

# **TOMATO**

## INTERNATIONAL MARKETS 2019

# TOMATOES ARE OUR PASSION!

For the past 65 years we have been devoted in our quest to find the best tomato varieties for producers and consumers!

To create new seeds that will result in successful crops, we work at the intersection between farming and crop innovation. Our 2019 range has been expanded to include productive varieties, which are even more disease and pest resistant, and adapt well to the specific constraints tomato producers face. Innovative varieties are available for every cultivation technique and method of distribution.

We pay close attention to consumer trends and prioritise how our tomatoes taste. The Gautier Semences range features varieties with distinct profiles. Heart-shaped tomatoes with a ribbed surface are our speciality. These are full-bodied, delicious and particularly appealing due to their unique, brightly coloured and versatile nature (use in salads, as snacks or for cooking). Solid performers include Cauralina, Marbonne, Marnero and Margold. These varieties are well-known for their flavour and consumers purchase them repeatedly(\*).

(\*) In France, flavour is considered to be consumers' top priority when it comes to tomatoes, according to the Kantar World Panel study entitled "Fresh tomatoes: encouraging people to eat more of this staple vegetable" – June 2018.

## The standard abbreviations :

<b>ToMV:</b> Tomato mosaic virus	<b>Va:</b> Verticillium albo-atrum
<b>TSWV:</b> Tomato spotted wilt virus	<b>Vd:</b> Verticillium dahliae
<b>TYLCV:</b> Tomato yellow leaf curl virus	<b>PI:</b> Pyrenochaeta lycopersici
<b>Pf:</b> Passalora fulva (ex Fulvia fulva)	<b>Ma:</b> Meloidogyne arenaria
<b>Fol:</b> Fusarium oxysporum f.sp. lycopersici	<b>Mi:</b> Meloidogyne incognita
<b>For:</b> Fusarium oxysporum f.sp. radicle-lycopersici	<b>Mj:</b> Meloidogyne javanica
<b>On:</b> Oidium neolyopersici (ex Oidium lycopersicum)	<b>HR:</b> High/standard resistance
	<b>IR:</b> Intermediate/moderate resistance

The advice and suggestions, as well as the information mentioned above, are provided for guidance only and can not therefore provide a guarantee of results.  
All varieties illustrated in this paper were photographed under favourable conditions; their behaviour can vary depending on culture conditions.

**+ ORGANIC**

For some of our varieties, organic seeds are also available. You can easily identify them with the ORGANIC label. If you wish to obtain more information on our product range, feel free to contact your Gautier Semences Sales representative.

# SNACKING

## SWEEDOR C88 HF1

Attractive and delicious cherry on the vine

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/Pf:A-E **IR** Ma/Mi/Mj

Yellow round cherry on the vine. Average weight 12-14 grams. Attractive deep yellow fruits with good Brix level and flavour. Vigorous and generative plant for long crop production. Suitable for heated and non-heated crop production.

## RAZOLO HF1

The orange cherry plum: attractive and tasty

**HR** Va:0/Vd:0/Fol:0

Cherry plum tomato of a beautiful orange colour. Nice fruity flavour and very good fruit quality throughout the season. Average weight: 10-14 grams. For protected crop production.

## RIMINI K7 HF1

Cocktail type with a smooth and tasty flesh

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0 **IR** Ma/Mi/Mj

Small cocktail tomato for cluster harvest. Beautiful fruit colour and vine presentation. 10 fruits clusters. Average weight 22-25 grams. High yielding variety with excellent taste quality. Plant well balanced and easy to drive, suitable mainly for hydroponic production.

\*The varieties presented under a number are available for testing until their registration in the official catalogue.

# SNACKING

## APETICIO HF1

**A flavour second to none**

**HR** ToMV:0-2/Fol:0/For/Pf:A-E **IR** Ma/Mi/Mj

Egg-shaped cherry tomato, very tasteful.  
Average weight 9-12 grams.  
For protected crop production.

## BELLACIO HF1

**Tasteful cherry plum**

**HR** ToMV:0-2/Fol:0/For/Pf:A-E **IR** Ma/Mi/Mj

Cherry plum tomato with a nice red colour.  
Average weight 10-14 grams. Very tasteful.  
Variety for loose harvest.  
For protected crop production.

## CAPRICCIO HF1

**Mini plum tomato with outstanding taste**

**HR** ToMV:0-2/Fol:0/Pf:A-E **IR** Ma/Mi/Mj

Mini plum type with egg-shaped fruits combining productivity and flavour. Plant of medium vigour with short internodes, very productive. Beautiful fruit colour, bright red, and excellent flavour.  
Average weight 8-10 grams.  
For non-heated or heated protected crop production, in soil or hydroponic.

**+ ORGANIC**

## TASTYNO HF1

**Delicious and resistant to TYLCV**

**HR** ToMV:0-2/Pf:A-E **IR** Ma/Mi/Mj/TYLCV

Cherry tomato for loose harvest, combining taste quality, productivity and resistance to TYLCV.  
Vigorous plant with ramified clusters. Very productive.  
Round fruit, bright red, with excellent flavour.  
Average weight: 12-15 grams. Excellent shelf-life.  
For non-heated or heated protected crop production, in soil or hydroponic.

**+ ORGANIC**

## C535\* HF1

**The high yielding cherry plum**

**HR** ToMV:0-2/Fol:0/Pf:A-E **IR** Ma/Mi/Mj

Red baby plum with 18-20 grams fruit weight on average.  
High yielding variety, adapted for loose picking in high tech greenhouses with good heating capacity.

## K538\* HF1

**The premium cocktail**

**HR** ToMV:0-2/Fol:0/For/Pf:A-E **IR** Ma/Mi/Mj

High flavor red cocktail with a good presentation on the vine.  
50-55 grams fruit weight on average.  
Really vigorous plant ensuring important yield.

# SPECIALITIES

## CAURALINA HF1

The garden-fresh flavour of tomato

**(HR)** ToMV:0-2/For/Fol:0

Heart-shaped tomato which combines yield and flavour in every season.

Very attractive red coloured fruit. Strong fleshy variety with excellent flavour. Homogeneous shape and size.

Average weight: 160-200 grams.

Suitable in soil or hydroponic.

Early sowing and long cultivation requires you to graft one head.

**+ ORGANIC**

## HP576\* HF1

The pink heart-shaped tomato

**(HR)** ToMV:0-2/Fol:0/TSWV(0)

Pink heart shape tomato of 250 grams.  
Original taste due to a very melting texture in mouth.  
Longer fruit set.  
Suitable in soil or hydroponic.

## CORIZIA DCC108 HF1

Resistance to TSWV

**(HR)** ToMV:0-2/For/Fol:0/TSWV(0)

Vigorous and generative plant.  
Yielding variety producing nice red, firm and fleshy fruits with a good shelf-life.  
Good resistance level to TSWV.  
Average weight 250-300 grams.  
Suitable for heated and non-heated long crop production.

## CORDELIS DCC551 HF1

High yield and powdery mildew resistance

**(HR)** ToMV:0-2/Fol:0,1/Pf:A-E **(IR)** On

Vigorous and generative plant very consistent through the all cycle. Very high yield potential with uniform fruit size of 200-250 grams.  
Variety with pouldry mildew and cladosporium resistances.  
Adapted to high tech greenhouses and long cycles.  
It is advised to prune the trusses at 3 or 4 fruits.

HP576

BARTOLINA

## BARTOLINA HF1

Tasteful pear-shaped tomato resistant to TSWV

**(HR)** ToMV:0-2/Va:0/Vd:0/For/TSWV(0)

Medium vigour plant. Long foliage for a good coverage.  
Good fruit setting. Pear-shaped fruit with a slight green shoulder, medium ribbed, uniform bright green colour at maturity.  
Smooth and tasteful flesh.  
Average weight 240-280 grams.  
For non-heated crop production, in soil.

Sweetness and personality

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/For

Black ribbed tomato uniformly graded fruit. Average weight 190-250 grams. Grafting and cluster pruning 3 fruits recommended. All kinds of crop production.

**+ ORGANIC**

### RP574\* HF1

The tasty pink ribbed tomato

**HR** ToMV:0-2/Va:0/Vd:0

Large ribbed pink tomato that weight around 350 grams. Fruits have an enjoyable melting texture and an original pink flavor. The plant is short and vigorous. All kinds of crop production.

### DJ549\* HF1

The ivory ribbed tomato with a unique taste

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/Pf:A-E

Ribbed fruit with a very unique color, light yellow to ivory. Fruits have an original acidulous taste and weight 200 grams on average. Suitable for both heated and non-heated crop production.

### DN573\* HF1

The chocolate ribbed tomato, original and productive

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/Pf:A-E

**IR** Ma/Mi/Mj/TYLCV

The chocolate colour and the taste of this ribbed tomato are really original. Average weight of 280 grams. The plant is modern, adapted to high tech crops and productive.

**GAUTIER**  
seeds

## MARSILIA HF1

The ribbed tomato combining yield and resistances

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/For/Pf:A-E

Flat and ribbed fruits with a bright red colour and a good firmness. Average weight 250-300 grams. Well balanced plant. Grafting recommended. Suitable for long crops in heated and non-heated structures.

**+ ORGANIC**

## DN548\* HF1

The black ribbed productive and TYLCV resistant

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/For/Pf:A-E

**IR** Ma/Mi/Mj/TYLCV

Black ribbed tomato with an average weight of 280 grams. The plant is continuously vigorous and very productive. This variety is specially adapted to high-tech green-houses.

DN548

## EBENO HF1

Intensity of colour and flavour

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0

Black tomato with round fruit. Average weight 90-110 grams. Original presentation and flavour. For truss or loose crop production. Average plant vigour and excellent fruit setting. Even clusters of 6 to 8 fruits. For heated hydroponic crop production.

## KAKAO HF1

The black tomato full of flavour

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0

Very vigorous plant. Slightly flattened globe fruit. Dark brown with a green collar. Modern plant adapted to early sowing. High yield and taste quality. Original product with a strong differentiation. Good shelf life. Calibre: 57-67. Average weight: 130-150 grams. For protected crop production.

**+ ORGANIC**

## MIMOSA DJ129 HF1

The eye-catching yellow truss

**HR** ToMV:0-2/Va:0/Vd:0/Fol:0/For

Intense yellow round truss tomato. Very good fruit and truss presentation, throughout the season. Five or six fruits on the truss. Good shelf-life. Average weight 120 grams. Suitable for heated and non-heated crop production.

## TIMENTA HF1

**HR** ToMV:0-2/For

Red background with green stripes. Very tasteful. Average weight: 110-130 grams. Adapted to early sowing. For protected crop production, in soil or hydroponic.

## TIVERTA HF1

**HR** ToMV:0-2/For

Yellow background with green stripes. Taste: Original acid. Average weight: 110-130 grams. Adapted to early sowing. For protected crop production, in soil or hydroponic.

**+ ORGANIC**

## TIROUGE HF1

**HR** ToMV:0-2/For

Red background with yellow stripes. Average weight: 110-130 grams. Adapted to early sowing. For protected crop production, in soil or hydroponic.

\*The varieties presented under a number are available for testing until their registration in the official catalogue.

## AL558 ORINADE\*\*HF1

NEW

# IF LIFE PASSES, THE MEMORY REMAINS

Founder of Gautier Semences – with his father Jacques-Paul in 1952, Henri Gautier channelled his determination and audacity to transform a local seed supplier into a flourishing, innovative and international business.

As he did so, Henri remained faithful to the simple, human and fundamental values that guided him throughout his career: loyalty, humanity, high standards and perseverance.

Charismatic and enterprising, Henri Gautier was a respected figure in the various professional spheres in which he played an active role:

- Secretary of the Provence Union of Grain Producers from 1970 to 1981, and president from 1982 to 1994.
- Member of the Federation of Vegetable Seed Professionals since 1969, and vice-president from 1991 to 2004.
- President of the local branch of “Professional Markets” from 1975 to 1985.
- Member of the “Vegetable Crops” branch of the GNIS from 1969 to 2004.
- French procurement representative for the “Vegetable crop sector” at the Committee for the Protection of Plant Procurement in 1992.

In 2011, he was awarded the title of “Knight” by the Agricultural Order of Merit.

In recent years, Henri’s son Jacques Gautier took over the management of the company, thriving with the same passion, skill and mind set that had animated his father.

Driven by a profound sense of faith, Henri Gautier was always able to view the future with confidence. We assure you that his legacy will remain and be reflected upon each and every one of our endeavour.

## QUALITY COMMITMENT

Good Seed and Plant Practices (GSPP) is an international, transparent business chain system whose purpose is to prevent tomato seed and plant lots from being infected by *Clavibacter michiganensis* subsp. *michiganensis* (Cmm). Gautier Semences has been accredited since July 2011. This accreditation covers the entire process of design and production of varieties. This accreditation demonstrates the commitment of all teams in Gautier to deliver the highest level of quality on the market. [www.gautiersemences.com](http://www.gautiersemences.com)
