

VIONEX

Vionex Whitepaper

A new Smart Home based on the Blockchain Technology for smarter living.

Table of Contents:

1. The future of building and room automation
2. The future of building and home security
3. Collaboration with the blockchain technology
 - 3.1. Advantages of blockchain
 - 3.2. The new standard of smart home safety
4. Smart Home App
5. Vionex ICO
 - 5.1. Why we do token sale?
 - 5.2. Function of the Token
 - 5.3. Vionex products
 - 5.4. Token sale process
6. Roadmap
7. Team
8. Terms and Conditions

1.)The future of building and room automation:

- Fully automated blinds with full control via smartphone or tablet.
- Automatic window tinting in case of disturbing, excessive sunlight.
- Automated controllable lighting with on and off function when entering or leaving the room.
- Automated heating system with on and off function when entering or leaving premises.
- Intelligent cooling system.
- Automatic night cooling if required.

Only the best for your mind and optimal energy savings. Fully automated lighting, sun protection and indoor climate.

2.)The future of building and home security:

- Remote locking system for door and window with smartphone or tablet.
- Clever new camera systems enhanced with blockchain technology.
- Special settings allows special security when you are on vacation, such as direct notification to the police at burglary or the fire department at fire.
- Intelligent smoke detector system, which can distinguish between steam and smoke.
- Highly intelligent alarm system.

3.) Collaboration with the blockchain technology:

How do we use the blockchain technology?

With the help of the blockchain technology every order is noted and our intelligent smart home system learns to do so. This ensures maximum automation. Each process is noted and stored so that automation can only be changed by adjusting the settings. The user has absolute control over the system and through decentralization nobody can access it and change it. The blockchain technology combined with smart home is ready to change the world!

3.1.) Advantages of blockchain:

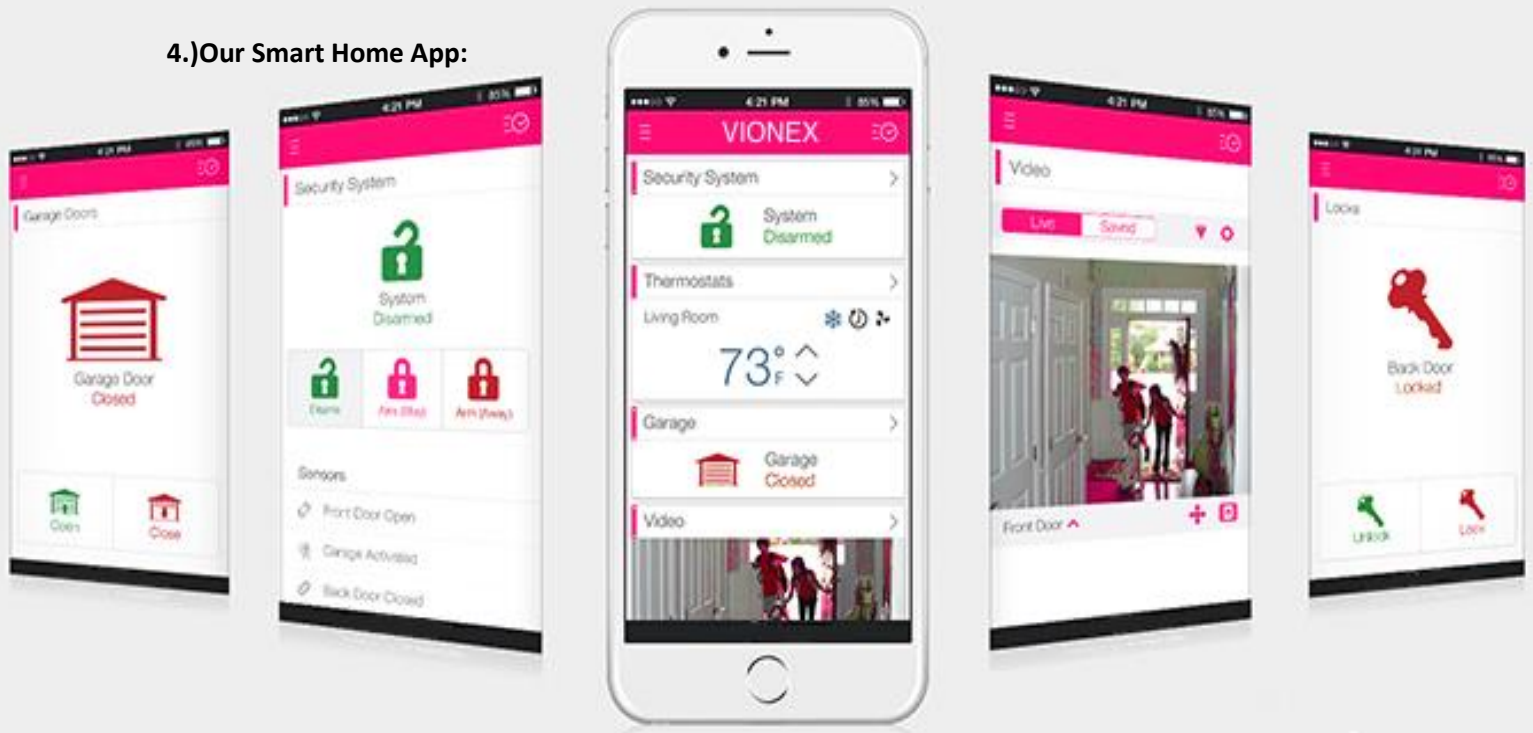

- Blockchain is a solid, distributed, invulnerable and cryptographically secure database.
- The chain of blocks stores the encrypted code of the documents, and once they are stored, the data is recorded forever.
- The perfect place to store property rights, credentials, identities (of objects or persons), agreements between parties, transfers and transactions.
- Nobody can fake, bribe or hack the data written in the blockchain blocks. Transaction theory is transparent to all users.
- Blockchain supports smart contracts (a computer protocol). This facilitates, verifies, enforces agreements and the execution of a contract in an automatic and transparent way.

3.2.) Vionex is the new standard of building and home safety

Counterfeiting of data would no longer be an issue in the development of blockchain. The benefits of the blockchain system are that information is securely stored and fully transparent to all users. It is backed by a multi-sig-authentication system that prevents any alteration of vital signs.

4.)Our Smart Home App:

- Easy to use application.
- Everything at a glance.
- Available on iOS and Android.
- Usable on all devices.

Our smart app has many great features. The application has access to camera systems, automation and smoke detection systems, making it easy to shut down a smoke detector using the application.

Wellness

5.)Vionex ICO:

Introducing Vionex (VIOX), an ERC20-compliant Ethereum token with a fixed supply of 100,000,000 VIOX. During the token start, a fixed amount of VIOX is generated, and thereafter no tokens may be coined. Vionex service tokens will be used to fund the development and commercialization of the Vionex project with associated distributed database, online portal and applications as described in this document.

Based on the ERC20 token standard, Vionex enables easy integration into user wallets and is freely tradable via direct transfers or smart contracts. It is possible that a Vionex token can also be added to cryptocurrencies.

The overall supply of VIOX will slowly decrease over time as tokens are withdrawn from use, for example, if someone with VIOX loses their private key. Therefore, VIOX will be effectively deflationary. As soon as Vionex receives VIOX for services rendered, the tokens will be re-marketed.

As a primary utility, Vionex calculates a transaction fee in VIOX for write access to the database of signing log entries and validation in the blockchain.

5.1.)Why we do token sale?

There are many arguments why we have chosen to do the token sale instead of alternatives ways to raise money:

First, a token sale not only allows us to onboard participants from different regions but also to incentives them to promote Vionex products.

Second, tokens provide liquidity since they can be traded on various exchanges after the token sale. Participants can liquidate their position and benefit from growth of token market value.

Finally, the token smart contract enables easy distribution of tokens to participants, instant payments with tokens, security and transparency, which would be hard to achieve without usage of blockchain technology.

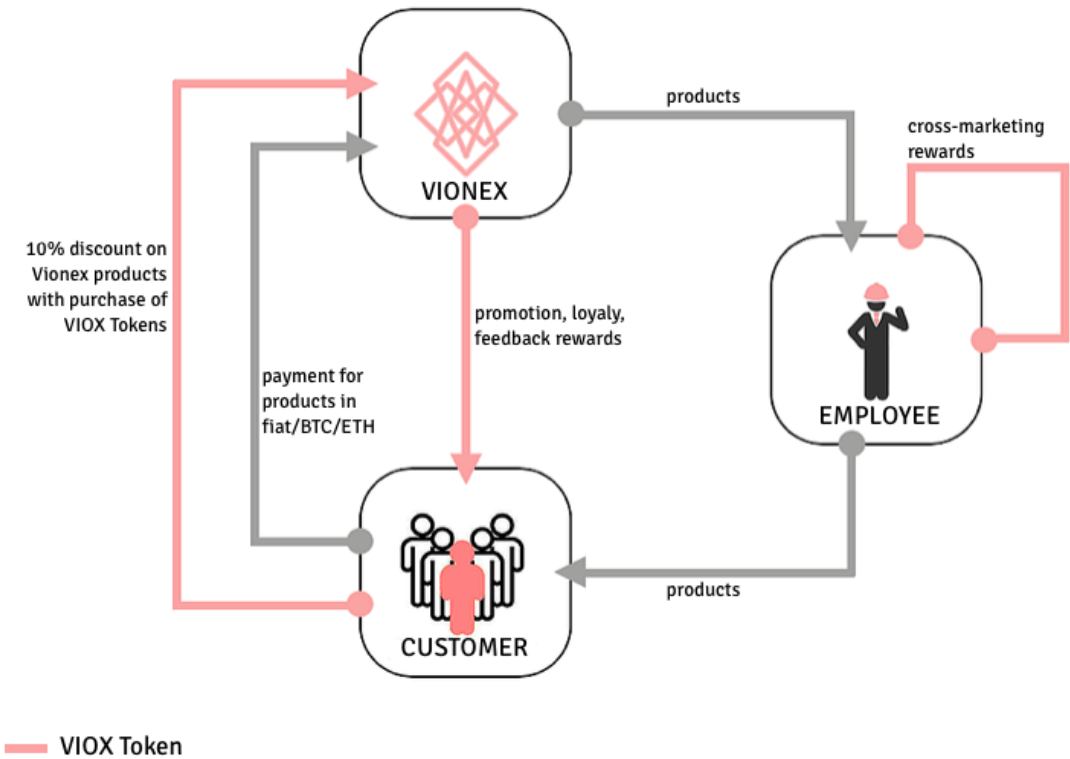

5.2.)Function of the token:

Vionex (VIOX) token is integrated with Vionex products. It helps to improve product use, contribute to the ecosystem, product access and ownership. While the token provides access to valuable features within the Vionex platform, Vionex mobile applications do not restrict it. Vionex tokens can be used to generate revenue for Vionex and provide additional benefits to token holders for the following purposes:

- 1. Subscription fee / transaction fee
- 2. Commission for paid services in Fiat currency or VIOX tokens
- 3. Commission for mediation and customer introduction
- 4. Currency (means of payment) for the purchase of Vionex Smart Home

We've created VIOX with the clear vision that a token must work, be viable, secure, well-funded, inflation protected, better than other coins, and something unique. These are key elements to the solid foundation. More of that, we believe that VIOX will bring both improvements to the company and short and long term gains for investors.

As a long term vision, VIOX tokens would be used in the first phase of project development within the Vionex platform, and in the second, they would become the standard sign in the smart home market.

5.3.)Vionex products:

Our Vionex products are installed and maintained by our employees at the end customer, be it a private individual or a company, and are waited and repaired in case of defective ones. All these services are included in the purchase of Vionex products. The customer can pay us with Fiat currencies, BTC and ETH, but customers who pay us with VIOX tokens get a discount of 10%. Our loyal customers have the following advantages:

- 10% discount on purchase of Vionex products with VIOX tokens.
- A 5% recommendation bonus in VIOX tokens.
- Every loyal Vionex customer receives 3% of his annual electricity bill in VIOX tokens.

We only want the best for our customers, so of course we try to give back as much as possible. We will do our best so that our customers are satisfied with us and of course we look forward to any further recommendation. We welcome our future new customers and are pleased to introduce you to your new, intelligent home.

5.4.)Token sales process:

70% of the fixed 100,000,000 VIOX supply is offered for sale, which equals 70,000,000 VIOX. These are sold in 5 stages with limited presale, followed by general sale. VIOX can be purchased online for 0.5 USD (fifty US cents), with cryptocurrency payment at a current exchange rate on the day of the transaction. Bitcoin (BTC) and Ethereum (ETH) will be the only payment method accepted in the general sale. Minimum investments are either 0,5 Ethereum (ETH) or 200 USD (twohundred USD) in Bitcoin (BTC).

The remaining 30% of the fixed supply (30,000,000 VIOX) are not available via the token sale and will be allocated as follows:

Token assignment:

- ◆ **70 %** (70,000,000 VIOX) Crowdsale
- ◆ **10 %** (10,000,000 VIOX) retained by Vionex
- ◆ **10 %** (10,000,000 VIOX) Reserve
- ◆ **10 %** (10,000,000 VIOX) Further Development

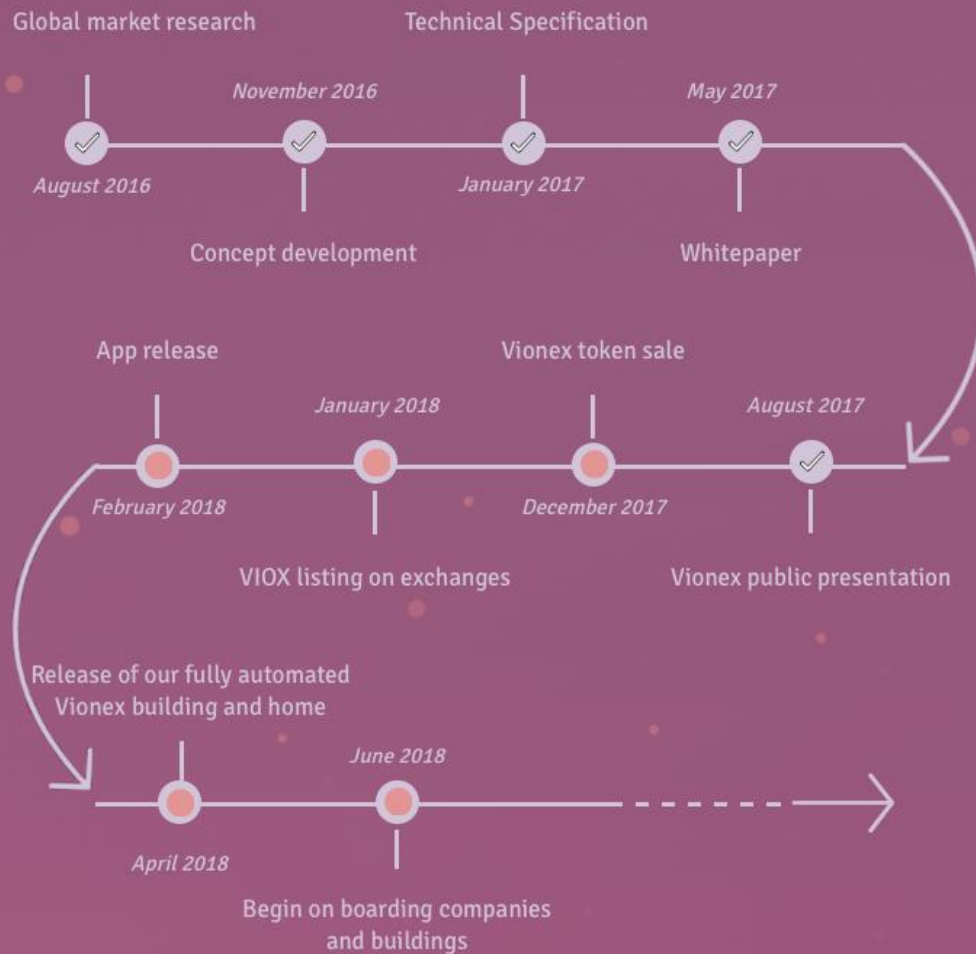

Budget allocation

- ◆ **55 %** Research & Development
- ◆ **13 %** Marketing & Promotion
- ◆ **11 %** Technology Infrastructure
- ◆ **10%** Team
- ◆ **7 %** Legal Consultancy
- ◆ **4 %** Reserve

The token sale is offered until all 70,000,000 VIOX are distributed. Early buyers receive special bonuses that relate to the timing and the purchase price. On the first day investors receive 25% more VIOX, in the first week 20%, in the second week 15%, in the third week 10% and in the fourth week 5%.

ROADMAP

7.)Our Team:

We are 10 professionals in building automation and blockchain technology. Our team includes civil engineers, construction engineers, automation engineers, automation technicians, IT technicians, marketing managers and psychologists. Our specialization combined with the blockchain technology creates the future of room automation and space security.

We're bringing the marketplace for smart home and room automation united with the blockchain technology to a new level. We often forget to think about ourselves. We often forget how important security is in our home. But we often forget to turn off the light when leaving the house and sometimes you also waste a lot of time running back and forth. We solve your problems and circumstances! Why? Because human life and human safety is our priority.

Dr. Peter Collin
Chief Executive Officer

Dr. Peter Collin studied architecture and civil engineering. Later, he wrote his doctoral thesis on intelligent home and the resulting energy savings. Ultimately, he decided to implement everything in Vionex with his team to get a step closer to the future.

George Hall
Chief Operating Officer

George Hall studied international Business Administration and has about 30 years of work experience after graduating from various companies.

Aaron Rosenberg
Chief Product Officer

Aaron Rosenberg has been an experienced automation engineer for 11 years. He has always moved in the field of building automation and has finally joined us to bring the automation together with the blockchain technology to a new, unprecedented level.

Dalvin Patel
Chief Technology Officer

Dalvin Patel is our blockchain and smart-contracts specialist. Originally Dalvin Patel is a specialist in IT-Technology and has been working on blockchain technology for more than 5 years now. Together with Vionex he is ready to change the world.

Ralph Schmitt
Psychologist

Ralph Schmitt has been involved with security psychology for about 25 years. We are happy to have Ralph Schmitt on board. Who has already contributed a great deal to Vionex.

Cara Stone
Software Engineer

Fernando Garcia
Electronic technician for automation technology

Sergej Gromow
IT-Security Engineer, Software Engineer

Steve Ward
Senior Marketing Manager

Rachel Clarke
Public Relations and Marketing Communication Manger

8.)Terms and Conditions:

This section informs you of the Terms and Conditions governing use of the information and functionality offered at www.vionex.io ("Web site") including this present document. By using the Web site, you agree to be bound by these Terms and Conditions.

1. The Web site does not constitute a prospectus of any sort, is not a solicitation for investment and does not pertain in any way to an offering of securities in any jurisdiction.
2. By transferring BTC, ETH, or any other cryptographic tokens ("Cryptocurrency") to obtain Vionex tokens ("VIOX" or "VIOX tokens") and/or receiving VIOX, no form of partnership, joint venture or any similar relationship is created between the user and the creators of VIOX and/or any other individuals involved with the Web site or VIOX.
3. By transferring Cryptocurrency to obtain VIOX tokens and/or receiving VIOX, the user confirms that the user is neither a United States citizen nor resident, and the user does not have a primary residence or domicile in the United States, including Puerto Rico, the U.S. Virgin Islands, or any other territories of the United States, and the user is not acting on behalf of United States citizen, resident or entity.
4. By transferring Cryptocurrency to obtain VIOX tokens and/or receiving VIOX, the user expressly represents and warrants that:
 - a. The user has a deep understanding of the functionality, usage, storage, transmission mechanisms and intricacies associated with cryptographic tokens and blockchain-based software systems;
 - b. The user has carefully reviewed the code of the smart contract located on the Ethereum blockchain at the addresses set forth on the Web site and fully understands and accepts the functions implemented therein;
 - c. The user is legally permitted to transfer Cryptocurrency to obtain VIOX tokens, and is legally permitted to obtain VIOX in the user's jurisdiction;
 - d. The user is legally permitted to receive software and interact with the VIOX tokens smart contract;
 - e. The user is of a sufficient age to legally obtain VIOX tokens;
 - f. The user will take sole responsibility for any restrictions and risks associated with obtaining VIOX tokens by the smart contract system;
 - g. The user is not submitting Cryptocurrency to obtain VIOX for the purpose of speculative investment;
 - h. The user is not obtaining or using VIOX for any illegal purposes;
 - i. The user waives the right to participate in a class action lawsuit or a class wide arbitration against any entity or individual involved with the Web site or with the creation or distribution of VIOX tokens;
 - j. The user understands that submitting Cryptocurrency to obtain VIOX does not involve the purchase of shares or any equivalent in any existing or future public or private company, corporation or other entity in any jurisdiction;
 - k. The user understands and expressly accepts that there is no warranty whatsoever on VIOX, expressed or implied, to the extent permitted by law, and that the smart contract system is used and VIOX are obtained at the sole risk of the user on an "as is" basis and without, to the extent permitted by law, any warranties of any kind, including, but not limited to, warranties of title or implied warranties, merchantability or fitness for a particular purpose;
 - l. The user understands that the user has no right against any party to request any refund of the Cryptocurrency submitted to obtain VIOX tokens under any circumstance;

- m. The user understands that the user bears the sole responsibility to determine if the transfer of the Cryptocurrency to obtain VIOX tokens, the obtaining, ownership, or use of VIOX, and/or any other action or transaction related to VIOX may have tax implications for the user;
 - n. By obtaining, owning or using VIOX, and to the extent permitted by law, the user agrees not to hold any party liable for any tax liability associated with or arising from obtaining, owning or using VIOX or any other action or transaction related to the Web site.
5. The user acknowledges and agrees that, to the fullest extent permitted by any applicable law, the user will not hold any developers, contractors or creators of VIOX tokens and/or the Web site liable for any and all damages or injury whatsoever caused by or related to the use of, or the inability to use, VIOX tokens or the Web site under any cause or action whatsoever of any kind in my jurisdiction, including, without limitation, actions for breach of warranty, breach of contract or tort (including negligence) and that developers, contractors or creators of the Web site and/or VIOX tokens shall not be liable for any indirect, incidental, special, exemplary or consequential damages, including for loss of profits, goodwill or data, in any way whatsoever arising out of the use of, or the inability to use the Web site and/or VIOX tokens.
 6. By obtaining, holding or using VIOX tokens, and to the extent permitted by law, the user agrees not to hold any third party (including developers, contractors or creators) liable for any regulatory implications or liability associated with or arising from obtaining, owning or using VIOX or any other action or transaction related to the Web site.
 7. The user understands and accepts that the network of miners will be ultimately in control of the VIOX tokens smart contract. The user understands that a majority of these miners could agree at any point to make changes to the official smart contract system and to run the new version of the smart contract system.
 8. The user agrees that if any portion of these Terms and Conditions is found illegal or unenforceable, in whole or in part, such provision shall, as to such jurisdiction, be ineffective solely to the extent of such determination of invalidity or unenforceability without affecting the validity or enforceability thereof in any other manner or jurisdiction and without affecting the remaining provisions of the Terms and Conditions, which shall continue to be in full force and effect.
 9. These Terms and Conditions are effective as of 1st December 2017 and will remain in effect, except with respect to any changes in their provisions in the future, which will be in effect immediately after being posted at www.vionex.io. The Terms and Conditions can be updated or changed at any time and you should check these Terms and Conditions periodically. Your continued use of the Web site and/or VIOX tokens after any modifications to the Terms and Conditions are posted at www.vionex.io will constitute your acknowledgement of the modifications and your consent to abide and be bound by the modified Terms and Conditions. For any material changes to these Terms and Conditions, we will notify you either through the email address you have provided on the Web site.
