

Sexy Vegan 4 President 2020

I do NOT accept campaign contributions but I do accept free publicity & votes :-) sexyvegan.net

Political Party: Independent

Platforms:

1. Anything that causes confinement, torture &/or violence against innocent living beings will be made illegal my 1st day in office via executive order and believe it or not this action benefits the oppressors as well who falsely believe they are benefiting from the confinement and suffering of the innocent living beings.
2. Captivity of innocent individuals will be abolished & systems of oppression will be broken down rapidly as well as incarceration alternatives to law breaking citizens that correct them & put them to work benefiting society as opposed to stewing in jails and costing tax payers money while they build up anger in jail.
3. Homelessness needs to end completely and my plan will end it immediately, the current system makes it almost impossible for homeless people willing to work to get paid jobs and that is easy to fix by taking out the arbitrary nonsense involved in applying for a job where you need an address and phone number to get hired but you cannot afford one until you have a job, it is a catch 22 and even if you have those things employers often still make it hard and judge. I will offer tax cut incentives for hiring of these individuals as well as government subsidies which will easy be covered by the reduction of paying construction workers to build prisons and prison guards. Money will stop be funded to pay for suffering and it will be funded to end it! Homelessness is not only a big problem for the homeless individuals but also hurts the ambiance of society.
4. Public Restrooms will be provided every so often in public and free for all to use so there will be no more urine on the sidewalks

from homeless people, drunk people, and people who cannot hold it in.

5. Victimless Crimes such as Drugs & Prostitution will be legalized as well as nudity. It is absolutely absurd that these are illegal. If prostitution was legal rape would cease to occur because men could pay in a competitive marketplace to have their sexual needs met by willing partners compensated for this favor. Even though I do not personally use any illicit drugs anymore or even drink or smoke people who choose to do these things if they are not hurting anyone else should be allowed to so that the power is taken out of the hands of the violent drug cartels and prices would go down so people can not only know what they are getting but also have money left over to take care of their families instead of spending it all on overpriced illegal drugs. A tax comparable to the current cigarette tax would be placed on the drugs which could fund Public Restrooms and other endeavors that HELP society instead of filling up jails and paying prison guard to torture people.
6. Age of Consent Lowered to 14 nationally. This is the age of consent in Italy & Germany. America's pedophile hysteria is utter nonsense. If this age of consent is appropriate for Italy & Germany it is fine for here, the notion a particular location changes things is utter nonsense.
7. My plan will end the vast majority of cancer, heart disease, diabetes, world hunger, homelessness, environmental problems, disease, bullying, depression, so called "mental illness", gun violence & create an enjoyable non judgemental atmosphere instead of a toxic atmosphere ruled by systems of oppression that actually do not benefit the opposers as much as they think but hurt them too. For example, pee on the sidewalks and seeing homeless people living on the streets creates a less enjoyable atmosphere for the rich people as well. This is just one example.
