The most common questions from primary care providers pertained to...

- **48% Management**
- **31% Diagnosis**
- **21% Drug Treatment**

Specialists took less than 15 minutes to complete their eConsult in 87% of cases.

A traditional referral was initially planned for 103 out of the 155 cases (66%).

70 out of those 103 referrals (68%) were avoided following the eConsult.

Referrals were originally considered but ultimately avoided in...

- **41% of proteinuria cases**
- **50% of drug use in CKD cases**
- **46% of kidney imaging cases**

Case Example

PCP asks specialist about a patient with a microscopic hematuria found during routine testing. PCP provides detailed results of the test and asks specialist what additional tests are needed and whether the patient should see a nephrologist.

Specialist responds with guidance on how to interpret the test and recommends a urine cytology to gather more useful information. Specialist advises against consulting a nephrologist at this stage, suggesting PCP contacts a urologist first and reaches out to nephrology only if the condition worsens.

PCP accepts advice, closes case.
