

## INSTRUCTIONS FOR TATTOO CLIENTS

The outbreak of the new coronavirus (SARS-CoV-2), which causes covid-19 respiratory infection, has contributed to large sections of the danish business community temporarily forced shut down.

This also applied to Handshake Studio and the rest of the tattoo industry. The reopening of the community is at a slow and controlled pace as the government has decided that tattoos and other businesses with one-on-one contact can resume working, provided great care is taken  
- both by the employee as well as the customer.

Therefore, to reduce the spread of infections of respiratory infections, we are introducing strict hygiene measures that will be a permanent part of our work in the future. The purpose of the measures we introduce is to protect both customers and employees.

Hence the importance that ALL customers comply and follow our instructions so that we can reduce the risk of infections and prevent the spread of the coronavirus. Although our workflow is made more difficult by the coronavirus, we at Handshake Studio would like to take the lead to ensure a safe and good experience. Just like we always have.

As trained professionals in hygiene and daily limiting infections and spreading other diseases - we work with sterile equipment in an ultra-clean environment. You can safely get tattooed with us, it will be a bit different, but with the same conditions as you are used to. The focus will largely be on you as customers and your action in the shop.

We will go through a number of measures we expect to be followed and we will do our best to instruct you to have as comfortable and safe an experience in the study as possible. It is important that neither the employees nor our clients get sick and bring it home to our families.

## **Our Work Routine**

- More frequent and thorough cleaning, including many repetitive “risk areas” including door handles, toilet, etc.
- Max 2 employees and 2 customers at the store at the same time, and only 2 people in each room at a time.
- Updating all customers on if an outbreak happens we can trace back the possible chain of infections.
- No walk-ins. We only tattoo appointments and reserve the right to choose the projects that are most suitable at this time. We will, among other things, Do not tattoo the chest as it involves too close face-to-face contact.
- Additional protective equipment is used, including face mask by both tattoo artist and customer.

## **Before Arriving**

- We expect customers to transport themselves by bicycle, car or other. Do not take public transport to the studio or on the way home.
- It is not allowed to bring friends / family to your session.
- For illness symptoms, cancel your time. This applies to all illnesses. If you have been at a birthday or of larger gatherings within the past month, please cancel your time.

## **Arrival**

- Hands are disinfected with alcohol as soon as you enter the studio. The outerwear is hung on a hanger.
- Phone, headphones and other items are delivered in plastic pouch and delivered only when the session is over.
- Hands are washed from above the elbow and down, and disinfected again.

## **While in The Studio**

- Avoid touching surfaces and unnecessarily touching things, handles, books, etc.
- Avoid all contact with the face, including the eyes, nose and mouth.
- You will be provided with a face mask and gloves to wear during the entire session. For longer sessions than 3 hours, ½ break is introduced to protect lungs.
- Unfortunately, no coffee or anything else is served. We provide water in disposable mugs if needed.
- No intake of food in the studio.

We are really looking forward to seeing you and doing some great projects together. It will be different for both you and us, but we are sure the same Handshake Studio vibe and the unity we had before the corona will be present. Thank you for your support and the understanding we expect you have with us.

Thousands of virtual handshakes from us,

**Mike, Emil og Marcus.**
