

Internship or Bachelor/ Master Thesis (m/f) Development

(in Heidelberg, Germany)

Discovergy offers smart energy metering solutions to both private and corporate clients. We enable our clients to monitor, optimize and take control of their energy consumption and production. We are a fast growing Big Data company, collecting and processing hundreds of millions of measurements every day. We have one of the most flexible and scalable architectures build using innovative and state of the art technologies. We are looking for skilled and enthusiastic developers joining our dynamic and highly skilled team!

Your challenges:

- Support in the further development of our innovative product range with your creative ideas
- for example, topics like:
 - PV diagnosis: Automatic detection of abnormal patterns in microgrids
 - PV simulator
 - PV weather data extraction

Your qualifications:

- Study of computer science, engineering informatics or a comparable course of studies
- Motivation to work yourself into new topics and think out of the box
- Fluency in English, German is a plus

What we offer:

- Various exciting topics to work on
- Pleasant working environment within a dynamic and international team
- Fast personal development and a steep learning curve
