

2017 Fursuit Quote Form

Customer (legal name):
Character Name:
Character Species:
Ref Sheet URL:
Email:

Use N/A or No for things that do not apply, and **highlight** all items that apply to you. Include species info in the comments section if not generic. Please note that the *quote form* gives you a **rough** guideline to how much your additions are going to cost allowing you to plan for your budget even before we give you the quote. When including your **ref sheet** it must adhere to the following rules/guidelines. 1. Must be of a character that you own. 2. Must be a digital ref sheet. 3. Must Contain Front/Back/Side Views. 4. Must be clear/legible if the art is of poor quality it will be up to OUR interpretation. It is your responsibility to ensure that the ref sheet is legible. 5. If you are commissioning us for an artistic liberty suit/design please include the following: favourite colours, least favourite colours, a theme and/or a design that you like to use as inspiration. Lastly please note that *BP stands for Base Price*.

Customer Notes

Use this section to explain any specific details of the character. Remember to include species info, and the ref sheet if you haven't already done so above. If you want us to match furs please use this section to write a detailed list of the colours/furs used on your existing suit, include links where possible!

Office Notes (leave blank):

Asterisks

**Composite: composite is a technique/material we developed that combines the strength of both resin and foam to create a base that has the best of both worlds! Heads made with composite are lighter than most traditional foam or resin heads yet are still durable like resin heads (though not as durable as either foam/resin to impacts). They have a rough interior so they must lined. We charge 50\$ extra for composite heads.*

**Hand-Wefted: Unlike with regular fur which has a consistent pile length of 1-2" (excluding shaving) hand wefted fur is "fur" that we create by weaving together many small strands of synthetic fibers in a process called wefting. This allows us to control the length of the fur allowing us to create hair or mane that are realistic. Wefted fur is much heavier and coarser than regular fur so keep this in mind when requesting suits with large amounts of wefting. Hand wefted fur flows and moves like real fur, is thick and full, we texture it so it has a natural look. We recommend hand wefted fur for lions, wickerbeasts, characters with Mohawks, and realistic characters.*

**Custom Lining: On parts that can be lined such as the head, paws, feet, etc you can choose a generic lining which will be whatever material we have on hand or a custom made one. Custom made lining will be drawn and printed to your design and material specifications. In short you would be getting a lining made that has whatever you want on it such as but not limited to your character. You will receive a digital copy of any artwork we create when we make your custom lining.*
