TechCrete® PolySeal Sealant is a high-performance, single-component sealant and adhesive which adheres to a wide variety of substrates including PVC, vinyl, concrete, aluminum, EPDM rubber, painted and unpainted, metals, glass, marble, masonry and brick, wood, and many plastics. It can be used in a wide variety of roofing, window, door, siding, trim, metal and general construction applications. TechCrete PolySeal Sealant may be applied to damp surfaces and even in temperatures as low as 30°F (-1°C).

When used with the TechCrete Waterproofing System and in combination with our complete line of ACR Surface Preparation Products, along with the Certified Applicator Program to achieve a qualified system warranty!

TechCrete® PolySeal Sealant
