

"Healing the Soul of the World" - GCR/RV SITREP -  
Sunday - September 24, 2017

Well, another Saturday night is upon us... is it coming and going? At this point we don't know.

There was no Church Bank call tonight because we were asked not to go on the air.

There is no advanced intel tonight because we were asked to put any out. Especially about Trump, Mueller, North Korea, Israel or Kurdistan.

There is however USN replacing USD... that we can assure everyone happened as of 12:01am EDT. Hallelujah!

As such, we're waiting to release the website until we know when the RV release will be forthcoming.

We're just not sure how or when they're going to roll it out today, Sunday.

The RV could come literally at any second Sunday. Anytime.

That is the problem, we have several windows to choose from. Who knows which one is accurate.

And since we're in truth a post RV website at heart, it only makes sense for us to wait a little longer and aspire to release the Human Angel Services post RV... [www.humanangelservices.com](http://www.humanangelservices.com).

We currently have 55,000 sign ups and will be over 60,000 at this rate before October 1, 2017. Again, thank you for your overwhelming support in rounding up all the Human Angels. It's truly been a humbling experience for Showme and I to watch all of you Human Angels answer the Clarion Call.

Amazing.

We thought we have another week just to put everything we wanted into the site, but the dates keep getting moved up, and up given all the good news that's been coming in from everywhere. So we are playing a wait n'see game until something breaks on Sunday.

And if there's nothing solid by the end of the day, Sunday, we will release the site pre-RV. Not our first choice FYI.

The USN's worldwide must start trading on Sunday... must... or else the USA and a hundred other nations won't have any liquidity come September 30, 2017. Literally, there will be no funds because the USD is now dead, dead, dead. And they need a week on currency trading platforms starting Sunday night in Asia to generate US 2018 fiscal year gold backed cash (USN)... as technically there is none until we RV.

So...

That said if there is an official release, we'll just send out a Tetelestai alert and perhaps maybe even take another week to release come October 1st because it'll take a week just to pull everyone's head out of the clouds and get back to the business of "healing the soul of the world."

I would pay to see Martha do a back flip and stick the landing.

These are all good problems to have by the way. Nonetheless... we are going to wait it out one more day due to wonderful circumstances.

So hang in their currency world. The rates are climbing and the reality of this nightmare is finally ending.

Believe, don't believe... blah, blah, blah...

God is with us.
