

DOSATRON®

Because life is powered by water ■ ■ ■ ■ ■

an Accudyne Industries brand

AUTOMATABLE BY-PASS INFORMATION SHEET

- Part Number - PJD1175.
- Allows the dosing process to be suspended, whilst still pumping water through the unit.
- Suitable for use with D8 , D3 Range and D30 Greeline.
- Minimum pressure 1 bar.
- Maximum pressure 8 bar.
- Operating pressure for Dosatron D3 range is 6 bar. (D3RE25IE = 4 bar)
- Pipe required to be 4mm and rated for 8 bar, this is a push fit fitting. (Not supplied)
- Can be operated using Hydraulic or Pneumatic pressure.

Instructions for Use:

The part consists of 3 pieces to be assembled as per drawing A. This fits into the top body of the Dosatron Unit. The recommended 4mm 8 bar rated pipe can then be connected (push fit) for operation.
