Q-Power

Track your electricity consumption

nq-9021-EU

The *Electricity Analyst*

Q-Power provides a **cost-effective solution** which helps you to better **understand the energy consumption** detected by your electricity meter.

It is a device that is attached to your existing mechanical or electronic power meter, **measures consumption data** and **visualizes it** in your NorthQ **HomeManager** account. To use **Q-Power** you need a **NorthQ gateway (Q-Stick, Q-Gate, Q-Gate Pro)**, which provides the connection between **Q-Power** and **your computer or mobile device** by using our platform **HomeManager**. Through the platform you can **easily visualize** and **optimize** your **energy consumption**.

Q-Stick

Q-Gate

Q-Gate Pro

How It *Works*

Directly Connected To Your Electricity Meter

Q-Power has a sensor head suitable for mechanical and electronic electricity meters.

Benefits

Make Electricity Visible

Thanks to **Q-Power** you can see **when** and **how much electricity** do you consume and **analyze your consumption behavior**, so you can **reduce easily your electricity bill**.

Reduce Your Total Electricity Consumption

Get **comprehensive** and **easy to understand information** from **HomeManager** electricity graphs to **improve your consumption behaviour** and **make savings** of between **10 and 25%**.

Control Your Expenses

Set an electricity budget, and **track any over-consumption**.

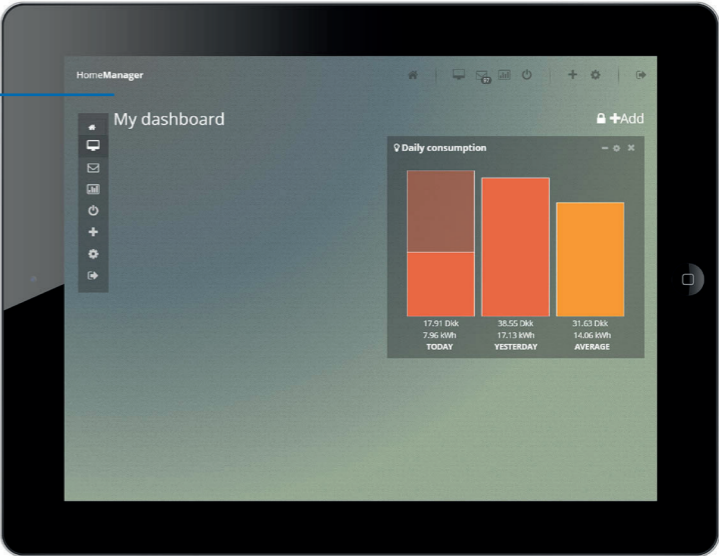

Compare Consumption

Get insights into your consumption behavior by **comparing different time periods**. See how your daily energy-saving efforts will **reduce your electricity bill**.

Track Your Electricity Consumption

Q-Power provides an **automatic** and **extremely accurate solution** for **tracking electricity consumption**. It enables you to forecast your **future consumption**.

Keep An Eye On Your Family

Follow the **electricity consumption** in your home and be sure that your kids are back home from school.

Data Backup

In case of **internet connection problems** Q-Power can store consumption **data for up to 3 months**. This information will be uploaded when the internet connection is restored.

Works on Every Device, Everywhere

Q-Power is designed to work on **Android**, **iOS** and **Windows** devices.

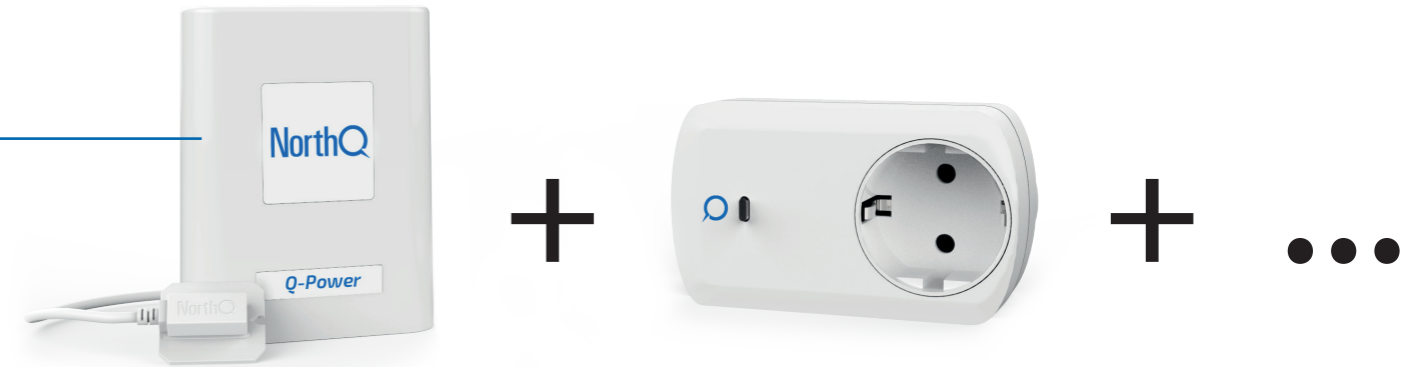

Plug & Play Installation

With the **easy** to follow instructions, *Q-Power* takes approximately **10 minutes** to install, without the need of a certified technician.

Expandable & Customizable

Q-Power can easily be used with all NorthQ products like **Q-Gas**, **Q-Plug** and other compatible **3rd party Z-Wave devices**.

Technical *Specifications*

- Supports ***mechanical*** and ***electronic meters***.
- ***12 months*** average battery lifetime.
