

## Our Mission

The company is building a B2B cross border e-commerce platform for global trade expansion with initial emphasis on Brazil and China. Subscribers to the portal registered as BoaPin may access a variety of tools and features which may allow them to enhance and increase revenue initiatives. Some portal tools include: cross border payments, blockchain solutions, smart contracts and multilingual access. The multi-faceted e-commerce platform is scheduled for launch in Q1 of 2019 and the BoaPin website is currently under development.

## About

Pacific Software, Inc. (OTC: PFSF) is an emerging technology corporation positioned for investments, mergers and acquisitions of software technologies and platforms. The Company is designing and developing "BoaPin" an e-commerce trading platform focused on cross border trade expansion with an International emphasis. The Company is uniquely positioned to deliver a B2B and B2C e-commerce portal which will provide various solutions, applications and tools for its subscribers including; IBM's Hyperledger Blockchain "Backend as a Service" (BaaS) Infrastructure, fintech, digital marketing, smart contracts, commodities search/match applications, customs clearance, taxation data, product advertising and logistics solutions.

The Company's e-commerce platform may improve product traceability and deliver solutions to its subscribers for product certification, marketing, logistics, commodities search/match interface, trade finance, cross border payment solutions and customs clearance through smart contract technology for global supply chain management. Pacific Software Inc. is targeting several key industries where its online applications and solutions could have significant corporate impact in various forms including: Agriculture; Fertilizers; Chemicals; Cosmetics; Electronics, Equipment, Apparel and Controlled Substance Management.

## Investment Considerations

- Designing and powering BoaPin an e-commerce, cross border commodities trading platform creating solutions for sectors highly reliant on supply chain transparency, accountability and efficiency for buyers
- Business model allows for the formation of a wholly owned subsidiary incorporated as HyperSoft Ventures
- Working relationship with IBM provides expertise on supply chain implementations, blockchain technology and applications
- Management has more than 50 years of combined experience in finance, M&A and investments
- Advisory team led by Dr. Wang-Chan Wong, a 25-year veteran of global IT enterprise

## Recent Highlights

- Develops Corporate Registry for cross border, multi-faceted, B2B/B2C E-Commerce Platform to facilitate trade expansion worldwide.
- Letter of Intent with the Governor's office of Rondonia declaring mutual interest in promoting exporters to China
- Opened an office in Hong Kong and retained the services of Wallace Lo, CFA, MBA and Fund Manager of a licensed investment company in Hong Kong. Mr. Lo now serves on our Advisory Board and acts as President of Business Operations in China.
- Signs an agreement with a Brazilian Trade Organization where a portion of its 7,500 members may enlist as subscribers
