## 1. EXECUTIVE SUMMARY

Have you ever thought of owning some shares of the world's biggest tech companies such as Apple, HP, IBM, Amazon, Microsoft, Google, Intel and others? We can make it happen even just for one share.

RealXoin or RXE can make it happen for the masses as we plan to launch an ICO of our tokens with the funds received for the purpose of investing solely into the biggest tech shares and the most promising start-ups in the real world, thus creating the intrinsic value to back RealXoin as an asset of the future. However for the moment the Pre ICO and ICO tokens which are for sale cannot be deemed as a security.

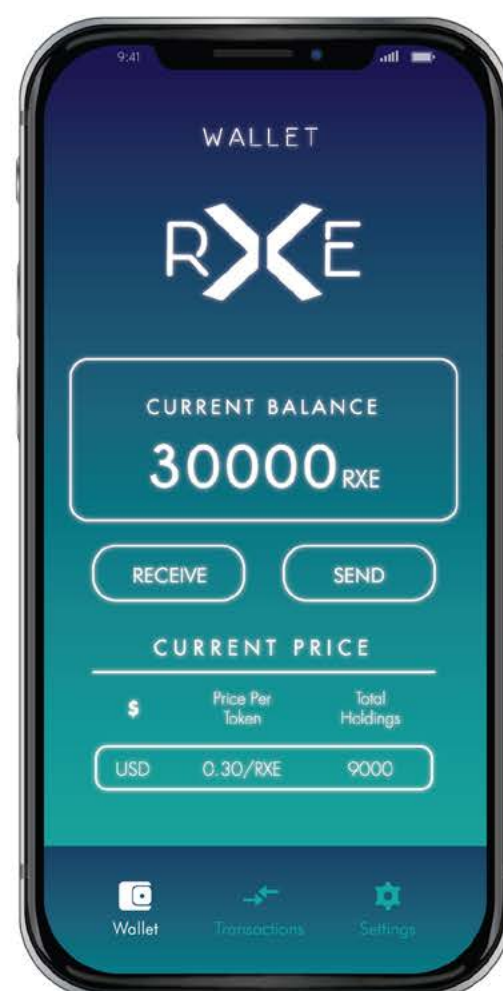

The world is rapidly changing, cryptocurrency and blockchain, with the decentralised system is renewing the financial landscapes of communities and nations, opening doors and opportunities.

As for the digital world of RXE we will be developing using Ethereum blockchain to create crypto/ digital applications to position ourselves as a Fintech company.

## 2. THE CURRENT LANDSCAPE

### RealXoin Smart Trader App RX11

RealXoin Technology will launch this app the very moment is listed in the exchange. The benefit of this app is to give power of trading of all the tech shares that we own to the holder of RXE.

It will be even more exciting as RXE tokens too are traded simultaneously.

RXE can be use to buy and sell and keep, the real world shares of all the tech companies which we have a link and associated with. You can choose to buy and sell the shares any time you like in accordance to our real time telecast in our website and app.

### About The RealXoin Crypto Exchange

#### Key features

The RealXoin Crypto Exchange planned to function as a transparent audit-able ledger such that participants will be registered holders of RXE at every stage of the trading process.

This is by virtue of utilising the record-keeping functionality for the benefit of the exchange, issuers, the participants and regulators alike.

The RealXoin Crypto Exchange is expected to provide access to the capital markets for a wide variety of issuers and participants including :-

- (a) traditional and non-traditional counterparts including global conglomerates, institutional licensees, operating companies, family businesses, investment vehicles and family offices; and
- (b) participants who can trade within the RealXoin Crypto Exchange marketplace and build investment portfolios with confidence and without the layers of intermediaries, barriers to entry, and cost associated with traditional markets. This has the potential to give participants access to a spectrum of investments, capital, and/or income generating assets that might not otherwise be possible in the same manner and to the same degree under a traditional stock exchange model.

With the adoption of the blockchain-based trading system, the RealXoin Crypto Exchange will dramatically boost efficiencies whilst reducing costs by integrating the entire spectrum of exchange services including, but not limited to, listing, execution, clearing, settlement, AML/ KYC controls and processes, security, digital identity management and custody.

## Timing and Progress

We aim to be able to list RXE by Q3 2018, while employing a blockchain-based trading system for by Q1 2019. We are already in the design phase of a blockchain-based trading system that will be able to offer all the benefits and effectiveness of RealXoin.

In Q2 2019 RealXoin Technologies will partner with MND JSC to acquire a Gold Mine license in Mongolia with a minimum inferred gold resource of at least 50 tons of gold, under exploration status or X license Exploration drills begin to indicate actual gold resource.

## Opportunities for RXE for Collaboration

RealXoin Crypto Exchange aims to open up new markets and create new opportunities for collaboration. It will also serve as the next destination point for tokens listed on this exchange. As the token issuers of this exchange listings grow in their business, they may apply to list token on this exchange and get further access to capital raising opportunities.

Issuers that are listed on the RealXoin Crypto Exchange will receive fast-track access, with faster processing times, to list security tokens on this exchange, giving more options to raise capital. They will also have access to a more diverse investor base as they grow including possible dual listing opportunities on other cryptocurrency exchanges.

## Status and Future for Gold Market

Text | Reuters

“We expect Asian countries such as Indonesia, Mongolia and China to contribute to gains in the current year, accompanied by Russia, Australia and Canada.”

LONDON (Reuters) - Gold in 2018 will deliver its strongest annual price performance in five years, GFMS analysts forecast on Tuesday, as political uncertainty drives investment in bars and bullion-backed investment funds.

The GFMS metals research team, a unit of Thomson Reuters, predicted gold would average \$1,360 an ounce this year, up 8 percent from 2017, with some short-term moves towards \$1,500.

The team expected demand by exchange traded funds (ETFs) to rebound this year to 350 tonnes.

“Retail investment is forecast to rise in 2018 following four consecutive years of declines, thanks to a pick-up in bar demand, supported by improving sentiment towards gold and rising price expectations,” GFMS said.

Adding to the bullish picture, the Chinese central bank was expected to resume purchases, GFMS said, leading to a rise in net official sector demand this year to more than 400 tonnes for the first time since 2015. The Chinese central bank, once a major buyer of gold, has not reported any additions to its reserves since October 2016.

ETF demand totalled 177 tonnes last year, GFMS said, while physical gold demand, including buying of jewelry, coins and bars, rose 10 percent, its first annual increase since 2013.

Gold Price Has Crushed the Market more than 2:1 So Far this Century

That was driven by a 13 percent climb in jewelry fabrication, its first annual rise since 2013, with demand in the world's second largest consumer India particularly strong before the implementation of a new tax regime mid-year. Global bar demand was expected to rise 1 percent, recovering after falling for four years in a row, while coin demand was forecast to remain subdued after falling in 2017 to its weakest since 2007, GFMS said.

"The continual increase in the gold price has kept bargain hunters on the sideline, as coin investors are usually the most price sensitive in the market," it said.

"The improving sentiment over the economic outlook, particularly in the United States, have investors less interested in gold coins as their risk appetite increased."

In 2018, the team said it expected mine output to hit a record 3,265 tonnes.

## RXE as The Financier into Gold Mine in Mongolia

Come April 2019, RXE will be the token to finance RealXoin Technologies into the copper and gold mine in Mongolia. This is only natural as RealXoin will be operating RealXoin Crypto Exchange, the cryptocurrency exchange in Mongolia by then.

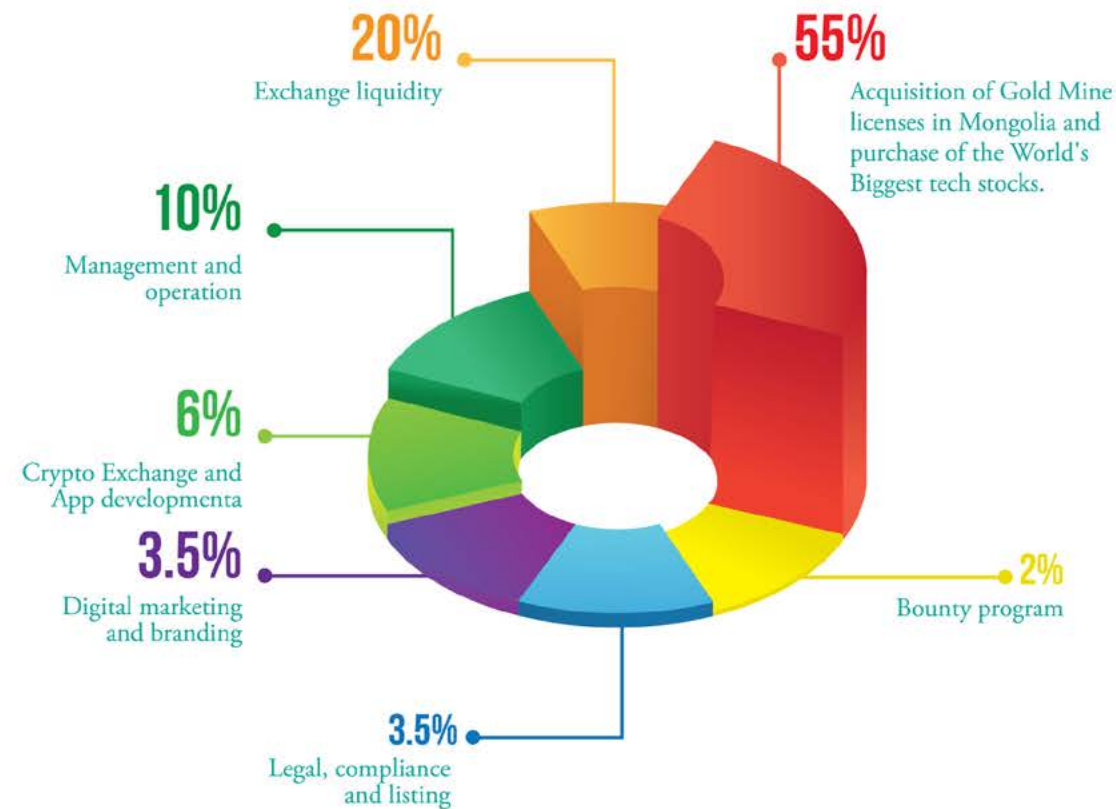

Why Mongolia? Mongolia is a country which is well known for its mineral resources. The world's largest open pit and underground gold-copper mine can be found in Mongolia, the Oyu Tolgoi mine, own and developed by the Rio Tinto Group and the Mongolian government. Mongolia is next-door neighbor to China, the world's No.1 copper consumer and RXE will have its presence

at the centre of one of the world's greatest prospects. The mining industry in Mongolia accounts for 65% of Mongolia's Gross Industrial Production and 88% of its exports. With the era of electric cars production on a big scale, copper will be a highly demand resource worldwide as electric cars uses lots of copper and gold will still be an investment of preference traditionally and growing.

The price of gold will rise to USD 1800/ ounce by 2020 as many have forecast. It may even reach USD 2000/ ounce by 2021. The last time gold price hit USD 1800/ ounce was in 2012. The cycle will be back.

The total funds raise from this exercise will be allocated as Such:-

#### Funds Allocation

RealXoin will once again partner MND JSC to acquire gold-copper mine asset of license X in Mongolia with a minimum inferred gold resource of 50 tons or 1,600,000 ounce. The market value if base on a conservative USD 1500/ounce will be worth USD 2.4 billion. This is only the gold resource and not included the copper resource. The target timeline will be April 2019. Exploration drill will begin in May 2019 and a full JORC report will be expected to be completed in July 2019. Subsequently the work process will be the conversion of the license of the mining asset from X to A for mining operation.

After that will be the calling for tender and partnership with an experience mining contractor and to form a Joint Management Committee and Security to develop the gold-copper mine. Mining of gold-copper operation is expected to begin in March 2020.

## Status & and Future of Copper Market

Text | Investing Haven

The price of copper performed very well this year. One year ago we released our Copper Price Forecast 2017 in which we identified \$2.10 as the line in the sand: "as long as the copper price remains above \$2.10 we believe the price of copper will go higher or stabilize in 2017." So what where does the copper market stand right now, and what is InvestingHaven's copper price forecast for 2018?

The pattern we see on copper's chart which is the basis for our copper price forecast 2018: a wide gap between \$3 and \$4. Yes, correct, we believe that copper will rise to \$4 in 2018, provided of course that \$3 holds strong.

“When it comes to the price of copper in 2018 we see a very interesting pattern on copper's chart. In sum, copper looks strong, and we stick to our belief that \$3/lb was a very important price level.”

#### Copper - Continuous Contract (EOD) CME 15 DEC 2017

## Expected Gross Supply and Demand of Copper

Text | Focus economics

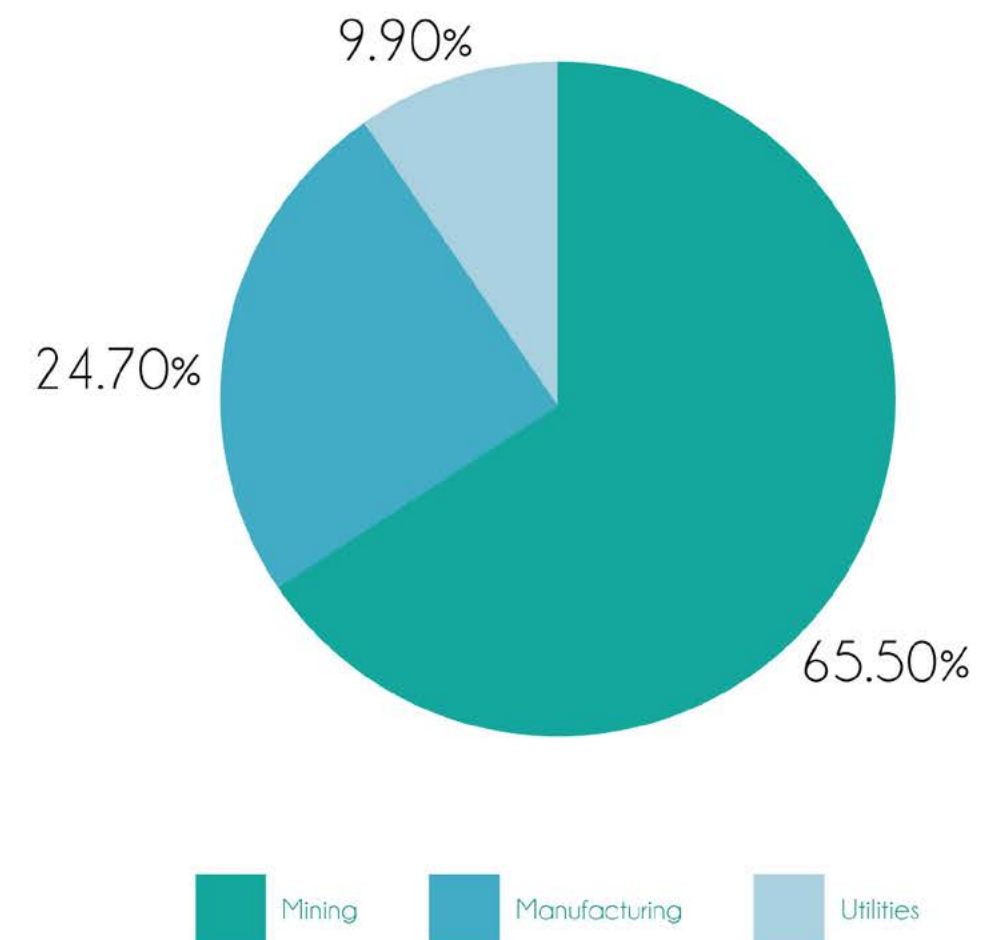

## Good Accessibility to the Relevant SOC (Social Overhead Capital)

- ▶ 50KM from Saynshand, one of the main stations of Trans-Siberian Railroad linked with Russia and China
- ▶ The Ulaan Baatar-Choir Highway (223KM)
- ▶ The Choir-Saynshand Highway Construction (to be completed by LIG Construction)
- ▶ Close to Saynshand, the provincial capital, the area enjoys good relevant SOC. (Heavy industry complex in Saynshand is slated for completion by 2013.)
- ▶ The Ulaan Baatar-Saynshand water supply pipeline.
- ▶ Close to China (150KM), the area offers convenience for distribution and sales.
- ▶ Both of the railroad toward Saynshand, one from Tavan Tolgoi and the other from Oyu Tolgoi go through the site.

## Mongolia, The Land of Opportunity

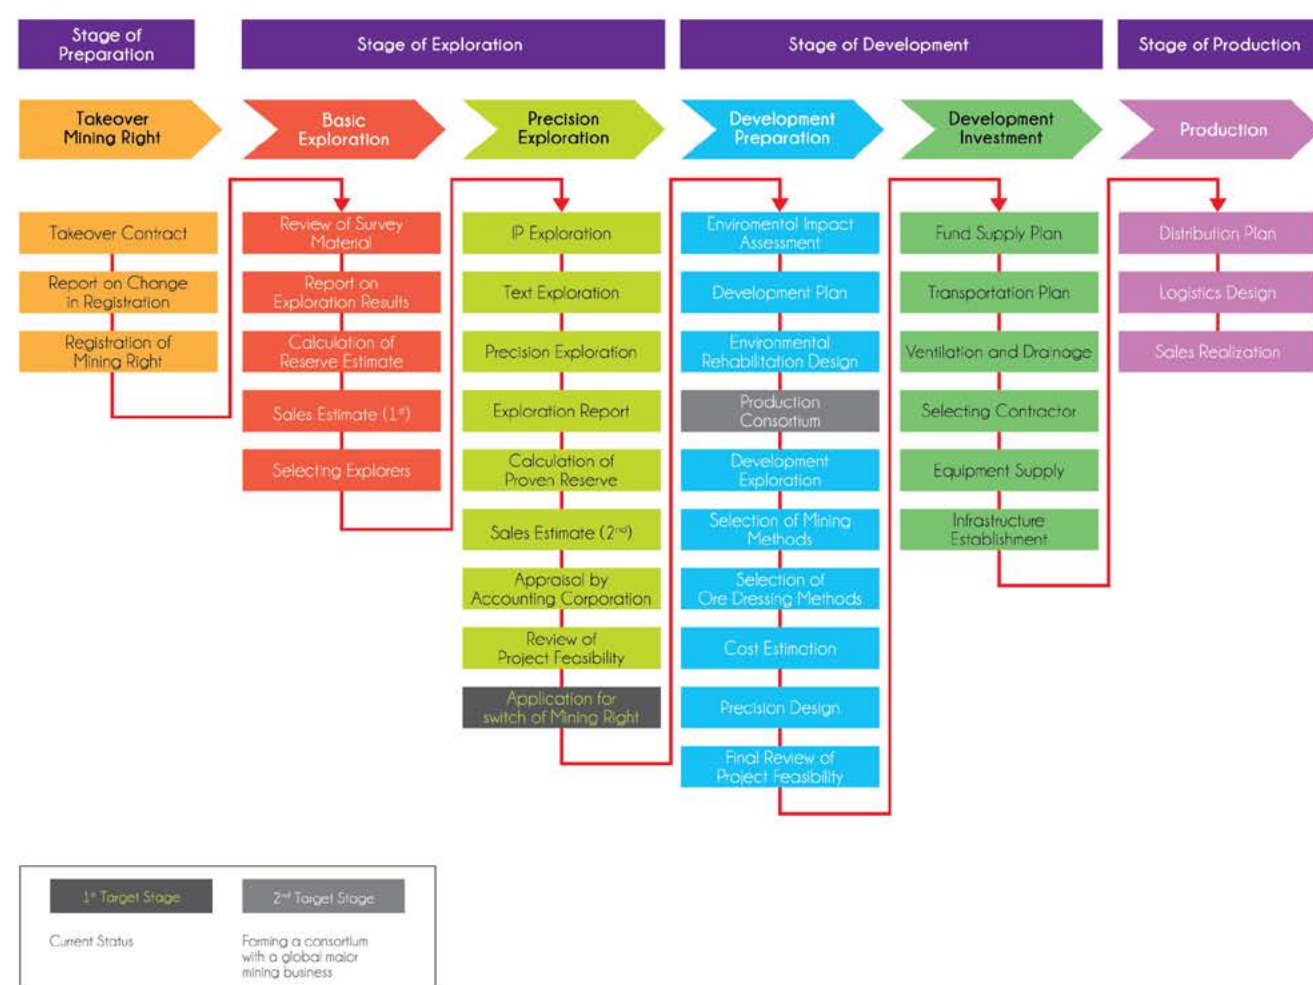

Share of Mining Industry Out  
of the Country's Gross Industrial Production

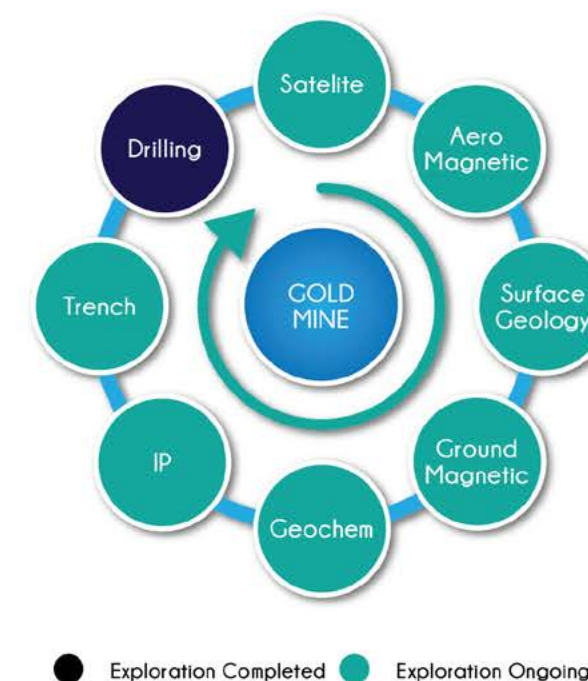

Mining industry accounts for 65.5% of Mongolia's Gross Industrial Production and 88.2% of its exports.

## Project Process

## Project Overview

## Funding

The token RXE from pre ICO until ICO in September 2018 will have a circulation of approximately 170 million RXE. As the total circulation in 300 million with a 10% reserve, there will be 270 million tokens for sale.

As the 170 million tokens of RXE is expected to be in circulation, the balance of 100 million RXE tokens will be utilized to raise funds for the business in developing the gold-copper mine. Expected funds to be raised from this exercise will be around USD 100 million. This exercise will begin in March 2019.

## 3. PROBLEMS IN THE CURRENT LANDSCAPE

RXE is catered for investors without credit history but with strong interest in trading the giant technology tokens in the crypto market. Investors can bypass the broker fees in this decentralised model.

While other tokens will be heavily exposed to the fluctuation risk, the quantum of the RXE will be rewarded by the lock-in period. The RXE investors will benefit from the return of holding RXE tokens since the company put emphasis on creating liquidity to the RXE token by increasing the demand for the token.

In the rise of the blockchain technology, the widespread in terms of applications create a series of blockchain-related products. The last era forefront of technology is about information technology, now is the digital technology.

As RealXoin is progressing with the changes in the market, the company is focusing on creating products like smart contracts, digital currency, record keeping, securities. RealXoin put customers' privacy and data security as the most important area in their business model. The risk management team are always building a strong defence mechanism to ensure that there are robust controls on the data security.

## 4. MISSION & VISION

**Our vision** is to provide this world a better decentralised system, outlines finance industry ecosystem using Blockchain technology, smart contracts, and peer-to-peer architecture. RealXoin focuses on Blockchain technology as a paradigm shift that brings innovation to the gold mining industry. As we move further into a world that fully implements the utility of blockchain technology, new opportunities to create sustainable independent communities emerge.

RealXoin aims to improve current services and concepts as well as building new ways in which we engage with technology and others. Our RX11 which developed using blockchain technology, have the ability to decentralise power from existing authorities through the use of smart contracts, cryptocurrencies, and asset ownership. This shift will change current businesses and economic and social paradigms. Transaction costs and barriers to entry will be reduced in various industries. The result will likely lead to an increase in economic exchange and prosperity.

RealXoin envisions a better world where cryptocurrencies and distributed ledger technologies and associated technologies lead the transformation of payment and monetary systems globally, a world in which cryptocurrency reigns supreme in creating an open financial system, a world in which the value of money is no longer limited to state frontiers.

RealXoin continuously aim for providing best-of-breed business solutions leveraging the Blockchain technology. As an innovation oriented company made with striving excellence in relationship with our partners, clients and employees we are targeting to emerge as a global leader in bridging the gap between business difficulties and Blockchain's ability to solve these issues.

**Our Mission** is to bring cryptocurrency trading to everyone. We want to expand the inclusion of people from all over the world, and all walks of life into the cryptocurrency arena by creating products and services that simplify the entire process.

We want to assist all individuals, regardless of technical aptitude to take advantage of the financial benefits that cryptocurrency trading provides.

Blockchains give us the freedom to exist however we choose, without any centralised structures at the helm.

At the core, we are developing a sustainable system, based around each individuals connections, to create the conditions to thrive in a new ecosystem. We see it as a privilege to be able to create these new structures with our clients. Ecosystem in emerging countries can quickly establish themselves as powerful forces, lifting many out of poverty and financial insecurity.

We imagine a world where everyone can get access to what they need, to do what they want to do. We share with people who want to learn that they can have the freedom to transact, ability to raise funding and support for their projects, and enhance their existing communities in ways they never thought possible to become the most trusted and reliable source of information on cryptocurrency investments and trading opportunities globally, and a leading provider of cryptocurrency services through our dedication to the transformation of global payments and monetary systems based on cryptocurrencies and Blockchain technology.

**Robin Piong**  
Founder and  
Chief Executive Officer

## 5. OUR SOLUTION TO THE PROBLEMS TO CURRENT LANDSCAPE

RealXoin aspire to be in the forefront of the new digital economy of investment, trade with high transparency standards and the practice of self regulation according to the international standards.

We will be inculcating philosophy of Anti-Money Laundering, AML and Know Your Client, KYC culture. Our intention and vision are clear that we aim to be a highly favoured token among the masses and the cryptocurrency community.

We will offer our customers with our unique platform and services, adapting them to all the principles of decentralised system. We will look highly in providing speed and a 24/7 customer service department to handle professionally our customer needs and enquiry.

The financial products of RealXoin such as RX11, RXB and RXI is that the project allows customers to get the services right into the palm of their hands with the freedom of making their own decision.

RealXoin will be a game changer in the financial landscape as trading in stocks and bonds are no longer for the rich but are for the ordinary people, even those without a credit history, to whom traditional financial institution cannot provide.

With the integration of decentralisation, RealXoin team choose to adopt all advantages of the conventional financial organisations, yet breaking away from systemic manipulation, central decision, stakeholder fees, lobbyism, administrative burden and high banking charges. It will be the free economy of supply and demand.

The usage of RXE which do not require central control, where the use of our smart contracts allows to process transactions more efficiently and safely. Once you hit the confirm or send button, it is all system go and no turning back.

We represent the decentralised system in the most complete format of the blockchain technologies that ensure secure information recording and storage. This will completely cut out the possibility of changing or falsifying any piece of data. We will allocate part of the funds we have earned, reinvest in data security.

## 6. OUR DIFFERENTIATING FACTORS

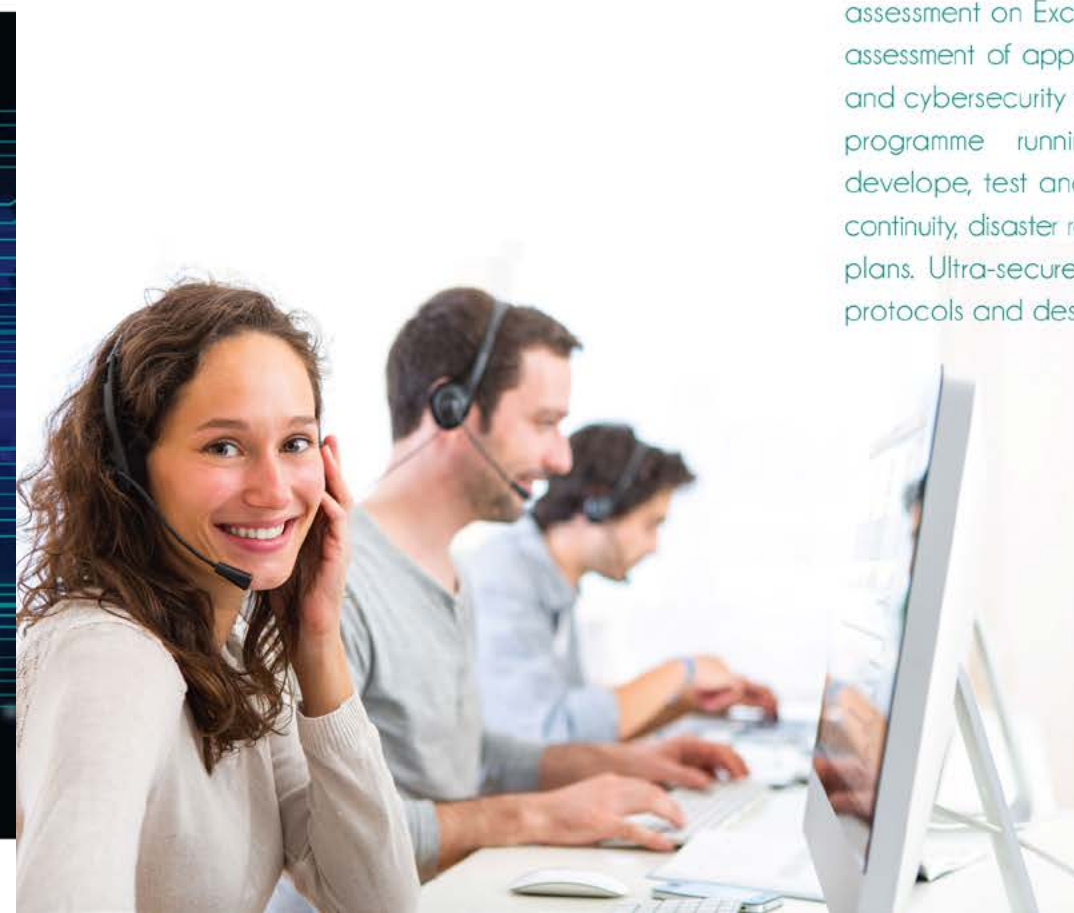

Inherently, due to the poor technical architecture, insecure platform, poor internationalisation, language support and poor market liquidity. Our exchange - RealXoin Crypto Exchange can promote flexibility of cash currency to cryptocurrencies, trade all the top coins on one exchanger.

We aim to develop a Cryptocurrency Exchange platform of BTC, ETH, LTC, BCC, XRP and even RXE, with the flexibility of depositing and withdrawing in Multi-Currency such as USD, MNT, EURO, GBP, AUD, CAD, SGD, RMB, JPY, HKD, MYR, VND, KRW, THB, IDR.

In new frontier countries, we believe every country in the world has the opportunity to involve in RXE or other major cryptocurrencies (BTC, ETH, LTC, BCC, XRP)

Where the fiat currency can be easily manipulated by forex traders (I.e. Mongolia, Venezuela) RXE will give them another option of currency to promote stability and growth.

We will have a strong team of customer service and administration base in Ulaan Baator, the capital city of Mongolia. However, the mechanism of depositing and withdrawing of each fiat currency will be situated mostly in their respective countries' banking system. We have a team of skilled and experiences staffing spearheading this project.

The transaction fee will be low and we intend to give all our customers opportunities from these exchange.

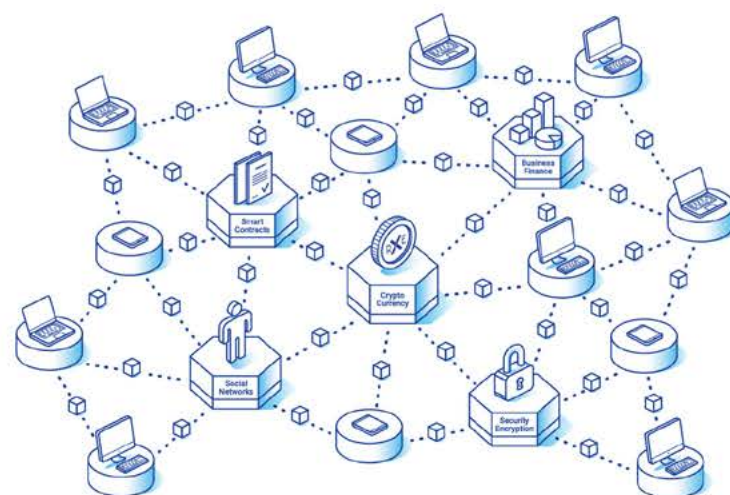

We operate RealXoin Crypto Exchange in accordance with AML/ CTF act. We have a complete set of KYC and AML to reduce the exposure and vulnerability to money laundering and terrorist financing.

RealXoin Crypto Exchange risk management team continuous vulnerability and threat analysis/ assessment on Exchanger programme. Robust risk assessment of applications, underlying technology and cybersecurity to secure that virtue exchange programme running on full capacity. We develop, test and maintain adequate business continuity, disaster recovery and crisis management plans. Ultra-secure platform using latest security protocols and designs.

## Smart Contract

The RXE token is an ERC20 smart contract which use Smart Contracts and Blockchain technology saves time and manpower to administrate the payments of the financing as everything will be automated, delivered in a quick and transparent manner. Additionally, all the transactions on the Smart Contract cannot be amended and altered providing an audit-able trail for users to track any misuse or abuse over the system.

## Anti-Money Laundering and Know Your Customer Policy

We will have a Anti-Money Laundering ("AML") and Know Your Customer ("KYC") Policy in place to prevent and mitigate possible risks of any kind of illegal activity on our platform. RXE follows the guidelines applicable to all reporting institutions.

Upon registration by investors on our platform, they will have to furnish us with personal details and satisfactory documentation to prove their identities. As part of our due diligence process on user verification, we will take steps to confirm the authenticity of documents and information provided by users.

All legal methods for double-checking identification information will be used and we reserve the right to investigate any users who have been determined to be risky or suspicious. Only after the due diligence process on the users background has been satisfactorily concluded, will they be allowed to begin trading transactions on the platform.

Our compliance procedures is a continuous process and is not limited to the initial stage of on-boarding of users on the platform. Our Compliance Officer will also be involved in monitoring and analysing the transactional patterns of the users on the platform. The Compliance Officer will be performing a variety of compliance-related tasks, including capturing data, filtering, record-keeping, investigation management, and reporting. We will rely on the data analysis done as a risk-assessment and suspicion detection tool.

## Compliance with Howey Test

Recently, there have been many countries coming out with regulations on cryptocurrencies, whether these coins or tokens are deemed as securities and fall under an offering under the securities law of their respective jurisdiction. The most prominent coming from the United States of America, where coins or tokens have to comply with the Howey Test to not be deemed as securities.

Looking at the Howey test, we are of the opinion that the RXE token compliant and do not fall under the category of securities as shown below:

TEST	EXPLANATION	RXE TOKEN COMPLIANCE
Investment in a common enterprise	An individual or organisation provides some form of value as an investment and this are pooled with other investor's money or form of value	RealXoin Technologies will only use the proceeds of selling the RXE tokens to develop the RealXoin platform. RXE token is a pure utility token. A holder of RXE token will only have rights to access and submit financing application through the RealXoin financing platform. RXE token will not provide any other rights and functions to its holders.
Reasonable expectations of Profit	The investor expects to make money from their investment	The holder of RXE token will only use the RXE token to submit a financing application through the RealXoin platform. The RXE token does not generate any income for the holder from the financing application.
To be derived from the entrepreneurial or managerial efforts of others	An individual or organisation uses the investment to create something of value and the investors depend on the work of the individual or organisation	RealXoin does and will not manage the lenders' fund nor make any investment or financing recommendation to the lenders, nor will it manage or intervene on the borrower's financial decision.

## 7. CROWDSALES, DISTRIBUTION AND ALLOCATION

RXE is a borderless currency that will be powered by the Ethereum blockchain base on the platform of ERC 20.

The tokens are limited and pre-mine with an eventual circulation of 300,000,000 RXE to be sold upon ICO at USD 0.30 per token.

Unlike some developers and ICOs that are back by a large financial player, we choose to work the opposite towards a huge public spread. Time and time again we see these large players exit at will and create a market crash.

Our intention are clear where our digital marketing team is intent to sign up ten and tens of thousands of individuals even a wallet with just a minimum purchase of USD 10 of our tokens.

However, there will be a special Pre ICO purchase price where the first stage which is the first 2 months will be sold to friends and associates at very special prices and blocks quantity.

The month of June, July with the developed RXE digital wallet and web portal, every token will be sold at USD 0.20 per token. A full force of digital marketing and regular press release will be executed up to the time of listing.

- ▶ White paper
- ▶ Videos and presentation materials - various languages
- ▶ Token smart contract
- ▶ Wallet development
- ▶ Pre ICO token sale, First stage, various countries - China, Hong Kong, Japan, Singapore, Australia, Mongolia

**APR  
2018**

**MAY  
2018**

- ▶ Development of web portal
- ▶ New videos and marketing materials - various languages
- ▶ Still Pre ICO token sale, First stage
- ▶ Various countries - China, Hong Kong, Japan, Singapore, Australia, UK, Korea and Europe

- ▶ Smart Contracts development of RX11
- ▶ Initial stage of development of Realxoin Cryptocurrency Exchange in Mongolia
- ▶ Completion of RXE Wallet powered by blockchain with send and receive function
- ▶ Pre ICO token sale second stage through social media, private functions and network marketing

**JUN  
2018**

**JUL  
2018**

- ▶ Extensive marketing in network marketing, private events and social marketing
- ▶ Further development of RX11
- ▶ Application to Crypto Exchanges in Hong Kong and Australia

- ▶ Further development of Realxoin Cryptocurrency Exchange in Mongolia
- ▶ Extensive marketing in network marketing, private events and social media of pre ICO RXE tokens
- ▶ Opening of bank account and shares account in Singapore

**AUG  
2018**

- ▶ Listing in a Crypto Exchange
- ▶ Trading begins for RXE

**SEP  
2018**

**SEP 2018  
ONWARDS**

- ▶ Post ICO marketing of RXE through road shows, exhibitions in various countries, social media and news portals
- ▶ Post ICO videos and crypto bloggers analysis
- ▶ Setting up a permanent offices in various cities
- ▶ Ideally Hong Kong, Tokyo, Seoul, Singapore, Ulaan Baator, Vancouver and Sydney

- ▶ Launching of RealXoin Exchange Ulaan Baator, Mongolia
- ▶ Further Development of new products and technology products only online portal using RXE for purchasing

**JAN 2019  
ONWARDS**

**APR  
2019**

- ▶ Partnership with MND JSC to acquire a Gold Mine license in Mongolia with a minimum inferred gold resource of at least 90 tons of gold
- ▶ It will be under exploration status or X license
- ▶ Mongolia is one of the most resource rich country in the world

- ▶ Exploration drills begin to indicate actual gold resource

**MAY  
2019**

**JULY  
2019**

- Geological review of gold and copper mine with a complete JORC report to know exactly the indicated gold and copper resource

**SEP  
2019**

- Conversion of X license to a full fledged A license of the mining asset to begin mining operation planning

**NOV  
2019**

- Mining operations invited to submit tender for mining and logistics work to begin production on certain parcel of the mining land

**JAN & FEB  
2020**

- Winter Break

**MAR  
2020  
ONWARDS**

- Actual and copper and copper mining operations begins
- The bulk of the proceeds from the gold and copper sale will be used to reinvest into RXE liquidity and to increase the acquisition of tech companies shares

**Robin Piong**  
Founder and CEO

**Paul Rodney Townsend**  
*International Business Adviser*

Travel extensively to Europe and Asia as an Independent International Auditor in the engineering and business field. Highly sought with more than 30 years experience.

## 10. CONCLUSION

Investments in technological innovations require platform where the investors and the innovators could trade with each other by exchanging Intellectual Property Rights commodity. The commodity here could be structured using the blockchain technology, in forms of crypto - token which is RXE. During the first instance, the exchange is between the innovators and initial investors, by having RXE offered to the investors; and thereafter, the initial investors could trade RXE in the RealXoin Crypto Exchange with other main crypto currencies. Later on, RXE will be the token to finance RealXoin Technologies into the copper and gold mine in Mongolia.

In the next three years, we anticipate that RXE to be a highly favourable token among the crypto community. By deploying the existing team of experts, RXE will put emphasis in market making and continue to invest in blockchain technology with the intention to value add the RXE token. The team envision that RXE will cross the threshold of 100 USD within the next three years.

- 2.10** This White Paper, any part thereof and any copy thereof must not be taken or transmitted to any country where distribution or dissemination of this White Paper is prohibited or restricted.
- 2.11** This White Paper may not be, in whole or in part, reproduced or used for any other purpose, or shown, given, copied to or filed with any other person including, without limitation, any government or regulatory authority except with the prior consent of RealXoin or as may be required by law which applies to the Issuer.
- 2.12** None of the information or data contained in this White Paper has been independently verified by RealXoin and no representation or warranty, express or implied, is given or assumed by RealXoin as to the authenticity, origin, validity, accuracy or completeness of such information and data or that the information or data remains unchanged in any respect after the relevant date shown in this White Paper.
- 2.13** RealXoin have not accepted and will not accept any responsibility for the information and data contained in this White Paper or otherwise in relation to the RXE Tokens and shall not be liable for any consequences of reliance on any of the information or data in this White Paper.
- 2.14** No person is authorised to give any information or data or to make any representation or warranty other than as contained in this White Paper and, if given or made, any such information, data, representation or warranty must not be relied upon as being authorised by any other person.
- 2.15** By accepting delivery (which is deemed to be by way of downloading, accessing the <https://www.realxoin.org> or in any way having access to this White Paper), each recipient agrees to the terms upon which this White Paper is provided to such recipient as set out in this White Paper, and further agrees and confirms that:
- a.** it will keep confidential all of such information and data;
  - b.** it is lawful for the recipient to receive this White Paper and or to subscribe to RXE Tokens ICO or crowdsales under all jurisdictions to which the recipient is subjected to;
  - c.** the recipient has complied with all applicable laws in connection with the receipt of this White Paper and/or to subscribe for RXE Tokens;

- d. RealXoin and their respective directors, officers, employees and professional advisors are not and will not be in breach of the laws of any jurisdiction to which the recipient is subjected to as a result of the delivery of the White Paper and/ or to subscribe for RXETokens, and they shall not have any responsibility or liability in the event that such delivery of the White Paper and/or to subscribe for RXE Tokens is or shall become unlawful, unenforceable, voidable or void;
- e. it is aware that the RXE Tokens can only be offered, swapped, transferred or otherwise disposed of directly or indirectly in accordance with the relevant swapping restrictions and all applicable laws;
- f. it has sufficient knowledge and experience in financial and business matters to be capable of evaluating the merits and risks of investing in RXE Tokens, and is able and is prepared to bear the economic and financial risks of investing in RXE Tokens;
- g. it is purchasing the RXE Tokens for its own account;
- h. it agrees and acknowledges that the RXE Tokens are not to be construed, interpreted, classified or treated as:
  - i. any kind of currency other than cryptocurrency;
  - ii. debentures, stocks or shares issued by any person or entity;
  - iii. rights, options or derivatives in respect of such debentures, stocks or shares;
- i. it is aware that the information contained in this White Paper may not be complete

- j. it is fully knowledgeable and aware of all matters concerning the subscribing and investing in RXE Tokens which may not be specifically set out in this White Paper but which may be known to a person who can be reasonably inferred as having reasonable knowledge and familiarity with the workings and intricacies of cryptocurrencies, Bitcoins, Ethereum and/or other types of tokens and it hereby irrevocably and unconditionally confirms that it has an understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology.

**2.16** Neither the delivery of this White Paper nor the offering of any RXE Tokens shall in any circumstance imply that the information contained herein concerning RealXoin is correct at any time subsequent to the date hereof or that any other information supplied in connection with the RXETokens is correct as of any time subsequent to the date indicated in the document containing the same.

**2.17** This White Paper may include certain historical information, estimates, or reports thereon derived from sources mentioned in this White Paper and other parties, the material businesses which RealXoin operates and certain other matters. No representation or warranty is made as to the accuracy or completeness of any information, estimate and or report thereon derived from such and other third party sources.

**2.18** This White Paper includes "forward looking statements". These statements include, among other things, discussions of each of RealXoin business strategy and expectations concerning its position in the economy, future operations, profitability, liquidity, capital resources and financial position. All these statements are based on estimates and assumptions made by Issuer that, although believed to be reasonable, are subject to risks and uncertainties that may cause actual events and the future results of Issuer to be materially different from that expected or indicated by such statements and estimates and no assurance can be given that any of such statements or estimates will be realised. In light of these and other uncertainties, the inclusion of a forward looking statement in this White Paper should not be regarded as a representation or warranty by Issuer or any other person that the plans and objectives of Issuer will be achieved.

- 2.19 To the maximum extent permitted by the applicable laws, regulations and rules, RealXoin shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this White Paper or any thereof and/or the subscription of RXE Tokens.

### 3. CONFIDENTIALITY

- 3.1 This White Paper and its contents are strictly confidential and the information herein is given to the recipient strictly on the basis that the recipient shall ensure the same remains confidential. Accordingly, this White Paper and its contents, or any information, which is made available to the recipient in connection with any further enquiries, must be held in complete confidence.
- 3.2 In the event that there is any contravention of this confidentiality undertaking or there is reasonable likelihood that this confidentiality undertaking may be contravened, RealXoin may, at its discretion, apply for any remedy available to both whether at law or equity, including without limitation, injunctions. RealXoin are entitled to fully recover from the contravening party all cost, expenses and losses incurred and/or suffered, in this regard. For the avoidance of doubt, it is hereby deemed that this confidentiality undertaking shall be imposed upon the recipient, the recipient's professional advisors, directors, employees and any other persons concerned with the Program.
