TE TAITOKERAU MAORI ECONOMY

CENSUS 2013

Lower levels of industrialization

Higher population growth and levels of poverty

Over 60% have little to no qualifications

Jobs – low skilled, lower paid, vulnerable industries

Income per capita – 60% lower than non Maori

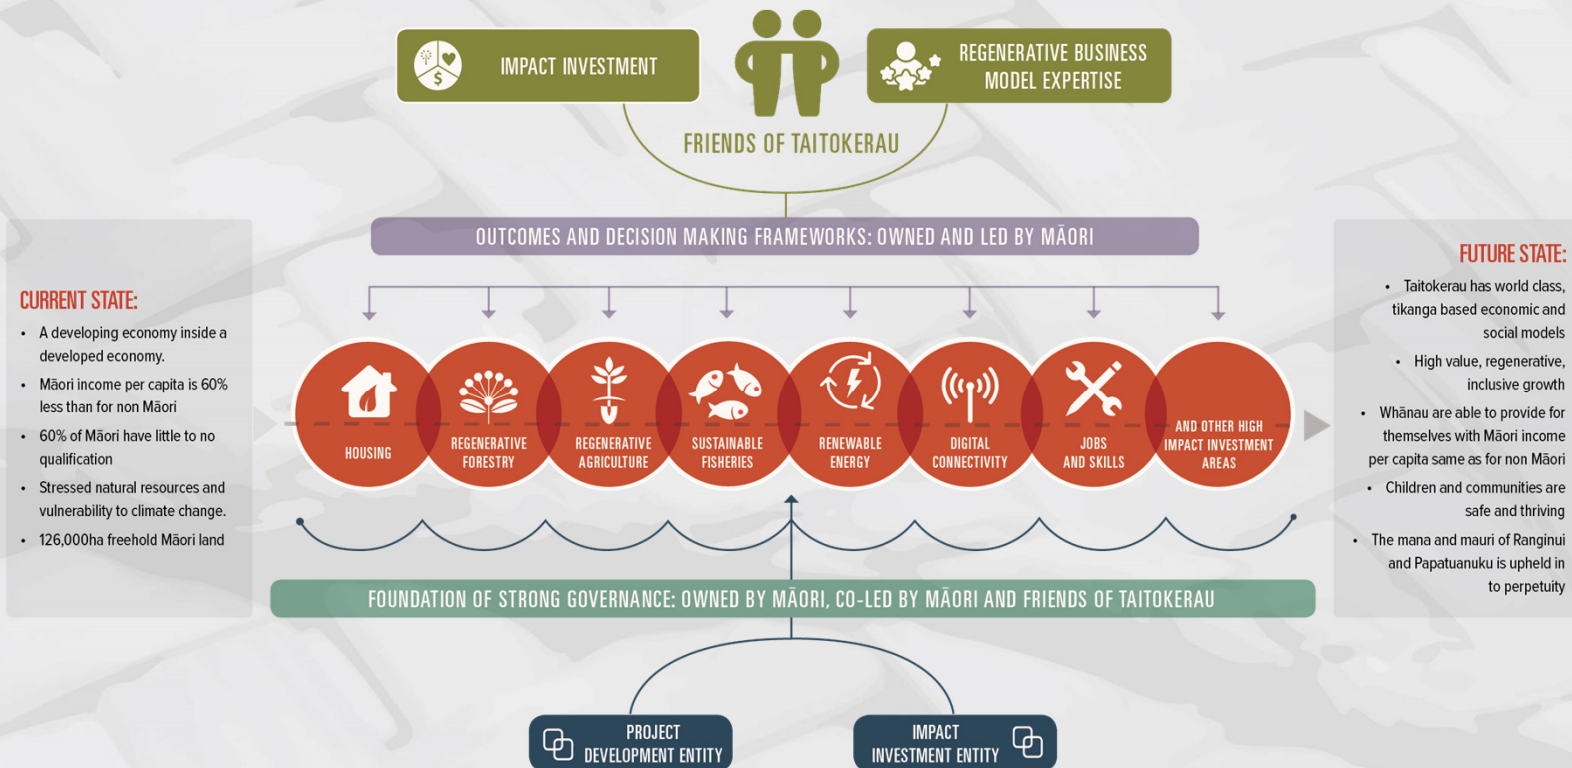

A DEVELOPING ECONOMY WITHIN A DEVELOPED ECONOMY

NEED TO FIX THE FUNDAMENTALS

TRANSFORMING TAITOKERAU FOR GOOD

To accelerate the development and deployment of impact-based investments in Northland that deliver, both individually and as part of the wider system, a sustained higher standard of living, described as oraŋga (wellness), while enhancing the interdependent relationship between tangata (people) and whenua (land).

Takou Bay: Revitalised Communities

Regenerative Forestry

Where are we now?

Pilot projects: Housing; energy; forestry; agriculture; aquaculture; digital;

Developing long term pipelines

Establishing two new entities:

Te Ara Whakamua – What's next

- **Moving from scoping and shaping to establishment for long term success**
- **Creating new partnerships of self-selected entities:**
 - a. Taitokerau Māori entities
 - b. “Friends of Taitokerau” – The Tindall Foundation
- **The “Friends of Taitokerau” will be partners* for the long term in:**
 - a. Regenerative and tikanga based business models
 - b. Impact investment
 - c. Grant funding social, cultural and environmental innovation

TRANSFORMING TAITOKERAU FOR GOOD

Transformation for large scale impact and change

NZ TREASURY'S LIVING
STANDARDS FRAMEWORK

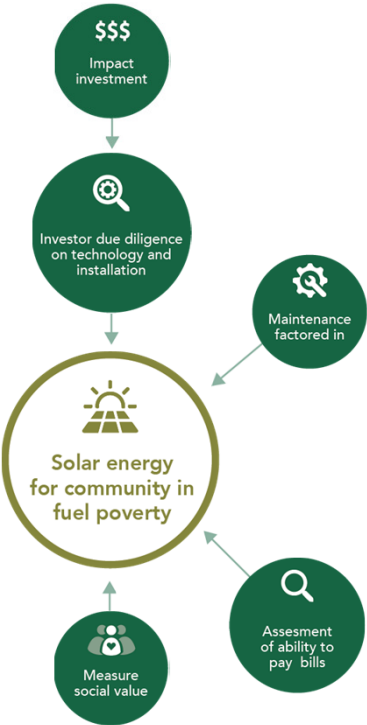

From good projects to systems projects

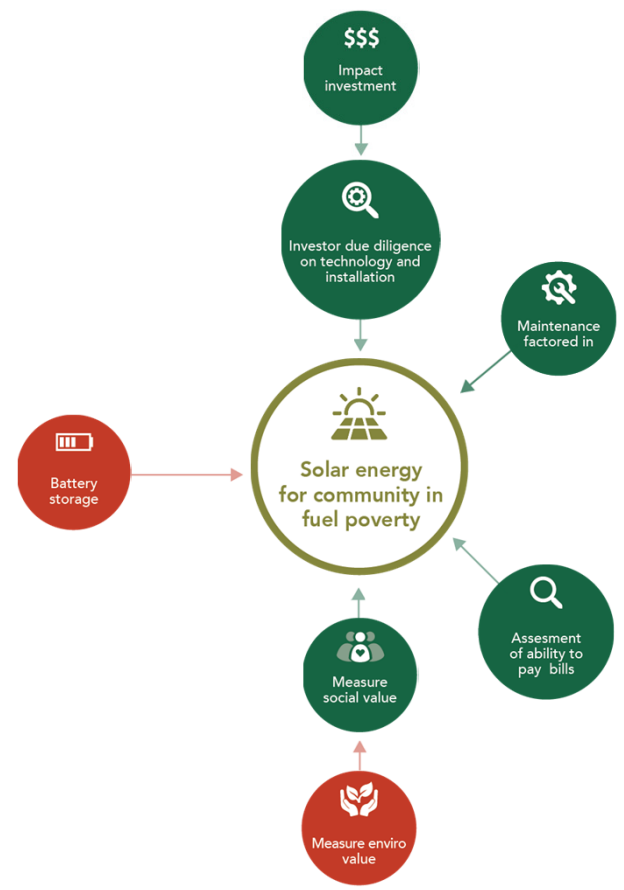

Standard Project

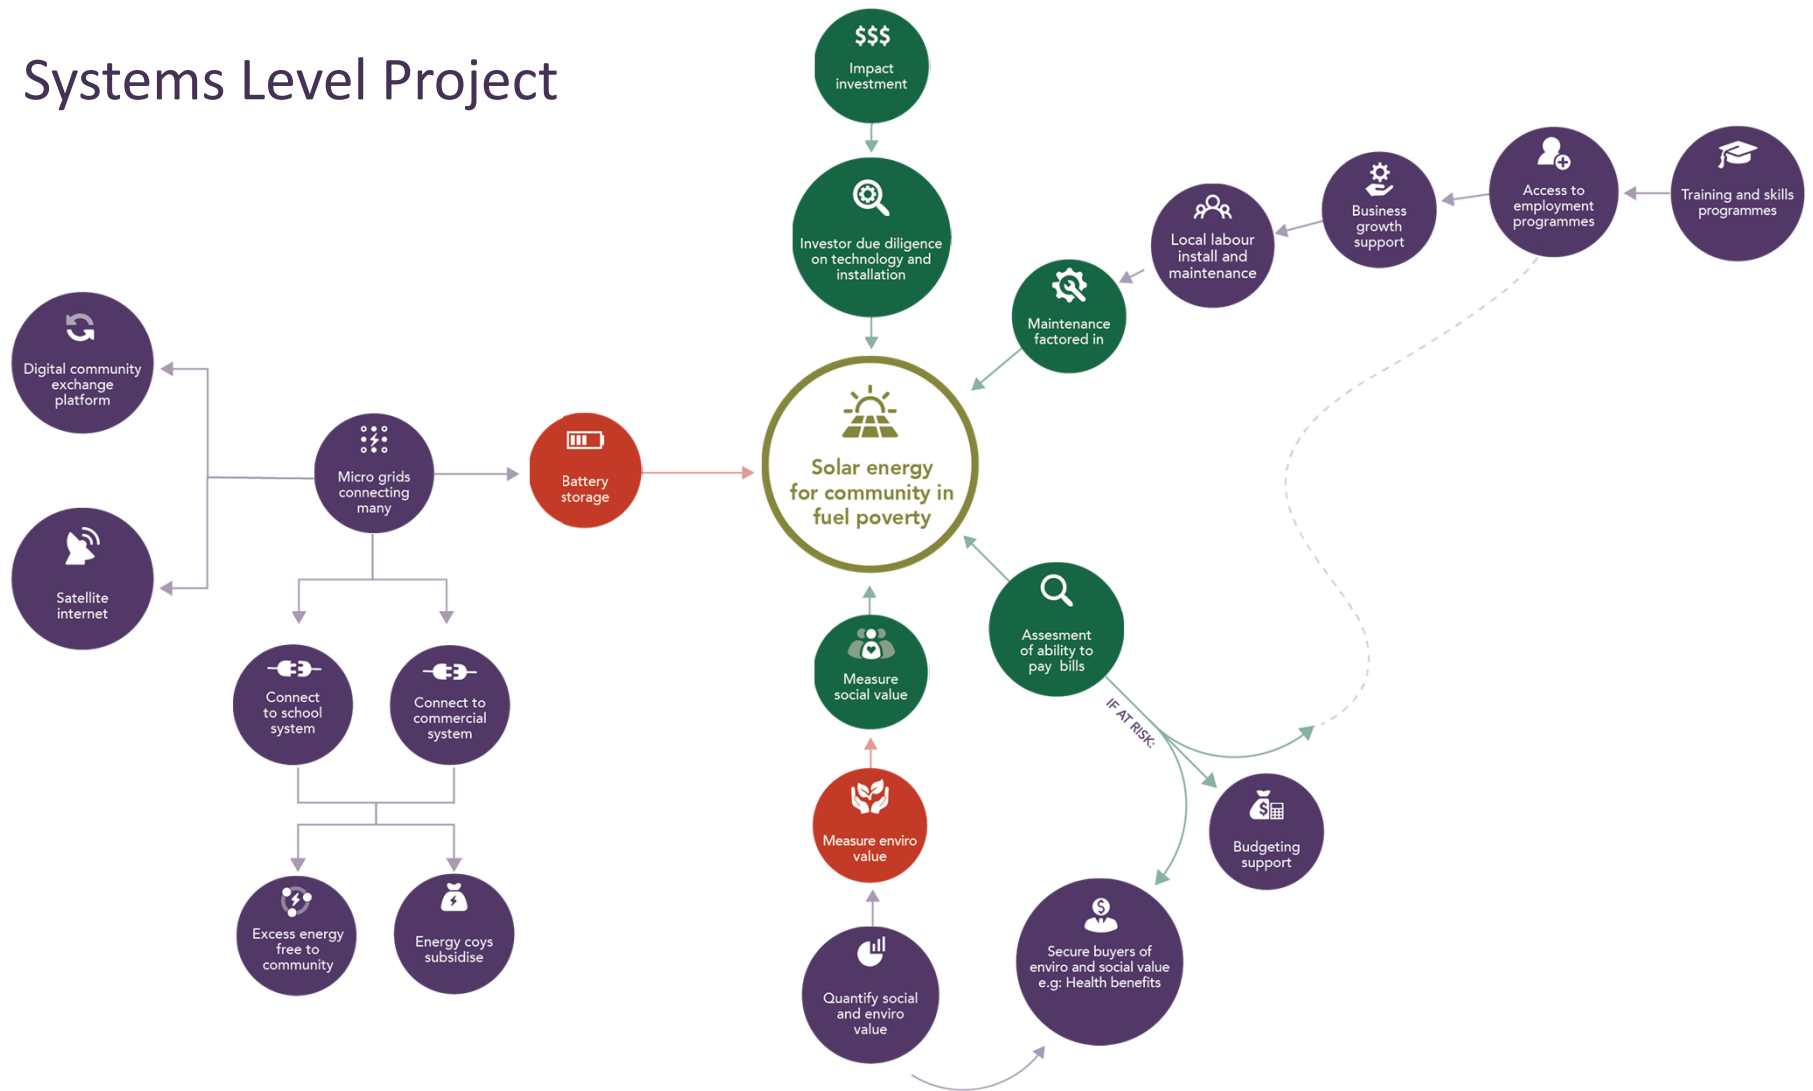

Impact Project

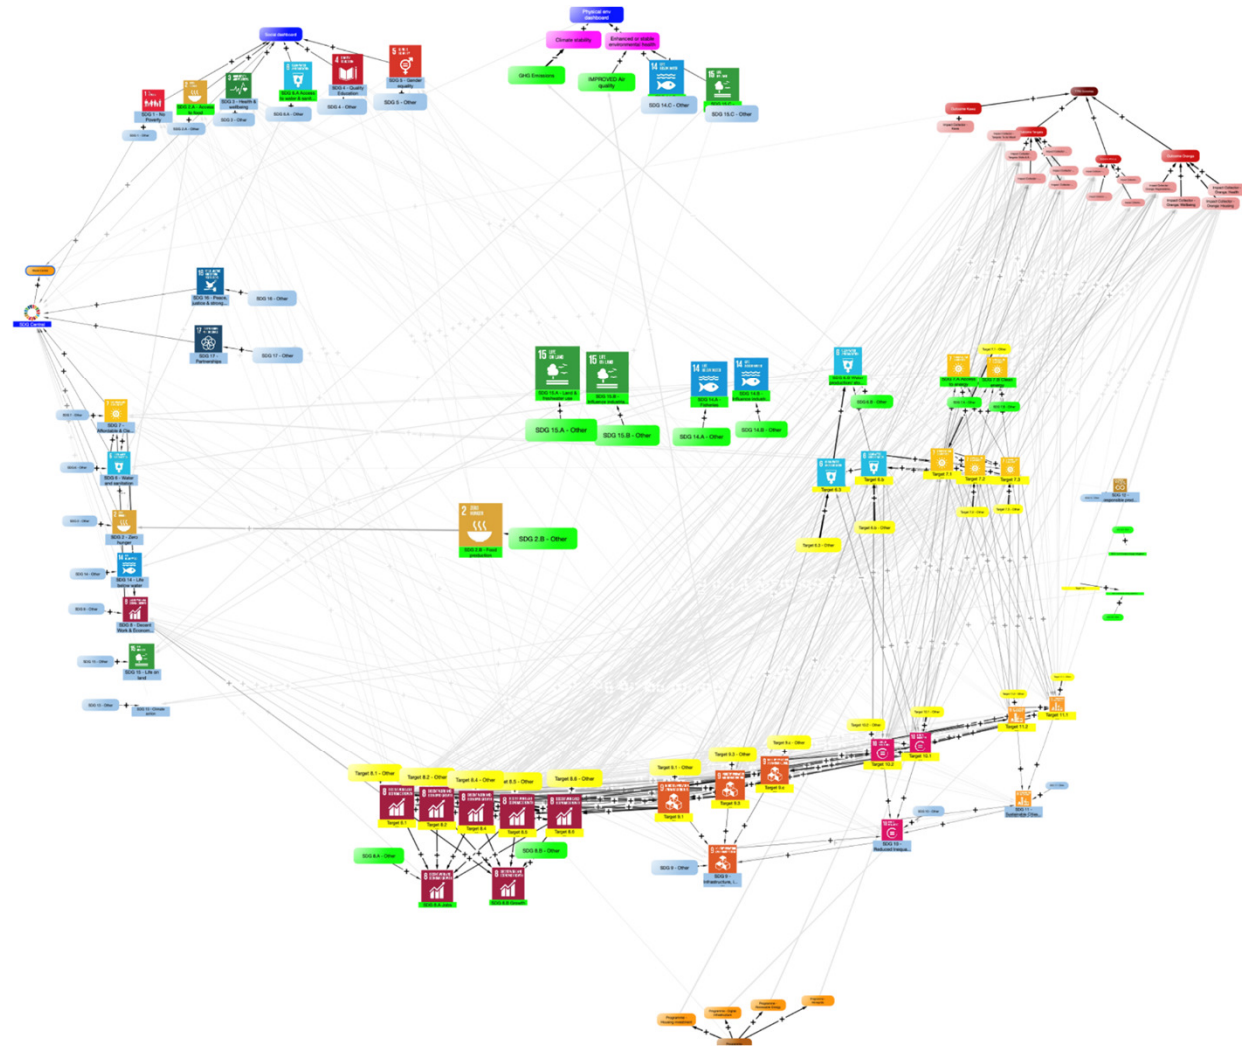

Multiple Impact Project

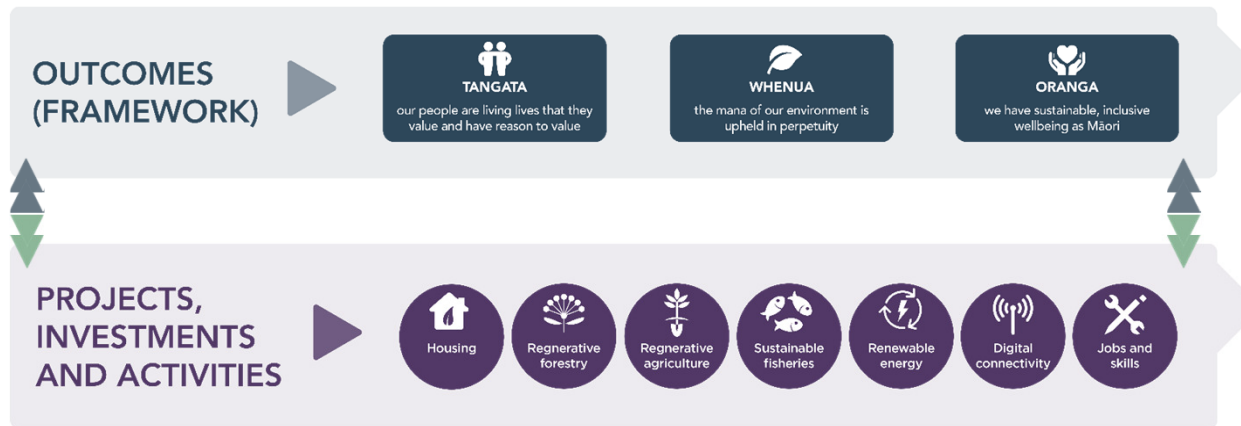

Systems Level Project

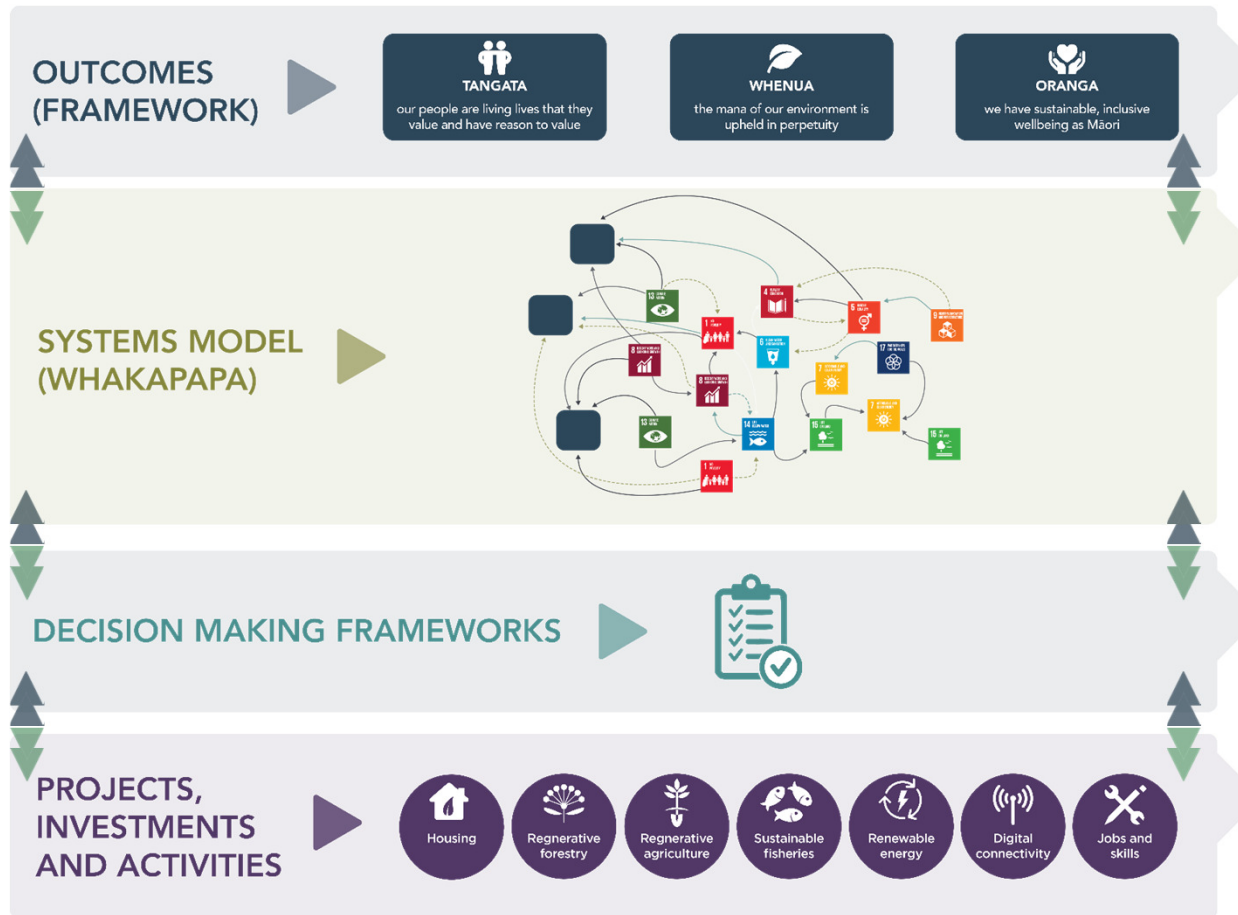

...but real systems
are complex. This is
a model for one
project.

The standard approach

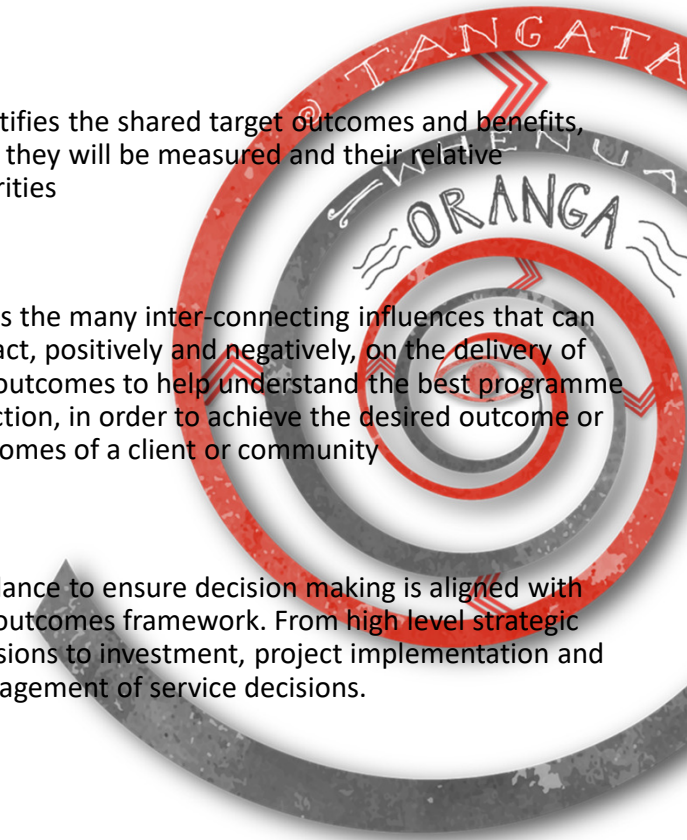

The systems (whakapapa) approach

Identifies the shared target outcomes and benefits, how they will be measured and their relative priorities

Maps the many inter-connecting influences that can impact, positively and negatively, on the delivery of the outcomes to help understand the best programme of action, in order to achieve the desired outcome or outcomes of a client or community

Guidance to ensure decision making is aligned with the outcomes framework. From high level strategic decisions to investment, project implementation and management of service decisions.

What insights can we gain from systems models?

1. Starting from a single outcome/return:

Identify what project/ investment or combination of projects/ investments are best able to maximise ROI for a desired outcome.

2. Starting from a single project / investment:

Identify how to deliver the project/ investment in a way that maximises ROI both at the project level and the system level.

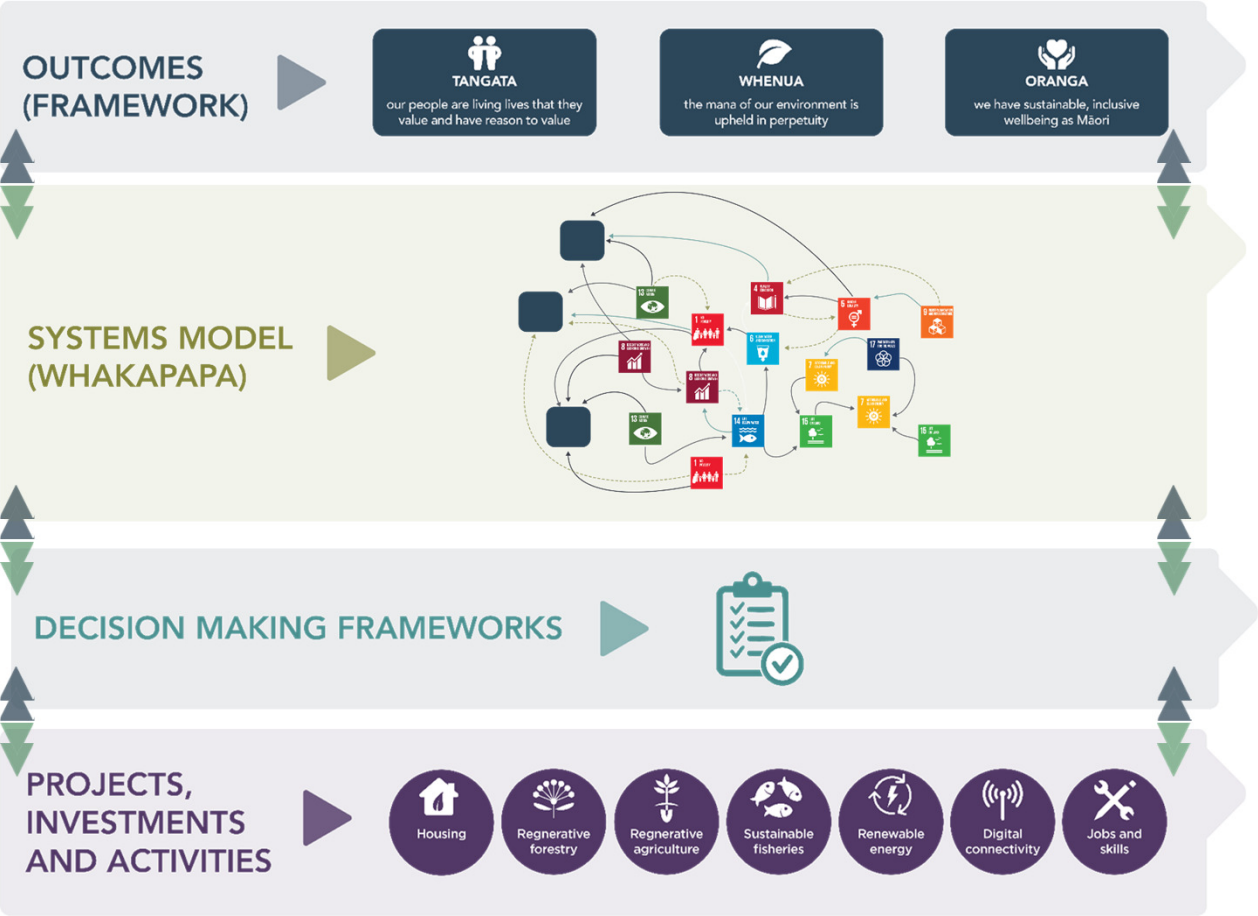

3. Developing a portfolio level approach:

Identify what combination of projects/ investments will best deliver the outcomes.

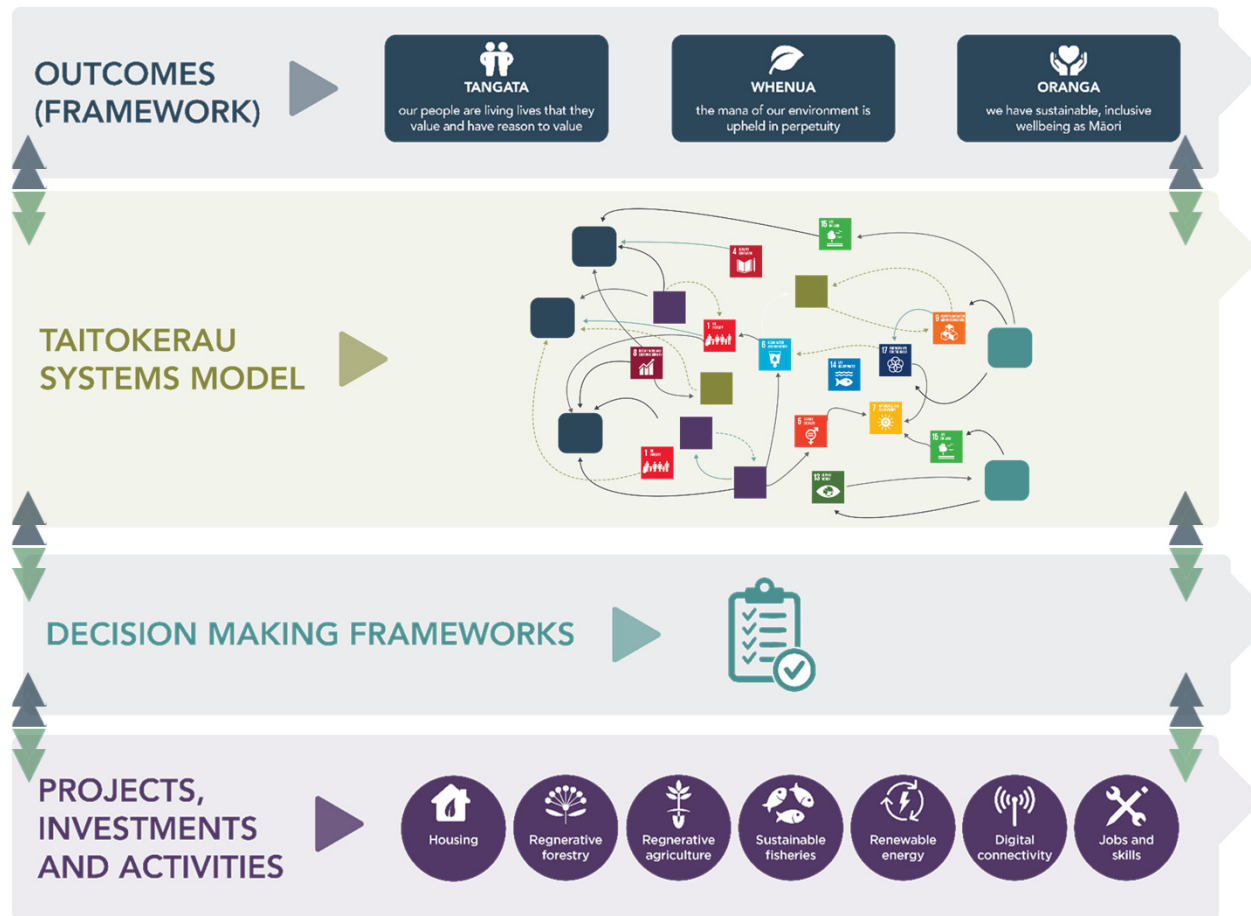

Systems modelling – step 1

Step 1:
UN SDG core model – extract generic insights of relevance

Systems modelling – step 2

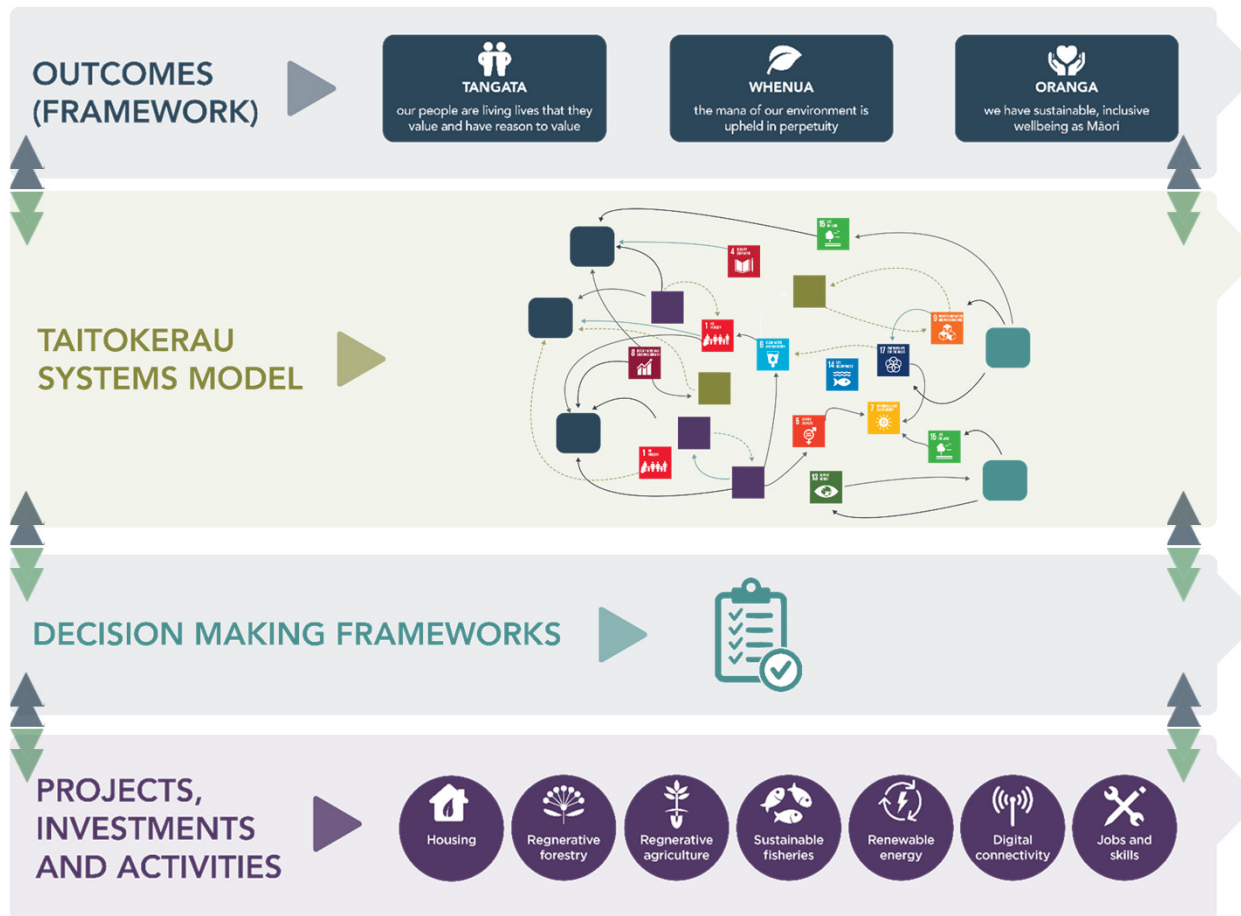

Step 2:

Create Taitokerau Model – starting with the core model, connect local outcomes, projects, missing influences and adjust weightings.

Systems modelling – step 3

Step 3:

Run scenarios to answer key questions and to feed in to Decision Frameworks

TRANSFORMING TAITOKERAU FOR GOOD
