

We are proud to present to you our NovaCrypto Limited Swiss based company

[Our Trademark NovaCrypto 1](#)  
[Our Trademark NovaCrypto 2](#)

**NovaCrypto Limited** is a Swiss based company providing a proprietary decentralized apps platform. We are acting as a Swiss Integrator in the new technology field and particularly with such called "Swiss Open Blockchain" were we join the centralized World with the decentralized World by following real uses-cases for our Business Customers. We invite you to visit our [website](#) and look at our [corporate whitepaper](#) and also our [proprietary platform document](#).

The company was founded in February 2018 and we will follow our roadmap to focus on our marketing, test of integration by creating "Virtual Environments" in our NovaCrypto Proprietary Platform.

Our main goal is to provide a user oriented, friendly platform where registered users will be able free of charge to check our various widgets that we compiled for the crypto sphere, while seeing our tools at work and testing them.  
When you decide as registred user to become a NovaCrypto Customer you will own a private space on our NovaCrypto Proprietary Platform to benefit of our BPOS (Business Process Oriented Solutions) tailored for your Business needs.

Because the safety of your documents is no more in the bank but instead must be in the platform, that's the reason why we provide a proprietary platform with higher security standard, based in the heart of Swiss Alps, hidden in a former Military Bunker, 100% locally produced green energy, independent from the world's energy markets, right on the Internet backbone of Europe.

Our strategy when we are with a Customer is to understand his processes/transactions used at the core of his Business and later on to identify some process and/or transaction that would benefit to be shifted to the Decentralized World, in another word to the Blockchain technology.

We ensure on our NovaCrypto Proprietary Platform that your data will remain under control by the platform (Data Governance compliant) and following legal compliance, such as example when you will use the Simplified Verification Payment tool with your Wallet that give you possibility to pay under the Lightning Network.

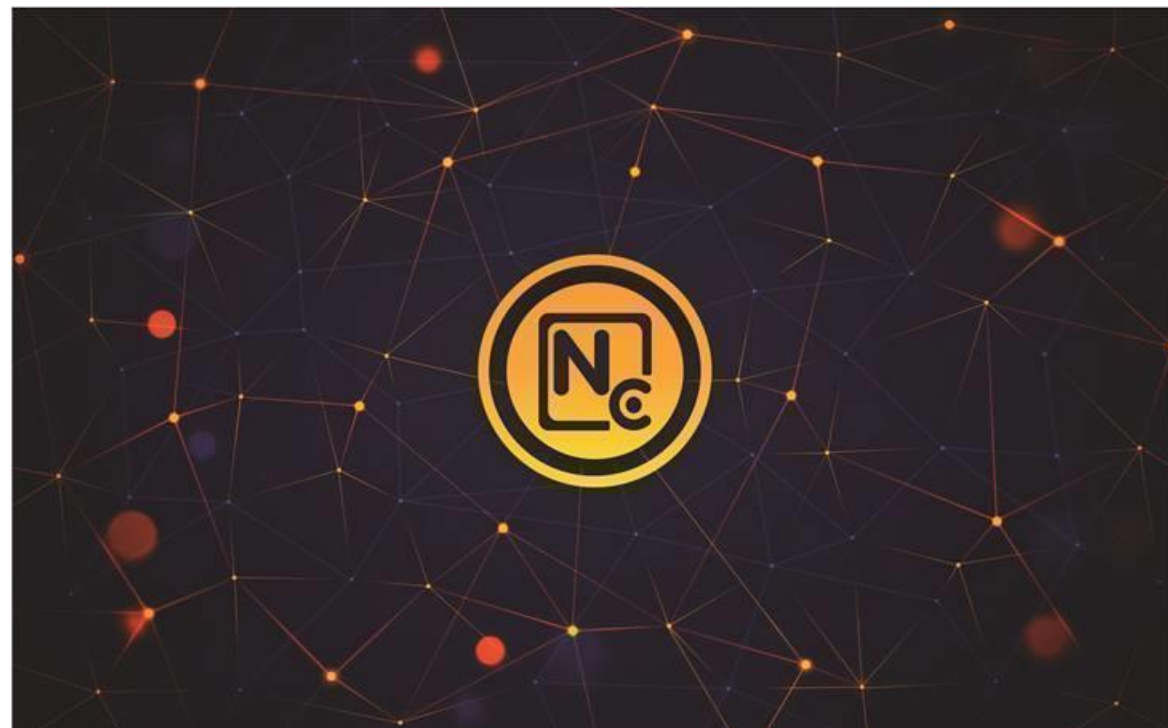

We design Swiss made uses-cases Blockchain by Industry such as :

Real Estate  
Fund Management  
Insurance  
Retail

In the Platform Decentralized World we elect the most suitable Blockchain platform and we explain to you the benefits that it offers.

Platforms such as :

**EOS**  
Stellar Lumens  
Any other platform where we identified features of interest for the uses-cases that we develop for our Business Customers.

Thank you for your attention. Looking forward to share our business experience along with our enthusiasm for Bitcoin with you.

NovaCrypto LTD – P.O. Box 1212 – 1701 Fribourg – Switzerland
