

High Yielding
Early Maturing
AH Wheat

Southern NSW
2013

PRODUCT PROFILE

Emu Rock

AH WHEAT

Emu Rock

Key Features

- High yielding Australian Hard (AH) wheat
- Robust early maturing option for mid to late sowing opportunities
- Strong performing variety in 1.5 - 2.5t/ha yield environments
- Useful yellow leaf spot resistance
- Very large grain size
- Durable stripe rust resistance (Effective even in the presence of Yr17 virulence)

Pedigree

Emu Rock was formerly known by breeding code IGW3167 and is a derivative of parents Westonia, Kukri, Perenjori and Ajana.

Variety Overview

Emu Rock is a high yielding AH variety for mid to late sowings in a broad range of environments. This early maturing wheat performs best in shorter growing seasons and enables growers to utilise later sowing opportunities for improved weed control options. It also presents the advantages of durable stripe rust and yellow leaf spot resistance over other mid to late sown varieties. Emu Rock is susceptible to CCN but is still an excellent varietal option when used in conjunction with effective CCN break crops in a well-managed rotation.

Plant Features

Emu Rock has an intermediate height, it is shorter than Lincoln and has a medium coleoptile. This variety also exhibits similar crown rot resistance to one of its parents, Kukri. A rating of MS-S is considered a useful level of tolerance and is among the highest commercially available.

Sowing Rate

Due to the large grain size of Emu Rock it is important to consider sowing rates to ensure that the desired plant density is achieved in order to maximise yield potential with this variety.

PBR/EPR

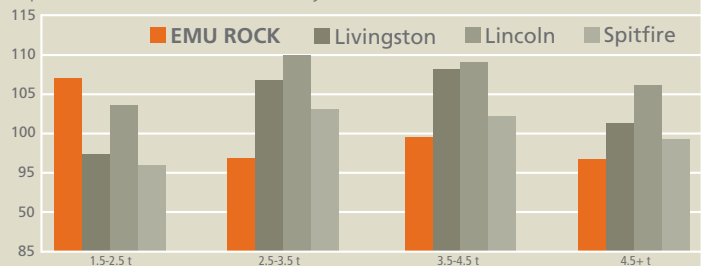

Emu Rock is protected by Plant Breeder's Rights and is subject to an end point royalty of \$3.50/Tonne GST Exclusive. Emu Rock is an InterGrain variety bred by Robin Wilson, Chris Moore and the wheat breeding team.

Seed Availability

Seed is available for purchase from registered InterGrain Seedclub members or your local reseller. For more information please contact InterGrain on (08) 9419 8000 or www.intergrain.com

CLASSIFICATION	AH
MATURITY	Early - slightly later than H45
YIELD	High in medium - shorter season environments
YELLOW LEAF SPOT	MS
STRIPE RUST	MR-MS
STEM RUST	MR-MS
LEAF RUST	MS-S
CROWN ROT	MS-S
CCN	S
SEED SIZE	Large, lower tendency to produce screenings
KEY FEATURES	Early maturity, high yield and large grain size
ALTERNATIVE TO	H45, Lincoln, Livingston, Crusader, Ventura, Spitfire & Ellison

2010-12 Southern NSW NVT Variety Performance by yield grouping - represented as a % of site mean yield. (44 environments)

Classification & Disease

VARIETY	CLASSIFICATION Southern NSW	YELLOW LEAF SPOT	STRIPE RUST (Yr 17-27)	STEM RUST	LEAF RUST
EMU ROCK	AH	MS	MR-MS	MR-MS	MS-S
Crusader	APH	MS	MS	R-MR	R
Ellison	APH	MR-MS	MS	MR	R
Lincoln	AH	MR-MS	R-MR	MR	MR
Livingston	AH	MS	MR-MS	MR-MS	R
Spitfire	APH	MS-S	MR	MR	MS
Ventura	AH	S	MS	R-MR	R
