

Herbicide

# BLADEx

## *The Proven Performer*

Bladex controls a wide range of weeds in maize, sweetcorn, lentil, lucerne, pea, potato and onion crops.

- ✓ Dual action via roots and shoots of weeds.
- ✓ Short soil residual life - minimises risk to following crops.
- ✓ Cleaner crops support even maturity, better harvesting and higher yields.
- ✓ A choice of two formulations.

**Etec**  
CROP SOLUTIONS

Always read the label before use.

# Weeds controlled:

Control of these weeds and others may be extended if used in combination with other herbicides.

Amaranthus, Annual Poa, Black nightshade, Brassica species, Calandrinia, Cornbind, Fathen, Fumitory, Groundsel, Shepherds Purse, Speedwell, Spurrey, Twin cress, White Clover, Willow weed.

Apply when weeds are small and actively growing
