DIMMING FUNCTION

3 Step Dimming Function

When used in combination with 1-10V dimmable LED drivers and ballasts, the sensors can achieve 3-step dimming function, 100% → low light → off. And the sensors build in adjustable daylight sensors, very easy to install and cost-effective

With sufficient ambient light, the sensor does not switch off the lamp

With insufficient ambient light, the sensor switches on the lamp when motion is detected

After hold time, the sensor dims the lamp at a low light level if no new motion trigger

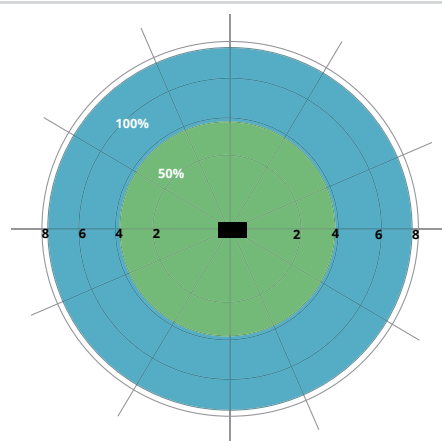

After standby period, the sensor switches off the lamp if no motion is detected in its detection zone

DETECTION AREA

Wall Mount
150° Detection Area

Wall mount can detect up to 16m

Ceiling Mount
360° Detection Area

Ceiling mount can detect up to 8m radius
