

Dundee and Angus College Course Options

Senior phase pupils who have opted to do courses at Dundee and Angus College normally use the end of the summer term to register with the college and to make a start on their chosen courses. As a result of the Coronavirus pandemic, arrangements this year are slightly different.

D&A College has established a way to connect with pupils via their Glow e-mails to enable them to register with the college and there will be a range of learning materials for them to access via Microsoft Teams once they are registered. All pupils will receive an email directly from the college with instructions on how to register. The aim is for learning materials to be available to all pupils from Monday 1st June.

The learning resources which will be available remotely (via Teams) will aim to achieve the same goal, with content covering:

- Introduction to D&A college and resources available to pupils
- A digital learning module
- Access to on-line Future Talent resources / modules (covering areas like study skills and employability)
- Subject specific content according to course chosen

All pupils who have chosen a college course should check their Glow email regularly and follow the instructions when they have been sent out by Dundee and Angus College.
