

**Rational numbers:** Any number that can be represented as a fraction (a **ratio** of two integers).  
Repeating decimals are rational numbers.

Convert the following rational numbers to standard form (decimals).

1)  $\frac{3}{11}$

2)  $\frac{5}{8}$

3)  $\frac{61}{225}$

Convert the following rational numbers to fraction form.

4)  $0.\overline{7}$

5)  $0.\overline{31}$

6)  $0.\overline{18}$

7)  $0.7\overline{71}$

8)  $0.\overline{239}$

9)  $0.151\overline{02}$
