

Margie Strite is a Community Development Specialist at Microsoft. As part of her work with small business customers, she trains businesses on technology and keeping their business safe.

The importance of cybersecurity for business is increasing with the rise of modern and targeted threats. Understanding cybersecurity can help small and medium businesses stay safe in today's growing and changing security threat landscape.

In this event, you will gain deeper insight into the cybercrime marketplace and learn about cybercriminal categories and crime ware kits. You'll also gain valuable insight about your business's cybersecurity needs through an interactive risk assessment and learn five ways to defend your business from cybercrime.
