Case Example

PCP asks specialist about a patient with ongoing neuropathic pain and leg spasms. Patient is currently using marijuana and fentanyl for pain management and is having issues with the fentanyl patch adhering. PCP requests suggestions for different approach.

Specialist suggests switching from marijuana to an oral cannabinoid and suggests baclofen for spasms. Specialist refers to opioid guidelines, offers detailed advice on opioid rotation, and offers to continue dialogue as needed to guide PCP.

PCP thanks specialist and notes intention to speak with patient about recommendations.

Primary care providers sought advice pertaining to...
- Drug Treatment
  - Treatment Strategies
- Management
  - Community Pain Resources
  - Concern for the patient’s wellbeing and frustration at previous treatments lack of success

Specialists responded with advice on...
- Drug Treatment
  - including instruction on safe opioid prescribing
- Management
