"Guinea" - GCR/RV SITREP - Tuesday - September 5, 2017

Zimbabwe went first on announcing the gold standard followed by the Yuan... why?

At this weekends BRICS business gathering Chinese President Xi Jinping of said that "China and Africa are a community of shared future and common interests, which have gone through thick and thin together."

"Regardless of changes in the international situation, China will unswervingly work with Africa for win-win cooperation and common development, and resolutely support peace and development in Africa," President Xi said.

"China supports Africa's capacity building in peace-keeping."

He also said that China intends to better combine the Belt and Road Initiative and the China-Africa cooperation plans set forth at the FOCAC Johannesburg summit with the AU's Agenda 2063.

"Africa is the future of the world," Xi said, "The future of BRICS will be determined by cooperation with Africa... let us jointly face our challenges together."

Wow... ok. How do you feel about your ZIM investment now? It's over 2.90+ as of the start of this week. This means Zimababwe's currency is valued more by the Chinese than America by nearly 3 to 1!

That's how far America will fall, how fast and when is tied into the release of the RV-which is still an immanent event.

And this is why you're already wealthy beyond traditionally understanding. But tradition is a liar as it relates to Anglo-Saxon history.

White Supremacy wasn't some passing fad, it was a four century problem/war that has structurally been suppressed in our lifetime. Pretty cool.

People of Color are going to make a "yuge" comeback as a result.

In this same spirit of proper valuation... Egypt, Guinea, Tajikistan, Thailand and Mexico were all asked to join the three-day BRICS business summit as observer nations, what President Xi called potential "BRICS Plus" members who could one day expand into the larger BRICS bloc, although no new members have been formally announced.

Bullshit. They were there announced just being at the meeting and discussed publicly by Xi. China is telling you what they are doing, look at what they did with the Yuan going to a gold backing in exchange for oil!

Are you listening?

These emerging market counties are not only all BRICS Plus members already, America is not! And they are each primed for massive growth with China's backing a la Zimbabwe, Vietnam, Indonesia, Afghanistan, Iraq and Iran.

BTW: All these nations have vast majority populations that yup... are of color.

Get it?

Anglos have for four hundred years tried to steal the wealth of the world, and couldn't, now China and Russia are restoring the truth which creates fiscal arbitrages that we can all take advantage if we are paying attention. So are you?

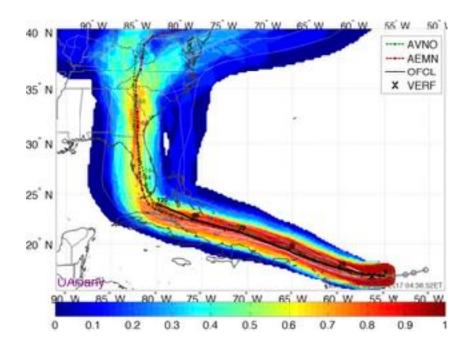

Take the Nation of Guinea as an example...

... Guinea is richly endowed with minerals, possessing an estimated quarter of the world's proven reserves of bauxite, more than 1.8 billion metric tons (2.0 billion short tons) of high-grade iron ore, significant diamond and gold deposits, and undetermined quantities of uranium.

Yet check out its horribly under valued currency a la another little known undervalued African nation ... yup ... Zimbabwe.

No wonder a second category 4 level hurricane is barreling down on Florida this week. Locals should just leave and pray to be spared given what happened in Houston.

When all these historically evil lies and manmade catastrophic storms pass, peace and prosperity will restore and remain for 1,000 years.

So all is well. Be at peace. This too shall pass.

God is with us
