

"Is or Isn't" - GCR/RV SITREP - Tuesday - September 26, 2017

What's really amazing to witness is the great cabal lie unraveling at every turn, and the gentle panic of the world as it is forced into dealing with reality versus fantasy (aka change).

It's not whether or not the FED is or isn't raising rates, it's whether the FED is or isn't.

It's not where these category 5 hurricanes will hit, it's that there were 6 hurricanes in a row and now they have suddenly stopped.

It's not if a revaluation of currencies is going to go down, it's what project management do you have prepared after it does.

Everything appears backwards because everything was designed to be that way to keep humanity in their lowest chakras to enslave them.

We have ALL been slaves to a master we couldn't see or identify--hence the basic need for a cabal.

Sorry I was the one who told you, blame old Yosef for the cabal's evil ways, but I cared enough to tell you all and keep telling you until I had your full attention.

Why? Don't know. I really don't.

I'm just as surprised to be in this situation as you are to be in yours, yet here we are together. So let's make the most of it.

I knew the RV was real in 2006. Real real. From Asia. Recruited historical bonds to make sure I was ready for my family and community.

As such I developed perpetual compliance strategies to manage endless amounts of capital and then recruited talented human resources to assist.

I've been harvesting projects for funding since 2008 and created a global compliance mechanism before the ZIM was even printed.

I knew gasoline engines were going away in 1996. And that muscle cars were becoming flying cars since 2001.

Are you prepared to travel not without driving, but without roads?

That's the ZIM exchange in a nutshell. A life lived in a gravity-less environment and without roads.

Are you emotionally prepared for that?

Do you have those Post RV ducks in a row?

If you wanted to help kids all over the world could you do so right now?

Do you have a plan that you can communicate with others in decision making positions?

Because if so, wonderful please us at HAS. If not, let us help you because we know you already have the resources. Literally in cash.

Everyone does!!!!!!

So how will we as a slaves-no-more community start connecting problems with solutions efficiently and perpetually?

If you don't have a definitive answer because you've been "waiting for money" to get started, well those poor kids in India don't much care. They are still suffering and you're beyond rich.

So... something's gotta give.

Human Angel Services (HAS) is an option as your project portal so everyone reading this can get started and maximize their inner but untapped philanthropist.

www.humanangelservices.com

It doesn't make the problems any smaller or less harsh, but it does provide a bridge for solutions to find and solve the problems facing humanity.

Because the question is not wether or not you should subscribe, the question is why did you believe the RV wouldn't happen today and not be more prepared?

So turn your ego surf boards around and catch this wave of mercy with us.

As HAS is the only organization in existence that understands both where you have been and where you want to go.

Sobeit.

God is with us
