

SECTION 321 SPECIALIST OPENS NEW ECCF AT CHICAGO O'HARE INTERNATIONAL AIRPORT (ORD)

New York based International Bonded Couriers, Inc. (IBC) will soon open a new Express Consignment Clearance Facility (ECCF) at Chicago's ORD airport. With the addition of the new Chicago facility, IBC will now operate 4 ECCF's with the others located in Miami, New York and Los Angeles.

IBC's Express Consignment Clearance Facilities enable efficient duty free import of e-commerce parcels and other time sensitive shipments. Having multiple ports of entry allows shippers to strategically route their parcels for the lowest cost, final mile delivery. IBC is the largest non-integrator operating these CBP approved facilities in the USA.

IBC: The industry expert for e-commerce parcel import and delivery processes:

- National US CBP License
- Customs Trade Partnership Against Terrorism (CTPAT) Certified
- TSA Certified Indirect Air Carrier
- CBP Express Consignment Operator
- Integrated CBP Section 321 informal entry processes

By using our facilities, all aspects of your import processes can be fully integrated, including our proprietary IT platforms, with secure bilateral data exchange for integrated clearance, importing and delivery tracking/milestones.

E-commerce shippers and importers now have an unparalleled ability to clear via Express or Cargo processes (IBC Container Freight Stations - CFS) at the 4 IBC gateways. E-commerce transport providers, retailers, global integrators and specialty express companies can now rely on IBC in Chicago as they have for decades in New York, Miami, Los Angeles and around the country.
