered Qualifications replaced by Occupational Qualifications	To simplify the NQF	QCTO	30 March 2018
Monitor the phase in / phase out process	To ensure that from 1 st July 2019 new learner enrolments are only on Occupational Qualifications	QCTO	From January 2019 and ongoing
