Ring Size Guide

To determine your ring size, print this page at 100% or full scale. Make sure the “Scale to fit” option is unchecked in the print dialogue box. To ensure this has been printed properly, use a ruler to measure one of the samples below. They should measure 2 inches or 20 millimeters, respectively.

1. Select a ring you already own that perfectly fits the finger on which you will wear your Sar ring.
2. Align your ring with the circle below that mostly closely matches in size. The inner edge of your ring should align with the outer edge of the circle.
3. If your ring appears to be between two sizes, we suggest you choose the larger size.

Please note that this ring size chart is for reference only. SAR cannot be held liable for any errors that occur as a result of using this chart.
