#### 创业项目的融资结构

马松博士, 耶鲁大学管理学院,

Professor Ma's main research interests are corporate finance, entrepreneurial finance, and innovation economics. His current research agenda focuses on understand-

ing economic frictions in the process of financing and organizing innovation and entrepreneurial activities, and how to mitigate those frictions through financial and organizational arrangements. He also studies how entrepreneurship contributes to economic growth and the underlying mechanism.

Dr. Ma received his PhD in Finance from Duke University's Fuqua School of Business and his BA in Economics from Zhejiang University.

#### **Bio-Microdevices in CT: Technology Innovation & In-**

dustrial Landscape

**樊荣博士:** 耶鲁大学生物医学工程系,Dr. Fan's research is focused on combining single-cell analysis technology and systems biology to study cell-cell communication and cellular heterogeneity in human cancers and the immune system. In particular, his laboratory developed a microchip platform for highly multiplexed

protein measurement in single cells and a microfluidic processor to facilitate genomic, epigenetic, and transcriptional profiling at the single-cell level. The end goal was to accelerate the translational development of these technology platforms to clinical tools for informative immune monitoring or cancer diagnosis.
