**Terikka Faciane, M.Ed.**

Author, Learning Success Coach & Resource Enthusiast

I am passionate about helping youth (and adults) discover who they are and why they are. I have been reaching out and teaching youth in some capacity for over two decades now. Approximately eight of those years were in the public school system, and 5 of those years were specifically working with youth labeled at-risk. I learned quickly that my students needed to be made aware of many things that were not in my curriculum guide. Most of my students had no idea of who they were or where they were going (if anywhere) so they could not see the value in 'schoolwork'.

I knew this dilemma was not unique to me. It was my goal then and remains my goal now to help students (and those who steward them) identify who they are, how they learn, and how to set goals and make decisions from this deeper place of knowing. I emphatically believe that as we help children fully recognize and embrace the seed of who they are - **their disposition, personality, interests, talents, concerns, hopes, passions and dreams** – we will begin to truly tap into their motivation to learn.

Many students are expected to **learn the same, perform the same, and produce the same**, when in fact they are **not the same**. This **self-guided parent course** addresses this myth by helping parents (and educators) better understand who their student is and how they learn best, so they can better prepare them to navigate school and ultimately succeed in life.

## What others are saying...

### Students

If asked to name a teacher that has had a huge impact on my life, I would have to say the first person to come to mind is Mrs. Faciane. She has given me confidence and taught me to be proud of who I am. She pushed me to look deeper into my heart than I would have ever dared and now I can truly say that I know who I am and where I plan to go. Mrs. Faciane, I thank you so much for everything!!!
