

Guide

AIDE

Guide

Manual

2019

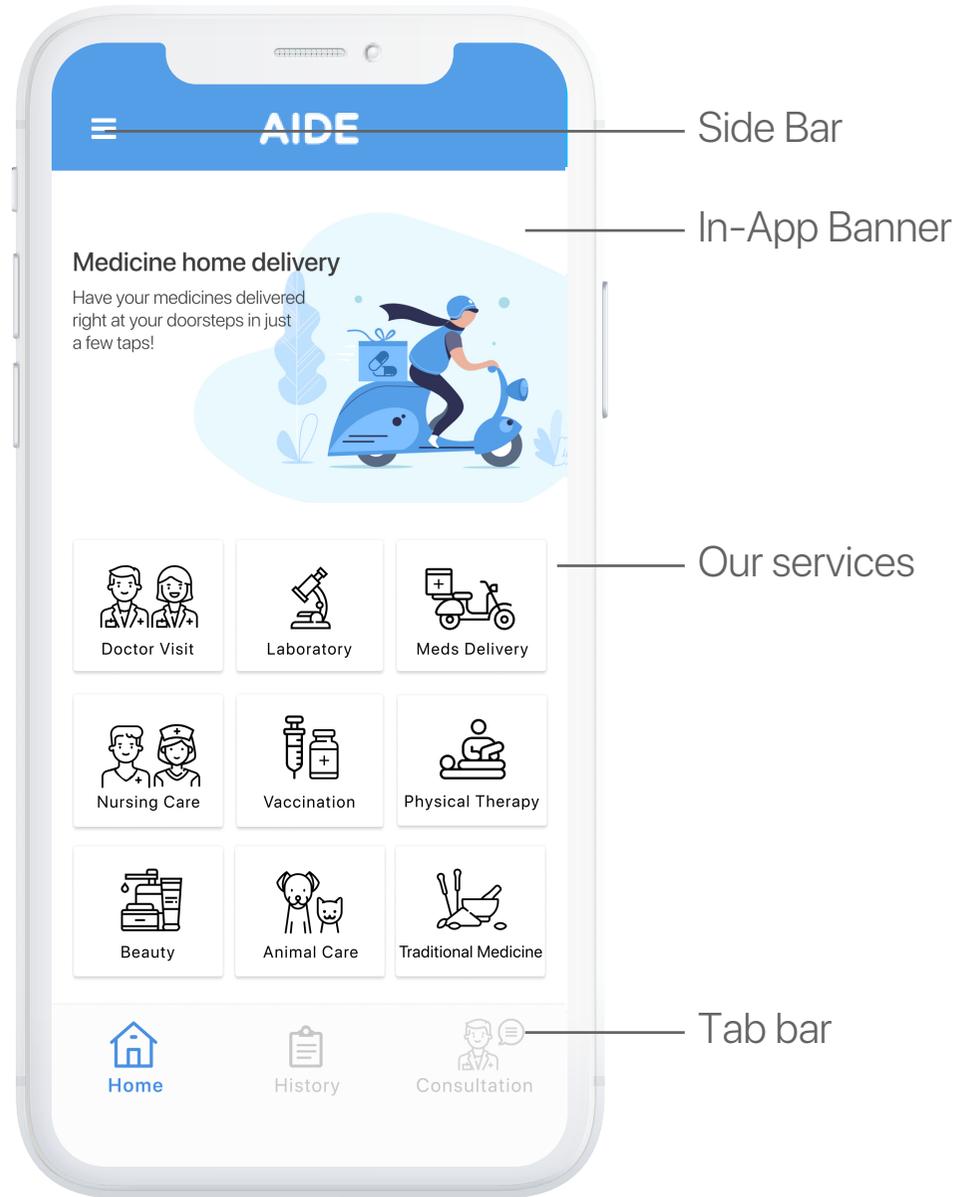

This is the user's guide manual for 2019. It aims to showcase the new and revamped features.

WELCOME TO AIDE

We bring healthcare to your home.

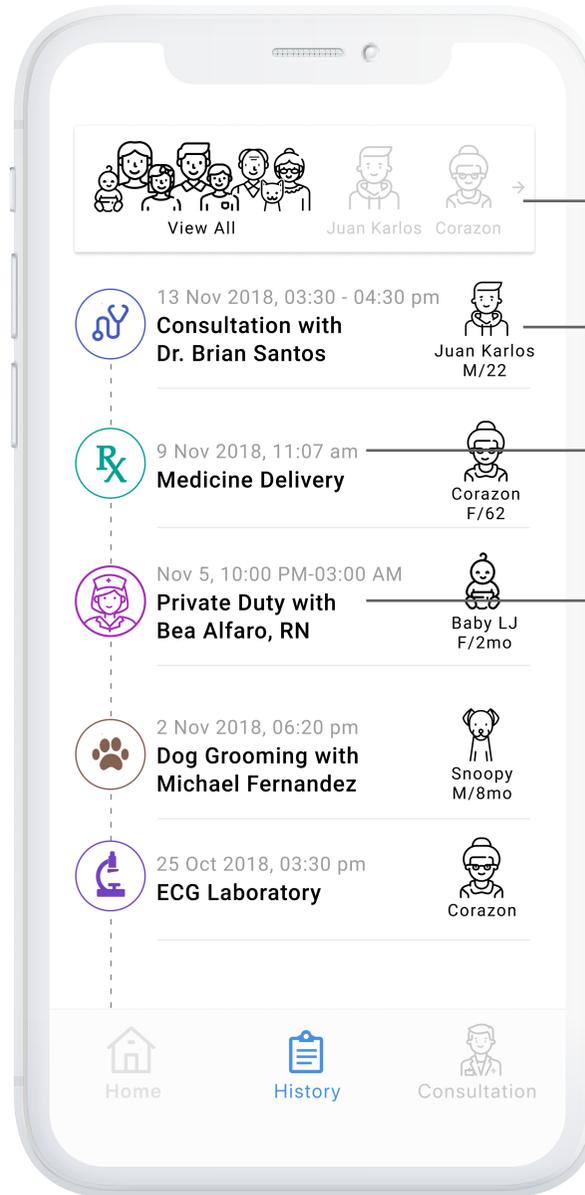

Dashboard

This is the new dashboard of the AIDE app. You may choose the medical attention you need from the list of various services on this page.

Transaction History

Manage and track all your past medical appointments in the transaction history.

Patient's Profile

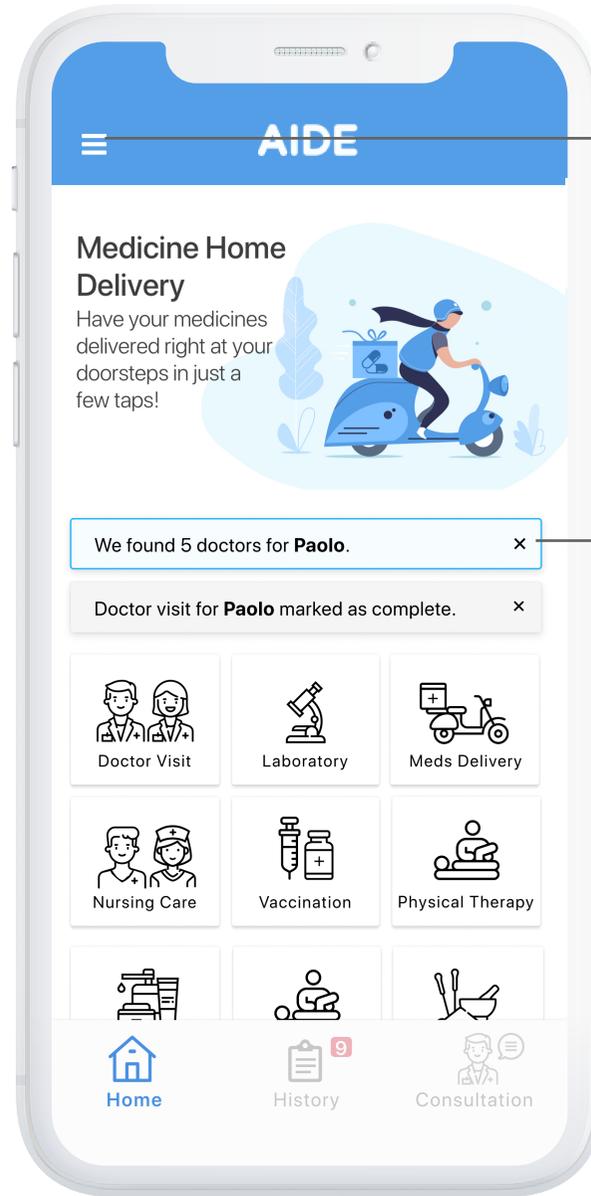

Patient's name, gender, age and profile icon

Date and time of transaction

Specific service taken

Notification

A notification will pop-up in your dashboard and will tell you the status of your request and appointments. You may choose to close this but may also view it again at the sidebar.

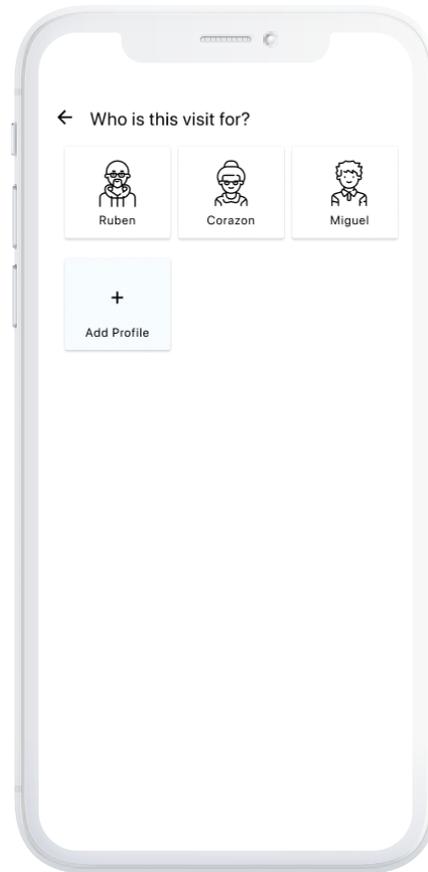

View a full list of your notifications at the sidebar.

All pop-up notifications are automatically placed here.

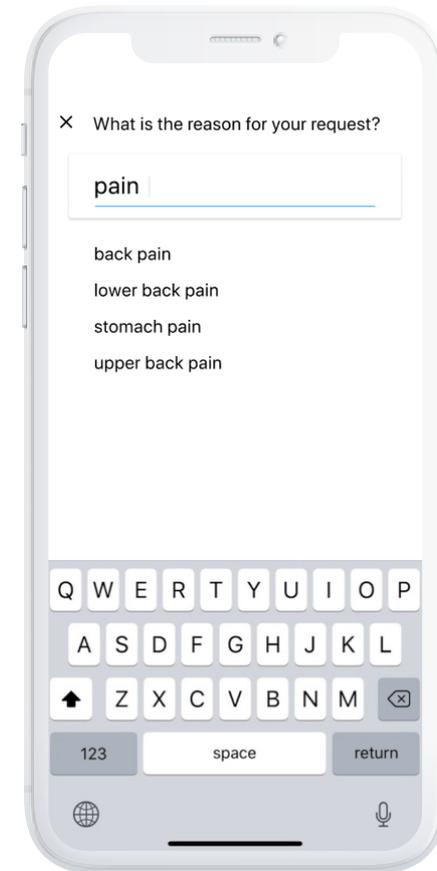

4Ws

The new app is now more user-friendly through the introduction of the 4W Process (Who, What, Where, When) for all services.

Choose who needs the home care.

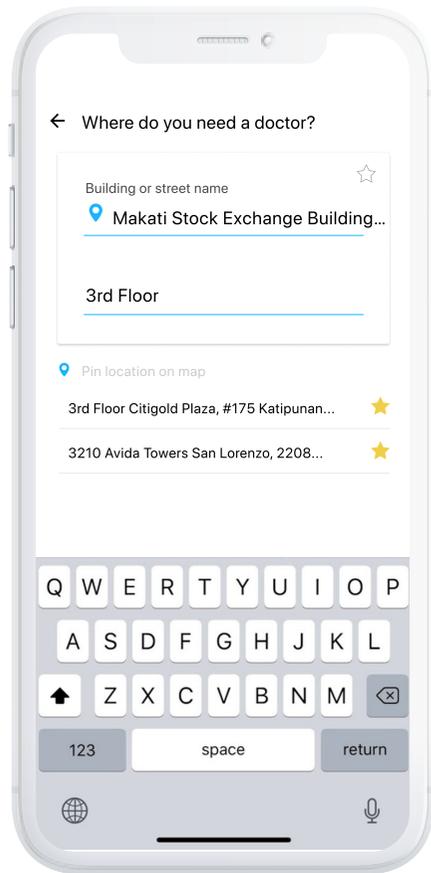

Tell the medical professional what is the reason for your request or the specific service you need

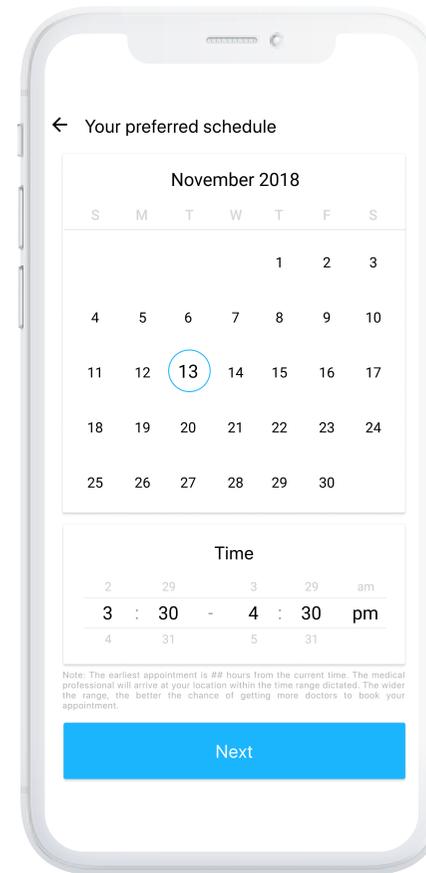

4Ws

Let the medical professional know where you need the service by typing in or pinning your location.

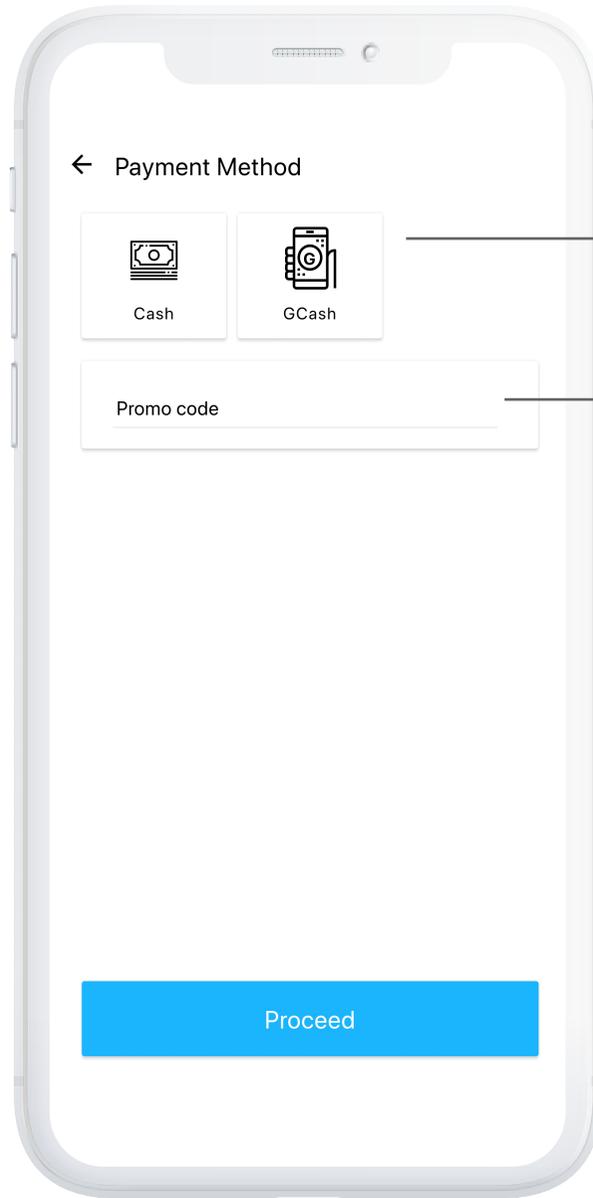

Set up the date and time range on when you wish to have the appointment.

Payment Method

We included more options for your mode of payment when you have finally chosen a doctor.

Choose from the following payment methods.

Input a promo code if any.

THANK YOU!

We are delighted to be
your home medical partner.
