

**WHEN MISSION IS ABOVE ALL**

**OVERVIEW**

FLYING PRODUCTION LTD. specializes in design, development, implementation and life cycle support of advanced unmanned aerial vehicles/systems (UAS) and the full-range of support systems/equipment that guarantee their optimal operation. Founded in 2011, FLYING PRODUCTION LTD. has established a reputation for excellence as a provider of aerial solutions in the field of mini UAS applications.

**OUR VISION**

To Provide Comprehensive Solutions, Optimized to Market Requirements

The company entered the market of power-craft (multi-rotors) platforms in order to provide services and solutions to private commercial markets, homeland security and military applications. After gaining extensive experience using available products on the market, we found them to be inadequate for the market's needs. This resulted in a management decision to design new platforms optimized to market requirements.

## **YEARS OF OPERATIONAL EXPERIENCE**

Based on the accumulated experience and operational know-how and qualification of our employees, with a management comprised of leading figures from Israel's defense sector, we have developed a close, ongoing relationship with our customers. This relationship provides a strong testimonial to both our product quality and commitment to customer satisfaction. Combined with the technology leadership of our products, this know-how and experience enables FLYING PRODUCTION LTD. to provide not only the most suitable technology and equipment but also to advise where, when and how the specified equipment should best be deployed.

### ***WHEN IT COMES TO UNMANNED SYSTEMS, WE HAVE IT ALL***

Specializing in a wide range of advanced technologies, the company's expertise ranges from unmanned hovering aerial vehicles, through command and control systems, to various payload solutions.

**Main products include:**

Da-Vinci VTOL sUAS, a low altitude multi-rotor platform

Control software for Unmanned Platforms

Various MIL-STD Payloads (EO/IR, Cyber and more)

Command and Control systems

**PROPULSION REDUNDANCY** LONG RANGE MISSION CAPABILITY  
 ENCRYPTED COMMUNICATION ADVANCED TECHNOLOGY  
**COMBAT PROVEN**  
 ENDURANCE

**MAIN ADVANTAGES**

- Long range mission capabilities – 10KM
- Advanced encrypted communication capabilities
- Extreme flight time endurance
- Unique drone/payload weight ratio

**MAIN APPLICATIONS**

- Aerial Reconnaissance
- Military and Para-military operations
- Special forces operations
- Urban operations
- Pre operations terrain / area 3D footage
- Low altitude observations
- Border patrol
- Hostage situations
- BDA
- Search and Rescue [SAR]
- Law Enforcement

**Placing an Emphasis on Customer Support**

Fully dedicated to customer service and rapid response to customer needs, FLYING PRODUCTION LTD. offers comprehensive training, operational and support services to both military and commercial customers in Israel and abroad.
