The declaration of the Bashira women for all women in the world

1

injustice and violence must be fought continuously – gender inequality must be stopped

2

colored women must be treated like white women

3

we are not monkeys – women are human beings

4

we ask that our word be respected: freedom of speech

5

we want to walk without harassment – we are not commodities - freedom of movement

6

we want women to decide for themselves – that they are listened to

7

we do not only want to stay at home – we want to learn trades to work and earn our own living
– we want to be independent and autonomous

8

we refuse violence and torture against any woman or man

Concerning refugee women:

1

our situation is worse than the men's since women have thousand arms to take care of others

2

Moria means suffering – we demand better conditions for women and faster procedures

3

we need physical and mental protection – we're not as strong as men and we take care of the children

4

the crowd is more dangerous for us, space must be given to the more vulnerable

We keep the courage!

We must not lose hope and support each other among women.

Women are the strength of the nations.
