Since its creation in 1978, Diesel has evolved from being a leading pioneer in denim, into a premium, international, lifestyle company. After the brand's success in furnishings, Diesel Living has teamed up with Iris Ceramica to create an industrial and metropolitan inspired range of porcelain tiles. From subway tiles to solid concrete look and mixed textures they give a moody, urban feel to a space. Tile Space is excited to bring the range into New Zealand, available to view at all Tile Space stores and 32 re-sellers nationwide.
