

Companies that have been Validated, have been approved by the Massachusetts CCC, have received training and instructions and have signed the Massachusetts Metrc API user agreement, these companies have also demonstrated their ability to perform the functions specified in the validation section of the table below. These approved Integrators have been provided with access to the Metrc application programming interface and can integrate with each area specified.

Even though the integrators provided in this list have been granted access to the API it is the responsibility of the licensee to enter accurate information into the Validated system in order to comply with Massachusetts CCC rules and regulations. Neither Franwell nor the Massachusetts CCC tests or vouches for the integrators development and/or quality assurance process, nor the overall feature or functionality of the member’s solution(s). The validation process only validates the integrators ability to perform the specific functions identified. As an example, the validation process only verifies that the integrators system has the ability to successfully “put” a package into the Metrc system, it does not validate whether or not the quantity or unit price of the package is in fact accurate. Industry participants will need to work directly with the member to obtain support for their solution. A licensee may only provide their API key (confidential information) to a Massachusetts CCC approved vendor.

Metrc will add to the list as companies become certified over time. If you have questions about this list or the process of approval or validation, including how your business could become validated, please contact Metrc at api-info@metrc.com.

MA/ Metrc Validated Integrator List
