

"Wake Up!" - GCR/RV SITREP - Monday - September 18, 2017

Did anyone notice Hurricane Jose is near NYC at the exact same time the UN General Assembly is meeting?

The thing to really consider is how this UN, the one in NYC, representing an old way of doing diplomatic business, will be moved to Beijing soon.

As will the role of the Bank of International Settlements in Basel, Switzerland to the PROC Central Bank.

As will the Federal Reserve and Internal Revenue Service to the US Treasury.

As will the World Bank and International Monetary Fund to the AIIB.

When do you think HSBC over take all BofA branches? GM is already majority owned by China. So is the White House and Congress.

All these "institutions" will shift headquarters from East to West soon if they haven't done already.

This is all part of the transition we've discussed at length that yes includes your monetary transaction.

There is no nuclear threat in North Korea. China and Russia handled that over a decade ago.

What you're seeing now is the United States and Europe putting pressure on China for trade easements.

Everything you're seeing on TV about immediate danger is a bold faced lie to scare us into a lower ascension vibration.

Turn off your TVs. Stay off of Facebook. See your fake President for what she really is--an open lie.

Wake up!

You are all out of time to awaken! The RV is here! The ZIM will destroy those who remain asleep!

Please surrender now and wake up! I beg of you. This is both your last invitation and warning.

God is with us
